

Alliance Goals

- ❑ Provide safe, secure, efficient, attractive and functional facilities commensurate with the commercial flights permitted, accommodating the maximum passenger demand.
- ❑ Replace the temporary trailers, tented and chain-linked fenced facilities with modern, permanent and professional facilities.
- ❑ Ensure that no improvements to the passenger facilities be at the expense of the tax payers in the City of Long Beach.
- ❑ Support long-term leases with the airlines, commensurate with upfront investments in facility improvements.
- ❑ Support all efforts to protect the existing noise ordinance.

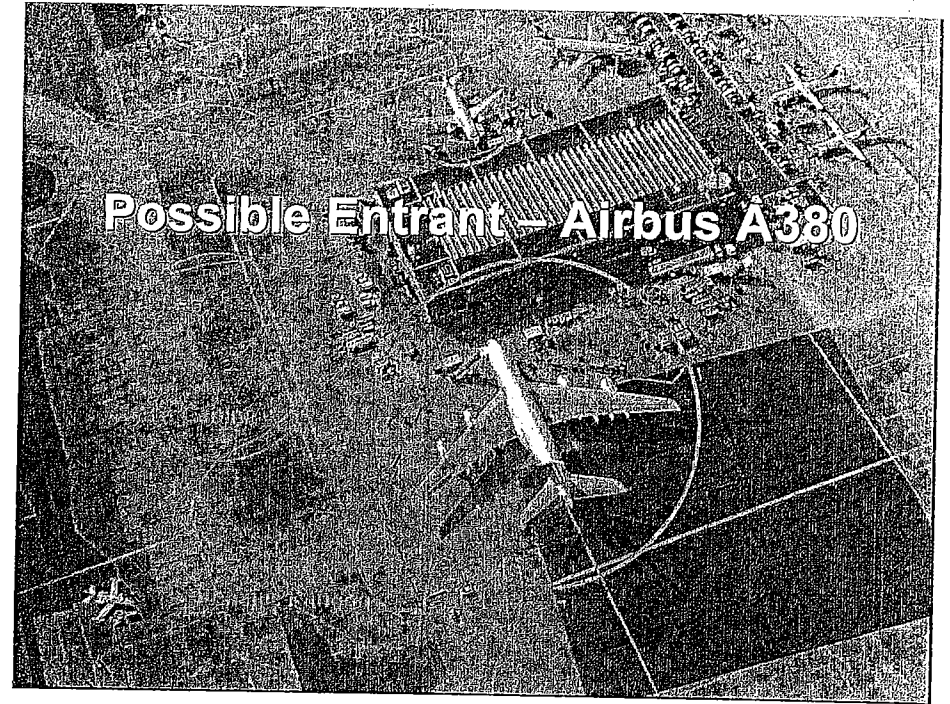

Fact

Larger airplanes can and potentially will, over time, service the Long Beach Airport under the existing ordinance.

