I. Executive Summary

Introduction

Public Resource Management Group, LLC (PRM) is pleased to present the City of Long Beach with this summary of findings for the cost of services study for some of the City's fee-related activities.

The last comprehensive review of user fee costs was conducted in 1991. Since that time the City has conducted benchmarking surveys and set its fees in the median of what neighboring cities charge. The city is now interested in identifying the true cost of providing various fee-related services, and exploring the possibility of modifying current fees to better reflect the increasing cost of providing services. In June 2004, the city contracted with PRM to perform a detailed cost analysis using the adopted 2005 Fiscal Year budget and staffing information. Fees should continue to be reviewed on a regular basis and adjusted based on established city policy on user fee cost recovery.

This report is the culmination of the past eighteen months of work between PRM and city management and staff. PRM would like to take this opportunity to acknowledge all city management and staff who participated on this project for their efforts and coordination. Their responsiveness and continued interest in the outcome of this study contributed greatly to its success.

Study Scope and Objectives

This study included a review of fee-for-service activities within the following departments:

Planning and Building
Public Works – Engineering Bureau
Police
Parks, Recreation & Marine

Community Development - Code Enforcement
Health and Human Services
Fire

It should be noted that there may be other fees currently listed on the city's fee schedule that are not included in this study. Fees may not have been analyzed for a number of reasons, e.g.:

- Services that are not related to General Fund activities
- Some services are not performed regularly enough to provide reliable statistical information,
- They are impact fees
- They are fees for vehicle or equipment use

It should also be noted that several services are analyzed at the program level and these programs may include a number of individual fees. In such cases, individual fees would not be called out in the study; rather, the recommended adjustments identified in the study would apply to all fees that fall within a program.

For the reasons stated above, the departments should use this study to assist in revising the current fee schedules, but this study should not completely replace the existing documents.

The study was performed under the general direction of Financial Management with the participation of the above-mentioned departments. The primary goals of the study were to:

- Define what it costs the city to provide various fee-related services.
- Identify service areas where the city might adjust fees based on the full cost of services and other economic or policy considerations.
- Develop revenue projections based on recommended increases (or decreases) to fees.
- Provide a comparison with what other jurisdictions are charging for similar services.

The information summarized in this report addresses each of these issues and provides the City of Long Beach with the tools necessary to make informed decisions about possible fee adjustments and the resulting impact on general fund revenues.

Study Findings

While the purpose of this study is to identify the cost of fee-related activities, one of the outcomes of the analysis is a complete picture of the full cost of all services provided. It's necessary to identify *all* costs, whether fee-related or not, so that there is a fair distribution of all citywide and departmental overhead costs (discussed in the following section of this report) across all activities, ensuring a clear relationship between the cost of the service and the fee that is charged. No service should be burdened with costs that cannot be directly or indirectly associated with that service.

Therefore, the first task in this study is to separate the fee-for-service activities from the non-fee activities. Some non-fee related activities are appropriately funded by general fund monies (or other special revenue sources), such as most public safety services, capital projects, or many of the services provided by Parks, Recreation and Marine. The costs of these other services are identified and set aside from the user fee services.

Exhibit I below displays the split of the costs of each department for user fee related services into either user fee related or other service costs. Of the \$182 million in total costs analyzed, \$29 million (or 16%) of that total is related to user fee services. It is this \$29 million that is the focus of this study and this represents the total potential of user fee related revenues for the City of Long Beach.

Exhibit I

**City of Long Beach
Total Costs by User Fee Area
2005/2006**

Department	Costs Studied	Costs, User Fee Services	Costs, Non-Fee Services¹
Planning	\$4,378,233	\$3,597,422	\$780,811
Building	\$7,008,588	\$7,008,588	\$0
PW - Engineering	\$17,885,027	\$752,913	\$17,132,114
Code Enforcement	\$4,950,913	\$61,067	\$4,889,846
Health	\$7,941,325	\$3,956,619	\$3,984,706
Fire	\$57,296,410	\$2,692,371	\$54,604,039
Police	\$35,209,816	\$571,468	\$34,638,348
Parks, Recreation & Marine	\$47,411,522	\$10,433,570	\$36,977,952
Grand Total:	\$182,081,834	\$29,074,018	\$153,007,816
		16%	84%

