Removal of elevators from service shall be coordinated with and be approved by the City. The City agrees to permit Contractor to remove elevators from service for a reasonable time in order to perform maintenance.

Contractor shall furnish a mechanic(s)/technician(s) for preventative maintenance, inspection and testing, according to manufacturer's standards, for the minimum number of hours per car per month according to the following table:

Elevator Car Type	Number of hours per car per month*
Gearless Traction	3
Geared Traction	2
Hydraulic	1
Dumbwaiter	1

* - Note: These hours are minimum required onsite hours per car per month and are exclusive of callbacks, repair work, and any other work not covered by this Contract (i.e., billable work). The City recognizes that some required preventive maintenance, inspection, and testing tasks will exceed the hours per month per car.

RESPONSE TIME:

Normal response time to trouble calls during regular working days shall be 1.0 hour. Response time to trouble calls during overtime working hours shall be a maximum of 2.0 hours.

Emergency response time for entrapments shall be 30 minutes or less during regular working hours (regular working hours are defined as 7:30 a.m. to 4:30 p.m., Monday through Friday) and forty-five (45) minutes or less during overtime working hours.

Contractor shall respond to all calls made by the City within the times noted above or the City may exercise the right to call another elevator repair company to respond. The expense of this call shall then be charged to and paid by the Contractor. Continued failure to respond to calls or failure to provide competent responsive service may cause termination of the Contract.

CITY OF LONG BEACH INSPECTIONS AND WORK REQUIREMENTS

The City reserves the right to make such inspections and tests whenever necessary to ascertain that the requirements of this Contract are being fulfilled. Deficiencies noted shall be promptly corrected at Contractor's sole expense.

If Contractor fails to perform the work required by the terms of this Contract in a diligent and satisfactory manner, the City may, after 30 days' written notice to Contractor, perform or cause to be performed all or any part of the work required. Contractor agrees that it will reimburse the City

for any expense incurred, and the City, at its election, may deduct the amount from any sum owing or to become owing to Contractor. The waiver by the City of a breach of any provision of this Contract by the Contractor shall not operate or be construed as a waiver of any subsequent breach by Contractor.

Contractor shall comply with all laws, codes, rules and regulations set forth by all authorities having jurisdiction in the location where the work is performed.

Contractor shall perform periodic tests and maintenance inspections of all equipment as required by current applicable safety codes for elevators, including, but not limited to, annual no-load, slow-speed test of car and counterweight safeties, governors and buffers; annual pressure test on hydraulic elevators; and a 5-year, full-load, full-speed, test of safeties, governors and buffers; all as required by ASME A17.1 Code. Tests shall include monthly fireman's recall systems, annual seismic provisions, and annual standby power provisions as applicable. Submit written reports of the tests to the City and, **in the case of running safety/load tests, prior notification shall be given so that a representative of the City may witness the test.**

SATISFACTORY EMPLOYEES OF CONTRACTOR

Contractor shall perform all work by and under the supervision of skilled, experienced, elevator service and repair personnel directly employed and supervised by Contractor. Any and all employees performing work under this Contract shall be satisfactory to the City of Long Beach.

EXTENT OF THE WORK

Contractor shall perform the work included in this Contract as follows:

Complete Maintenance: Regularly and systematically examine, clean, lubricate, adjust the elevator equipment and provide emergency callback service per the Performance Requirements of this Contract and, as conditions warrant, repair or replace all portions of the elevator equipment included under this Contract per the manufacturer's standards, with the following exclusions only:

- A. Repairs required because of negligence, accident or misuse of the equipment by anyone other than the Contractor, its employees, subcontractors, servants or agents, or other causes beyond the Contractor's control except ordinary wear.
- B. Repair or replacement of building items, such as hoist way or machine room walls and floors, car enclosures, car finish floor material, hoist way entrance frames, doors and sills, telephone instrument and signal fixture faceplates, smoke detectors and communication equipment not installed by an elevator contractor, cleaning of car interiors and exposed portions of sills.
- C. Mainline and auxiliary disconnect switches, fuses and feeders to control panels.
- D. Lamps for normal car and machine room illumination.
- E. Underground hydraulic piping and cylinders.

When, as a result of an examination, corrective action is found to be the responsibility of the Contractor, the Contractor shall proceed immediately to make (or cause to be made)

replacements, repairs, and corrections. When such work is determined not to be the Contractor's responsibility, deliver a signed written report to the City for further action, unless a safety or potential safety problem exists, in which case the Contractor shall immediately correct the problem at the least expense possible to the City.

In performing the indicated work, provide parts used by the manufacturers of the equipment for replacement or repair, and use lubricants obtained from or recommended by the manufacturer of the equipment. Equivalent parts or lubricants may be used if approved in writing by the City.

Parts requiring repair shall be rebuilt to "as new" condition. No parts or elevator equipment covered under this Contract may be permanently removed from the worksite without written approval by the City of Long Beach. This does not include renewal parts stocked on the worksite by Contractor, which shall remain its sole property until installed for use on the equipment.

MATERIAL INVENTORY

Maintain a supply of contacts, coils, leads, generator brushes, proper lubricants, wiping materials, printed circuit boards and other minor parts in each elevator machine room necessary for the performance of routine maintenance and restoration of service following a minor shutdown.

Maintain a supply of major spare lending parts (non-proprietary) available (i.e., motors, generators, armatures, etc.) for temporary use in an emergency. Major lending parts shall be at a location from which the Contractor can secure them as quickly as possible but not to exceed overnight shipping. The City may request, prior to approval and during the terms of this Contract, a spot check on the inventory. The extent of the check will be at the discretion of the City.

