Subject: I would like my comments to be added to the public comments for agenda item 28 on Tue 7/14/2020

-EXTERNAL-

Dear City Clerk,

Fireworks are agenda item #28 for Tuesday's City Council meeting. I signed up to speak but I am not sure I will actually be available to participate during the actual council meeting time.

So here are the comments I want added to the public comments for agenda item 28.

- 1) I want the City to post publicly how many have been issued in 2020 for fireworks. How much of that fine money has been collected. How many of those fines were reduced.
- 2) I want Doug Haubert's office to look into the legal mechanism whereby parents could be charged/fined when their minor children are caught setting off fireworks.
- 3) I want the City to investigate using the Health Department as an enforcement mechanism against those who set off fireworks on the basis of air pollution and noise pollution. I want to City to figure out how quickly and how harshly the Health Department could fine property owners or individuals.
- 3a) I want the City to investigate how quickly and how harshly can the Health Department or Doug Haubert's office can fine property management companies such as Ernst Haas or Pabst Kinney when multiple of properties that they manage have been the locations where illegal fireworks are being set.
