April 22, 2008

HONORABLE MAYOR AND CITY COUNCIL
City of Long Beach
California

RECOMMENDATION:

Determine that the granting of Facility/Pipeline Permit Supplement No. S-2-08, under existing Facility/Pipeline Permit No. P-160-89 to Chemoil Terminals Corporation, will not be contrary to the public interest; and then authorize the City Manager to issue said permit supplement in accordance with Section 15.44.060 of the Long Beach Municipal Code. (District 7)

DISCUSSION

Chemoil Terminals Corporation (Chemoil) has filed for Facility/Pipeline Permit Supplement No. S-2-08, under existing Facility/Pipeline Permit No. P-160-89, to install a cathodic protection system for one of their existing 10-inch pipelines. Cathodic protection is a method that uses electricity to slow the corrosion of metal. The system includes a rectifier cabinet, a vent, conduits and a well for sacrificial anodes. The location of the system is shown on the attached vicinity map.

The Department of Public Works has reviewed the application and found the proposed installation to be compatible with existing installations and not an obstacle to any street use or any known proposed developments. Traffic control requirements stipulated by the Traffic and Transportation Engineering Division will be made a part of the special conditions for the excavation permit. Chemoil Terminals Corporation will be given specific construction instructions designed to restore the integrity of the streets that they trench. Liability insurance is on file and a bond for faithful performance will be processed following City Council authorization of the supplemental permit.

In conformance with the California Environmental Quality Act, a statutory exemption for this installation is being processed with the County Clerk. This matter was reviewed by Deputy City Attorney Amy R. Burton on March 26, 2008 and by Budget Management Officer Victoria Bell on April 11, 2008.

TIMING CONSIDERATIONS

City Council action on this matter is not time critical.