These figures reflect budgeted appropriations plus indirect allocations for the fees related bureaus

The next step in the process is to identify the source of funds for the user fee services. Exhibit II below breaks down the \$29 million in user fee services between costs that are recovered through current user fee charges and costs that are subsidized by the general fund. Overall, the city is experiencing a 63% cost recovery level for its fee-related services for the services that were studied. Within each department, cost recovery levels range from 25% for the Police Department to 94% for the Fire Department. At the individual fee level, recoveries range from 0% to an over-recovery of costs for selected fees. The information about individual fees may be found in subsequent sections of this report.

Exhibit II indicates that the general fund is subsidizing fee activities by approximately \$10.8 million. This \$10.8 million represents a "window of opportunity" for the city to increase fees and general fund revenues, with a corresponding decrease in the subsidization of services.

Exhibit II

**City of Long Beach
Source of Funds
- User Fee Activities -
2005/2006**

Department	Costs, User Fee Services	Current Fees	Not Funded by User Fees
Planning	\$3,597,422	\$2,545,964	\$1,051,458
Building	\$7,008,588	\$5,402,572	\$1,606,016
PW - Engineering	\$752,913	\$398,126	\$354,787
Code Enforcement	\$61,067	\$56,970	\$4,097
Health	\$3,956,619	\$2,614,220	\$1,342,399
Fire	\$2,692,371	\$2,524,803	\$167,568
Police	\$571,468	\$141,690	\$429,778
Parks, Recreation & Marine	\$10,433,570	\$4,582,823	\$5,850,747
Grand Total:	\$29,074,018	\$18,267,168	\$10,806,850
		63%	37%

¹⁾ The "Current Fees" figure for Building of \$5,402,572 is derived by multiplying the number of permits processed from each valuation category by the average fee for each valuation category. Actual Building 2004/05 Building revenue totaled \$8,076,933.

The study's primary objective is to provide the city's decision-makers with basic data needed for setting fees. This report details the full cost of services and presents each department's proposed fees and projected revenues.

Exhibit III summarizes the report's financial analysis of the departments under study. **Please note that these figures reflect increases above the levels most recently adopted in August of 2005 and in the adoption of the FY 06 budget.** From the inception of our analysis through August of 2005, \$1,548,214 in fee increases or new fees have taken effect.

Exhibit III

City of Long Beach
User Fee Revenue Analysis
2005/2006

Department	Costs, User Fee Services	Not Funded By User Fees
Planning	\$3,597,422	\$1,051,458
Building	\$7,008,588	\$1,606,016
PW - Engineering	\$752,913	\$354,787
Code Enforcement	\$61,067	\$4,097
Health	\$3,956,619	\$1,342,399
Fire	\$2,692,371	\$167,568
Police	\$571,468	\$429,778
Parks, Recreation & Marine	\$10,433,570	\$5,850,747
Grand Total:	\$29,074,018	\$10,806,850

- 1) Current Fees include August 2005 early implementation adjustments and Phase 1 revenues.
- 2) The Building Bureau's Current Fee figure of \$5,402,572 is derived by multiplying the number of permits processed from each valuation category by the average fee for each valuation category. Actual 2004/05 Building fee revenue totaled \$8,076,933.

Methodology

A cost of service study analyzes two components of costs: the direct costs associated with providing each fee-for-service activity, and the indirect costs that support these activities. A brief discussion of each of these components follows.

Direct Costs. The direct costs associated with fee-for-service activities were analyzed in great detail in this study. PRM worked with staff and management within each of the eight bureaus/departments to develop the analysis that is summarized in the following sections of this report. Fiscal year 2004/2005 budget estimates were used to identify direct costs.

The first step in the process was to identify staff time spent directly on each of the user fee activities. Each staff person that participates in a user fee services identified time spent to complete each task associated with all user fee services. Annual volume statistics were also gathered in order to develop total annual workload information. Salary and benefit dollars were assigned to the time estimates to come up with the direct staff costs.