CREDITS

Any unscheduled shutdowns, of any elevator, that exceed two (2) days shall entitle the City to a proportional amount of credit for each day thereafter until the respective elevator is back in service.

LABOR TICKETS

The City reserves the right to request and receive copies of all work tickets relative to routine maintenance hours, repair hours, callback hours and any and all labor performed on work over and beyond the coverage of these Specifications. Furthermore, the City reserves the right to require all elevator contractor personnel to report in with the appropriate City building personnel before and after any work is performed.

PERFORMANCE REQUIREMENTS

Contractor shall maintain the manufacturer's minimum performance standards with regards to Floor to Floor Time, Door Opening Time, Door Closing Force, and Floor Accuracy and as noted below.

- A. Floor-to-floor times are measured from the time the doors start to close, including a typical one-floor travel and until the elevator is approximately level with the next successive floor, either up or down, and the doors 3/4 open.
- B. Door opening times are measured from start of car door open until doors are 1" from the fully open position.

- C. Stopping accuracy shall be measured under all load conditions.
- D. Door closing force is measured at rest with the doors between 1/3 and 2/3 closed.
- E. Variance from rated speed, regardless of load, shall not exceed $\pm 5\%$ for traction and $\pm 10\%$ for hydraulic.
- F. To maintain a comfortable ride, maintain vertical alignment of guide rails to a tolerance of 1/16" in 100'.
- G. For groups of three or more elevators, check or adjust the group dispatching system and make necessary tests to ensure all circuits and time settings are properly adjusted annually on the Contract agreement anniversary date. Complete all adjustments to provide optimum service, minimizing user response time. Perform all necessary testing to provide the following information:
 - 1. Annually conduct a data logger study that is supported by a written report covering three consecutive, regular working days between 6:00 a.m. and 6:00 p.m. The data gathered shall be in sufficient detail to provide the following data:
 - a) Number, direction and waiting time of all hall calls.
 - b) Elevators in and out of group service.
 - c) Elevators on independent service.
 - d) Motor generator running/not running.
 - e)
 - 2. **Submit the report within two weeks following the completion of the survey. It shall contain the following information:**
 - a) Graphs - Average Call Duration vs. Time of Day.
 - b) Bar Charts
 - 1) System response time by floor direction.
 - 2) Number of hall calls by floor by direction.
 - 3) Percent of calls answered vs. system response time.
 - c) Data
 - Printout for each half hour of the survey which tabulates waiting times for all hall calls in 15 second increments between zero and 120 seconds and longest wait calls for each floor in both directions.
- I. While completing the above requirements, maintain a comfortable elevator ride with smooth acceleration, retardation and a soft stop. Door operation shall be quiet and positive with smooth checking at the extremes of travel.
- J. Provide and maintain a solid-state faultfinder monitor to assist in locating and repairing intermittent elevator shutdowns. The fault finder shall have the capacity for monitoring and storing data on forty elevator failures, including, but not limited to:
 - 1. Time of day.
 - 2. Car position.
 - 3. Eight points on the safety circuit.
 - 4. Sixteen operating signal displays (to indicate what the elevator was doing when the failure occurred).

- K. Each year provide to the FMO a supervisory survey on items that are outside the scope of this Contract. This report should include changes in technology, potential safety hazards, building operations that could adversely effect the operation of elevator equipment, and any recommended upgrades.

SPECIAL CONDITIONS

Recordkeeping: The Contractor shall post its standard preventive maintenance schedule and a work log in each machine room. The log shall include all entries for routine maintenance and repairs, including supervisor's surveys. Entries shall include the date work is completed, mechanic's and supervisor's name, a brief description of work completed and the approximate time required for the work. Maintain the log and maintenance schedule in each machine room, as appropriate, for inspection by the City at any time. The City may copy the log and maintenance schedule at any time.

If this Contract is terminated by either party, a complete set of prints showing as-built conditions shall be made available to the City. The City may then, at its own cost, reproduce the as-built drawings.

Each State or City inspection fee will be at the City's expense. Fees for re-inspection due to failure to eliminate deficiencies covered by this Contract will be at the Contractor's expense.

Provide full assistance for periodic inspection and testing of the firefighter's service and standby power operation. Any additional cost to complete the above inspection and testing on overtime shall be paid by the Contractor.

If any elevator is shut down for any period exceeding 48 continuous hours (except for pre-scheduled repairs), the maintenance billing for the elevator shall be suspended until the elevator is back in service.

SUMMARY STATEMENT

A monthly summary statement of all work performed shall be submitted with the invoice and a duplicate copy shall be sent to the FMO. The monthly statement shall include the following information:

1. Building address
2. Elevator services
3. Type of service
4. Tech's name, arrival time, departure time
5. Applicable Notes (i.e., recommendations, new parts, etc.)

QUALIFICATIONS

In order to bid on Item 1, Contractor shall have a minimum of three years recent experience working on Otis and Haughton Motion Control elevators and equipment similar to that which is located in City Hall.

REFERENCES

Bidder shall furnish a list of five (5) current customers, including company name, street address, telephone number and contact person, for whom Bidder has provided similar services. The City intends to contact these customers to determine reliability, performance and other information. Failure to include customer's references may void bid if the City has no prior experience with bidder.

CONTRACT AWARD

Bids will be analyzed to determine the lowest responsible bidder for Item 1 and the lowest responsible bidder for Items 2-15. Items 2-15 shall not be split. Items 16-22 are currently under an active separate maintenance contract and may be added to this Contract. Depending on the analysis, the City will award either one or two contracts. Winning bidder may be required to submit a preventive maintenance schedule for each type of elevator system as part of the qualification process.
