Forbidden City should be able to have the live entertainment as requested. They have been a major support of the city and they are an asset to Long Beach. The location that they are in has been a very difficult one because of the access to get t to it. Other restaurants at this location have failed and we need businesses such as Forbidden City in Long Beach. They need to be able to compete with other restaurants to stay in business. We have been there several times and the music does not seem to interfere with the surrounding residences.