Indirect Costs. A proportionate share of other operating expenses and internal department administrative costs were layered onto the direct costs as a departmental overhead. Citywide overhead costs identified in the City's cost allocation plan (described below) were also added in as indirect overhead. **These three components of costs: 1) direct salary and benefits, 2) departmental overhead, and 3) citywide overhead constitute the "fully burdened" cost of providing each service.** The cost of each activity is then compared to the fee currently charged (as of August 2005), and an under- or over-recovery of costs is identified.

Cost Allocation Plan. Many of the costs that support all city departments and services are budgeted in centralized activities such as 1) Financial Management, which provides budgeting and accounting support, and 2) Human Resources, which provides personnel services, as well as the City Manager, City Attorney, the City Auditor, Mayor/City Council, City Clerk, Civil Service and Department overhead. The costs of these activities and other centralized services are considered indirect overhead that support fee-for-service activities as well as other functions within the city.

Each year the City prepares an indirect cost allocation plan that identifies and distributes these centralized costs to all operating departments and functions within the city's organizational structure. This cost allocation plan is prepared by an independent accounting firm.

The end result is an equitable distribution of centralized indirect costs to all operating departments and funds. The indirect costs are then added to the direct costs to determine the full cost of all city operations – whether fee-related or not.

Economic & Policy Considerations

Calculating the true cost of providing city services is a critical step in the process of establishing user fees and corresponding cost recovery levels. But although it is the most important factor, others must also be given consideration. City decision-makers must also consider the effects that establishing fees for services will have on the individuals purchasing those services as well as the community as a whole. The following economic and policy issues help illustrate these considerations.

It may be a desired public policy to establish fees at a level that permits lower income groups to participate in services that they might not otherwise be able to afford. Alternately, the City may establish discounts for those with financial hardship.

A consideration of community-wide benefit versus specific benefit should be considered for certain services (e.g. teen after-school programs, infant flue shots, senior exercise programs, etc.).

In conjunction with the second point above, the issue of who is the service *recipient* versus the service *driver* should also be considered. For example, code enforcement activities benefit the community as a whole, but the service is driven by the individual or business owner that violates city code.

Elasticity of demand is a factor in pricing certain city services; increasing the price of some services results in a reduction of demand for those services, and vice versa.

Public sector agencies have a monopoly on providing certain services within its boundaries, such as development-related services. However, other services such as recreation classes may be provided by the private sector, and therefore demand for these services is highly dependent on what else may be available at lower prices.

Pricing services can encourage or discourage certain behaviors. Some examples of this would be to establish a low fee for a water heater permit to encourage homeowners to ensure their water heater is properly installed, or setting false alarm response fees on an escalating scale to discourage multiple false alarms.

It may be impractical to establish a cost recovery system for some services or too costly to collect the fees. This is particularly true in cases where a newly proposed fee results in minimal annual revenue.

Report Organization

Following are report Sections II through IX, which present findings and recommendations for each department analyzed. Each section contains a table, which displays a variety of financial information for each service: current fee, total cost, and the current subsidy. A second table, titled "Total Program Information" presents: current annual revenue, annual fee related costs, and annual subsidy.

Sections II – IX are structured using the following format:

Findings and Recommendations. This is a brief overview of the results of the cost analysis. Any findings of note (recommendations, limitations on what the city can charge, new fee proposals, etc) are discussed here.

Per Unit Information. This summary sheet provides information about each fee area analyzed within each department or division. This spreadsheet shows the annual volume of activity, the fee currently charged, the full cost calculated, the resulting cost recovery level, and current subsidy (or over-charge). The last three columns on the right display information about recommended fee increases or decreases. These recommended adjustments were proposed by each department after reviewing the cost vs. revenue analysis and any other supplemental data.

Total Department Information. This summary sheet reviews the same fee information and recommendations identified in the per unit information sheet, but annualizes the cost/revenue projections by multiplying that information by the annual volume of activity.

Planning and Building Department

Planning Bureau

The Planning Bureau is comprised of five divisions: Advance Planning, Community Planning, Environmental Planning, Historic Preservation and Zoning. All of these divisions are involved with the processing of planning applications.

