City Council Agenda item #36 - April 14, 2020

The City will then perform the required repairs through a City contract even though it is technically the responsibility of MWN. The repairs are not associated with future use of the Hospital as an acute care hospital and **are solely to provide funds to MWN in making the Community Hospital available as a COVID-19 patient transfer center** to better protect regional health and safety. The City would be making these repairs effectively as an advance to MWN with the understanding that **MWN and the City will work together to secure reimbursement to the City for these costs from the State or other sources.**
