Subject: Support SB9

-EXTERNAL-

I'm a Long Beach resident urging support of SB9.

It's illegal to build housing in 70 percent of California. SB9 would provide missing middle housing opportunity for young working families like my own.

It will also help California respond to historic job losses in the construction sector.

Best,
Ryan

Subject: Density Enabling Legislation

-EXTERNAL-

Dear Stacy Mungo,

I am very concerned and oppose the state legislations of SB 9, SB 10, and SB 1401. As a resident of my current home in District 5 for almost 27 years, born in Long Beach, and I have lived in Long Beach the majority of my life, I experience overcrowding in my neighborhood since people have more cars and more visitors staying for longer periods of time even during the quarantine.

Our crime rate has gone up, our Covid rate of illness is going up again, and our quality of life declines as we become overcrowded. I am not happy about putting units to cram more people even CSULB students, into neighborhoods. We bought our homes to have a yard space. I did not buy a home here to have a mansion or to build housing for a lot of people to pay rent so I could become rich. I hope you can support me and my neighbors in opposing these density enabling pieces of legislation. Thank you for this consideration.

Sincerely,

Wendy and Matt Porter

Subject: E-Comment to support SB 9

-EXTERNAL-

I strongly support any and all legislation that will streamline and simplify the construction of duplexes and ADU's in Long Beach. With higher inventory of smaller units, we may make a dent in the shameful crisis of un-housed people.