- Minor projects such as conforming room additions, patio covers and fences are reviewed administratively by the Planning staff at the Planning Counter, provided the projects comply with the Zoning and Subdivision Ordinance. The Planning Bureau is making an effort to review an increasing percentage of applications administratively to increase efficiency.
- More complex projects are typically processed through the Zoning Administrator or the Planning Commission, with few projects being heard by the City Council, unless appealed.

Beginning with submittal of an application, Planning charges for its services, and can be reimbursed for those services up to their full reasonable costs.

Two items on the Department's fee schedule are not currently enforced. These two items relate to the retrieval of public records (fees #12 and #56). The City Attorney has opined that it is inappropriate to charge people to review public records.

One category on the Department's fee schedule "Final Map - New Const & Other Subdivision" has been consolidated into Fee #37 "Final Map" fee category because the fee analysis concluded that there is no cost difference between the two fees.

One category on the Department's fee schedule, Fee #75 "Costal Permit Waiver", is obsolete and is recommended for deletion from the fee schedule.

Findings

This study identified and assigned costs to more than 100 existing, new or modified planning services. The Department's overall cost recovery rate of 71% is in the "slightly higher than average" range of most other Planning operations that we have analyzed. The majority of applications are subsidized by the general fund to some degree. A few fees, however, such as final map (#37) and continuance of a variance application (#52) are currently set above actual cost and require a fee reduction to comply with state law.

The department should adjust its existing fee schedule based on council direction on recommendations. The following summary schedule will not replace the city's existing schedule.

Building Bureau

The Building Bureau provides a variety of services related to building plan review and inspection, electrical, plumbing, and mechanical permit fees within the city. These services are the primary subject of this analysis.

The purpose for this analysis is twofold. First, it justifies fees for the purposes of reconciling to City Council that building fees are directly proportionate to the cost of providing services. Second, it justifies the fees for the purpose of showing compliance with the State of California Attorney General's Opinion No. 92-506. In this opinion the Attorney General determined that municipalities may not rely solely on the UBC fee schedules but must demonstrate that building fees do not exceed the reasonable cost of providing service.

Findings and Recommendations

Building permit fees are currently based on the valuation (value) of the proposed construction project. Building permit fees are used to offset the costs of inspecting and documenting building construction. Plan review fees are set equal to 85% of the permit fee. An additional filing fee of \$16.25 is charged for each permit to offset the cost of operating the Development Service Center (front counter).

Building permit fees are calculated based on the Bureau's fee matrix, which translates project construction valuations into fees. Construction valuations are based on 2001 building valuation data (BVD) factors as published in Building Standards Magazine.

The Building Bureau is interested in transitioning its fee schedule from a valuation-based system to an occupancy-based system. Many California cities, such as San Diego and San Jose, have adopted an occupancy-based structure believing that it more accurately reflects the City's plan check and inspection costs. In an occupancy-based system, fees are determined not by the value of the structure, but by what type of structure is being built. The Bureau believes their new Hansen project tracking system will facilitate this fee structure transition.

Highlights from the analysis:

The analysis reveals the Bureau is either under or over-collecting on many of the fee categories. Most of the low-valuation projects, such as room additions or re-roof permits are subsidized, while most of the larger projects, such as high-rises, generate surplus revenue.

The Bureau should adjust its existing fee schedule based on council direction on recommendations. This summary schedule will not replace the city's existing schedule.

Public Works – Engineering Bureau

The Public Works Department is responsible for the planning, construction and maintenance of the city's infrastructure; including buildings, parks, landscaping, and utilities. The Department is very large and complex with a large number of operating units. For purposes of this study, PRM focused on the Engineering Bureau. Therefore, although this analysis includes all components of costs associated with user fees, including citywide overhead, department administration and other direct operating costs, it does not include all the costs of the Public Works Department in its entirety.

Findings and Recommendations

The total cost of user fee services is \$752,913. User fee revenues total \$398,126 for an overall recovery level of 53%. This recovery rate is in the norm of other cities we have analyzed. It is unusual for engineering services to recover 100% of its service costs through fees, even though most of these services benefit new development.

Sidewalk dining permits and subdivisions will be studied as a separate project.

