

BELMONT SUZIE'S POOL 6-21-16 Public Comment

I have some very important questions for the Council.....

Wouldn't any of you like to have an Olympic state-of-the-art \$103 million pool built in your backyard?

The people of the 3rd District have miles of ocean to dip their toes in....what about other Districts?

Shouldn't a pool like this serve the entire community?

Isn't the westside just as important as the eastside of Long Beach?

When you look at parks and many other city-sponsored perks, hasn't the westside been overlooked for way too long? Couldn't it be placed somewhere in the middle of the City for greater access? (within three miles of the coast)

If we are so short of police and fire, then shouldn't those hundreds of millions be spent for public safety? Or, The money could be used to reconfigure the breakwater, thereby cleaning up shoreline water so that people would be able to safely swim in it.

Can we really afford to put another sand-based structure on a known earthquake fault and in harm's way of rising sea levels?

The city is always asking residents to conserve water....With California being a desert state and in drought conditions, shouldn't it be a salt water pool? Shouldn't the city be setting an example?

Why is it that we can spend hundreds of millions of dollars on a luxury item such as this, but we refuse to serve people who are sick and disabled—using Suzie's excuse of lack of funds?

Make no mistake....this is Suzie's pool and her pet project that will benefit the eastside and her District.....what will it do for yours?
