## DEPARTMENT OF PUBLIC WORKS

333 West Ocean Boulevard • Long Beach, CA 90802

December 13, 2005

HONORABLE MAYOR AND CITY COUNCIL  
City of Long Beach  
California

### RECOMMENDATION:

Determine that the granting of Facility/Pipeline Permit No. P-231-05 to the Long Beach Community College District will not be contrary to the public interest and authorize the City Manager to issue said permit in accordance with Section 15.44.060, Permit-Issuance, of the Long Beach Municipal Code, for the installation of electrical conduits, telecom conduits, chilled water piping and water piping across Carson Street and Lew Davis Street west of Clark Avenue. (District 5)

### DISCUSSION

The Long Beach Community College District (LBCC) has filed an application for Facility/Pipeline Permit No. P-231-05, to install electrical conduits, telecom conduits, and chilled water piping across Carson Street west of Clark Avenue and electrical conduits, telecom conduits, chilled water piping and hot water piping across Lew Davis Street west of Clark Avenue. The conduits and piping will service new building facilities on campus. The route of the proposed conduits and piping are shown on the attached vicinity map.

The Department of Public Works has reviewed the application and found the proposed conduits and piping to be compatible with existing installations and not an obstacle to any street use or any known proposed developments. Traffic control requirements stipulated by the Traffic and Transportation Bureau will be made a part of the special conditions for the excavation permit. Because it is a governmental agency, LBCC is not required by the Long Beach Municipal Code to file a bond or public liability insurance for this permit.

In conformance with the California Environmental Quality Act, a statutory exemption for this installation was filed with the County Clerk. Deputy City Attorney J. Charles Parkin reviewed this matter on November 28, 2005.

### TIMING CONSIDERATIONS

City Council action on this matter is not time critical.