The department should adjust its existing fee schedule based on council direction on recommendations. This summary schedule will not replace the city's existing schedule.

Community Development - Code Enforcement

Code Enforcement operates as a division of the Neighborhood Services Bureau. The vast majority of the Division's revenue is generated through the administrative citation process. This is a recent departure for the City, whereby previously most revenue was generated through user fees. The Division has pursued Government Code 36900, which prescribes specific citation figures for failure to comply. Accordingly, our analysis focuses on those services that are not recovered through the citation process, but where a user fee is applicable.

The Code Enforcement Division responds to complaints of violations of the Long Beach Municipal Code that include substandard buildings, property maintenance, inoperative vehicles, weed abatement and land use violations. When violations are identified, the responsible parties are contacted and requested to abate the conditions. Failure to correct violations could result in a citation or a referral to the City Prosecutor's office.

Cities typically use code enforcement fees as a means to encourage compliance with city ordinances. State law allows cities to recover costs associated with the process of abating property deemed to be a public nuisance. Health and Safety code section 187980.8 addresses the abatement of dwellings while Government Code sections 38771-5 address non-dwelling nuisances. These codes allow for 100% cost recovery fees.

Findings and Recommendations

This study identified and assigned costs to twelve new or existing fee-related services. The Division's overall cost recovery rate of 93% is in the high range of other code enforcement operations we have studied. Two potential new fees were identified and analyzed, but Division staff chose not to implement them.

The Division should adjust its existing fee schedule based on council direction on recommendations. This summary schedule will not replace the city's existing schedule.

Health and Human Services

The City of Long Beach Department of Health and Human Services (DHHS) was established in 1906 to address public health and human service needs in the City of Long Beach. These services focus on the promotion of wellness and the prevention of communicable disease. The Department operates independently from the Los Angeles County Department of Health Services and is one of only three city-operated independent health jurisdictions in the state. Local provision of health services allows DHHS to tailor its programs to meet the specific public health and human service needs of City of Long Beach residents.

The Bureau of Environmental Health promotes and safeguards the quality of life in Long Beach by preventing disease and eliminating environmental hazards. These services and the associated fees within the Environmental Health Bureau are the main focus of this study.

The Environmental Health fees are placed into seven categories: Housing, Food, Water, Medical Waste, Certified Unified Program Agency (CUPA), Plan Check, and Miscellaneous. CUPA fees are accounted for in the CUPA Fund, a special revenue fund established to account for services relating to hazardous waste and materials. All other fees are recorded in the Health Fund, a special revenue fund which is used to account for revenues and expenditures associated with grants, core public health activities and health permits, fees and services.

Findings and Recommendations

The total costs of all Environmental Services (both fee- and non-fee related) are \$7,941,325. Fee-related service costs total \$3,956,619. Offsetting revenue is \$2,614,220, which results in a cost recovery level of 66%. The total cost of all non-fee related services (vector control, lead based paint removal, etc.) is \$3,984,706 and has offsetting grant and other revenues of \$2,447,640.

A brief discussion of some of the highlights from the Environmental Health analysis:

Housing - The Department is given authority by the Long Beach Municipal Code to inspect and issue health permits to owners of multiple unit housing, including apartments (4 or more units), hotels, motels, boarding schools, and rooming houses. The housing inspection and permitting program protects the public's health by identifying housing violations that jeopardize residents' health and safety, and taking appropriate enforcement action to correct them.

Food - The Department is given authority by the State Health and Safety Code to inspect and issue health permits to owners of restaurants, food markets, food processors, and other food services. The food inspection and permitting program protects the public's health by enforcing local and State food safety regulations, and insuring the proper, safe, and healthy handling of food products.

Water - The Department is given authority by the State Health and Safety Code to provide inspections and permits for public swimming pools and backflow prevention devices, to insure safe and healthy recreational and drinking water.

Medical Waste - The Department conducts annual inspections of facilities that generate medical waste, such as hospitals, nursing facilities, clinics, and laboratories. The inspection and permitting process insures the proper handling, storage, and disposal of medical waste. There are currently 29 separate fees under the Medical Waste Program. The Department requests the opportunity to consolidate these fees into broader categories that would better reflect the cost of providing these services. This could be accomplished through the budget process for Fiscal Year 2006-2007.

CUPA - The City of Long Beach established a Certified Unified Program Area (CUPA) in 1997 to consolidate Citywide Hazardous Materials Inspection functions. CUPA fees are billed to owners of businesses that handle, store, and dispose of hazardous materials. Current CUPA fees reflect varying cost recovery rates, with some fees as low as 30% of full cost recovery and others as high as 185% of full cost recovery.

Plan Check - Plan check fees are billed to businesses prior to the construction and remodeling of food facilities and for the installation and abandonment of water wells. Plan checks insure that facilities are built in accordance with applicable health and safety codes. This promotes food safety and the protection of our groundwater.

Miscellaneous - Miscellaneous fees are those in the fee schedule that do not fall under any of the above categories and include the permitting of: laundromats, private stables, garment manufacturing, and other fees. Current cost recovery rates range from 20-80%.

The department should adjust its existing fee schedule based on council direction on recommendations. This summary schedule will not replace the city's existing schedule.

Fire

Findings and Recommendations

The Long Beach Fire Department provides fire protection, rescue, emergency medical, and hazardous materials control and response services to the community. While most of the Fire Department's services are suppression or non-fee related, a significant portion is related to user fees. Prevention and inspection fees are necessary in order to provide the public with the maximum protection from loss of life and property through fire. It is imperative that thorough and periodic inspections be made of commercial buildings and multi-unit residential structures. Engine companies and Fire Prevention personnel conduct these inspections, with Prevention handling the more complex or potentially hazardous sites.

Highlights from the analysis:

The total cost of the Fire department is \$57,296,410. Fee-related services comprise \$2,692,371 of these costs. Currently, the Fire Department is recovering 94% of costs associated with user fee services. This recovery rate ranks among the highest that we have seen from a fire department. The Department does is not recommending additional increases beyond those adopted in the 2006 budget process.

Although legally the Department could increase New Construction and Tenant Improvement Plan Check fees (fee #5 & 6), doing so would position the fee above that charged by the Building Bureau for the same structures. For this reason the Fire Department recommends maintaining the fee equal to that charged by Building.

Revenues projected in the analysis assume activity/inspection levels remain consistent from one year to the next. Fire Staff caution that there may be significant fluctuations in activity over time, in either direction.

- a These fees are set by California State law and may not be increased.
- b These fees are not included in the scope of our analysis. However, the current fee is included to give a comprehensive picture of the Fire Dept.
- c The average revenue for this fee is derived by dividing annual 2004 revenue (\$200,166) by the number of new construction projects in 2004 (67). The actual fee (current and proposed) is equal to the Building Bureau's plan check fee for new construction projects.
- d The average revenue for this fee is derived by dividing annual 2004 revenue (\$206,391) by the number of new construction projects in 2004 (494). The actual fee (current and proposed) is equal to the Building Bureau's plan check fee for tenant improvement projects.
- e Extraordinary hazardous materials sites may be charged on a deposit plus time and materials basis at the Fire Chiefs discretion.

Police

The majority of costs incurred for Police services are not related to user fee services. \$34.6 million of the \$35.2 million total operating costs have been identified and set aside as "all other non-fee services". Service costs related to fee activities totals \$571,468 and are currently offset by \$141,690 in revenue -- an overall cost recovery level of 25%.

A brief discussion of some of the services provided by Police that are recovered through user fees follows.

Findings and Recommendations

The Police Department believes their taxicab related fees are extremely low. Police would like to establish additional fee categories for taxicab owner -- additional person on application, additional share purchase and corporation. The current fees are extremely low and only cover approximately 9% of the costs incurred.

Two new fee categories have been created for the Records division. The Records division issues vehicle impound notifications to vehicle owners and is not currently recovering any of the costs. They produce 10,000 notifications annually, which results in a general fund subsidy of \$115,214.

The department should adjust its existing fee schedule based on council direction on recommendations. This summary schedule will not replace the city's existing schedule.

a, e)
c)
a, c)
c, e)
c)
d)

- a) These fees require a live scan fee in addition to the charge listed.
 - b) The process for these services has recently changed or has not occurred recently. Therefore, the Police department does not wish to analyze these being recommended.
 - c) For these services Business License section costs have been included.
 - d) This service category reflects all of the non-fee related activities within the Police Department (i.e. patrol, investigation, etc...).
 - e) These permits are renewed on a biennial basis, which means the costs are incurred every two years. For display purposes, we have included an annual fee would be.
 - f) Previously, the entertainment permit category had multiple classifications (i.e. dancing, no dancing, alcohol, no alcohol, etc...). However, the process all categories.
- Therefore, the Police Department and PRM has collapsed these categories in order to simplify and better reflect the Police Department's current services. The following table reflects the fee revenue only estimated. Combined Governmental Costs 2004/2005. \$1.00 deposit is collected for each appearance by an officer. Actual time and materials will be charged against the deposit. The estimated costs and revenues are included for forecasting purposes.

1

1 Recommended revenue for this fee is higher than actual cost due to a rounding effect. The cost of one vehicle impound notification is \$11. a cumulative rounding effect of approximately \$4,800 (\$0.48 x 10,000) is projected.

Parks, Recreation And Marine

The Department of Parks, Recreation and Marine provides the management and operation of the city's parks and open spaces, sports and aquatics facilities, beaches, and recreation programs and services. The department's mission statement, "We create community and enhance the quality of life in Long Beach through people, places, programs, and partnerships" provided the focus and guidance for the development of the departmental strategic plan, completed in April 2003. Six strategic goals were identified in this plan, and these goals were integral to the development of this cost analysis:

- Ensure Open Space Parks and Recreational Facilities Meet Community Needs.
- Ensure City Parks and Recreational Facilities Provide a Positive Experience and Image.
- Ensure Recreational Programming, Leisure Opportunities, and Community Services Meet the Diverse Needs and Interests of Residents and Visitors.
- Ensure Beaches, Waterways, and Marine Amenities Are Accessible and Provide a Positive Experience and Image.
- Ensure Marinas are Fiscally Sound and Meet Boat Owner and Community Needs.
- Facilitate and Encourage Productive Service to the Community through the Department's Management Philosophy, Structure, Culture, and Employees.

The department has a number of funding sources, but the primary sources are the General Fund and the Tidelands Fund. The focus of this study was on the programs and services that are funded by general fund revenues. However, there is some overlap between the funds in terms of providing services, so this department's analysis includes tideland funds as they may support general fund operations. For purposes of this study, the majority of tideland fund costs are identified and set aside as "Other Services" -- together with any general fund programs that are not related to user fee programs.

Cost components in this analysis include:

Direct Costs (personnel costs and operating expense directly associated with providing the service),
Maintenance Expense (proportionate share of the department's Maintenance Line of Business),
Bureau and Department Administration (proportionate share of the department's Administration Line of Business plus general administration expense at the Bureau level), and
Citywide Overhead (proportionate share of the department's allocations from the FY03 Full Cost Allocation Plan).
Findings

The analysis for Parks, Recreation and Marine was done at the program level, i.e. a number of individual activities were grouped into program areas and annual costs were compared to annual revenues to determine overall cost recovery and subsidy levels. For example, although a number of fees are collected for different contract classes, all costs and revenues were grouped together into a single program category. This type of analysis is necessary for community services programs because of the wide variety of services offered – activities come and go based on the season and popularity of the activity, group sizes may differ, etc. The variables make it difficult for staff to provide accurate information on a “per unit” or per participant basis.

Community services programs tend to be extremely price-sensitive. The services are often perceived by the user to be non-essential and may not be utilized if they are deemed unaffordable or if alternatives are available at a lesser price. The department must weigh this issue together with the important issue of economic responsibility when determining cost recovery levels for fee-related services. Therefore, as part of this study, the Long Beach Department of Parks, Recreation and Marine developed a comprehensive cost recovery policy (provided as part of the staff report accompanying this study) to assist in developing appropriate fee adjustments for its services.

The department should adjust its existing fee schedule based on council direction on recommendations. The following summary schedule will not replace the city’s existing schedule.