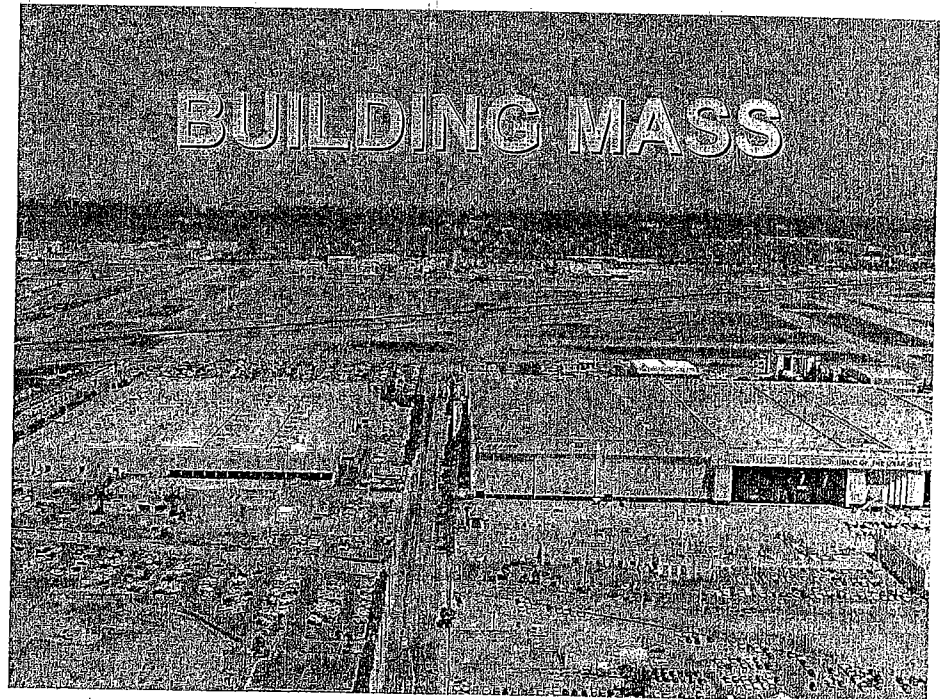

Possible Entrant – Airbus A380

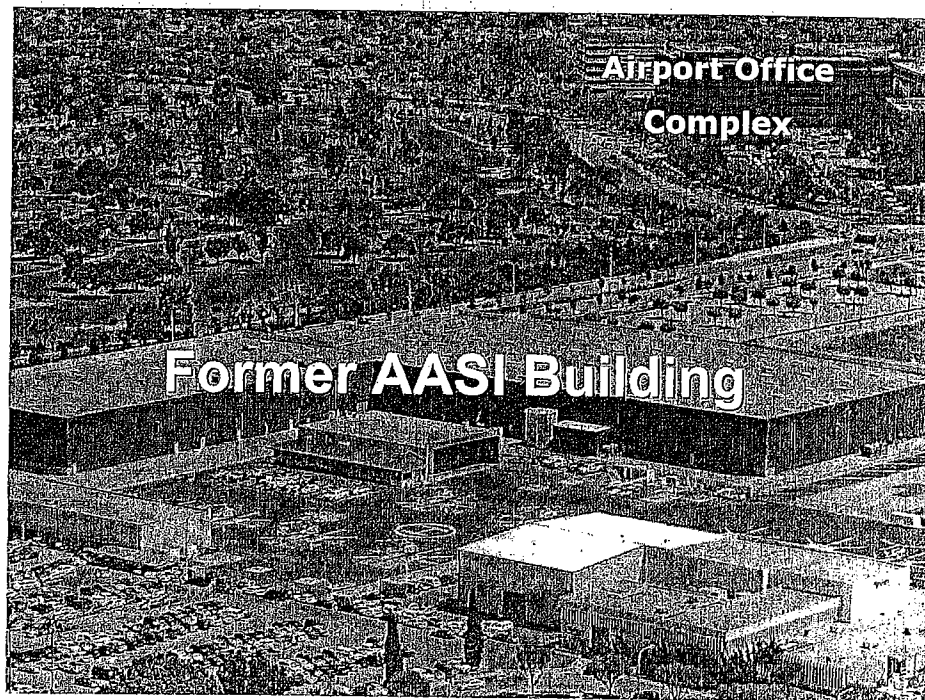

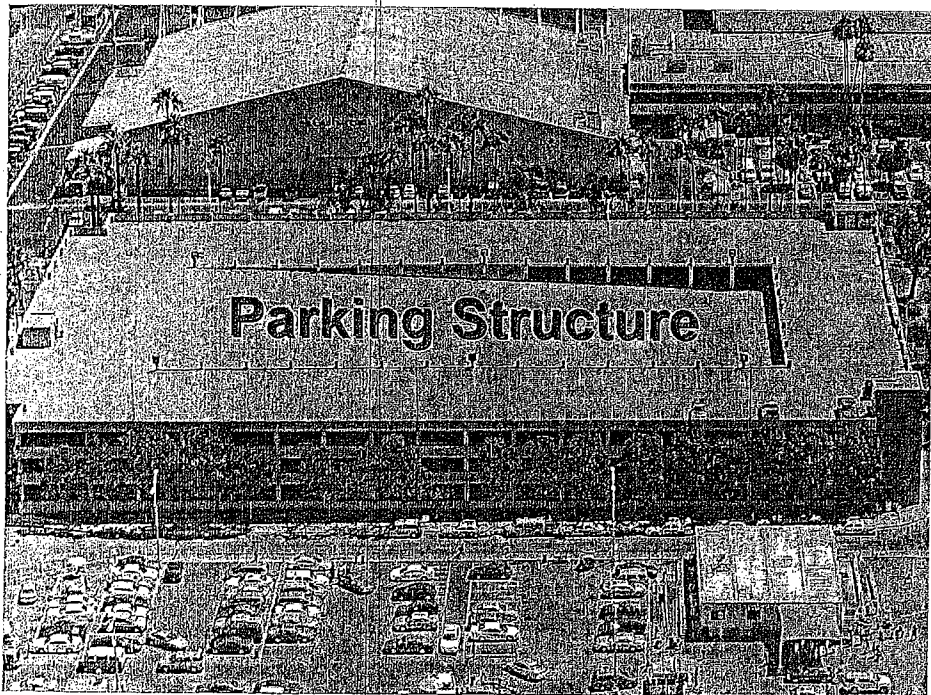

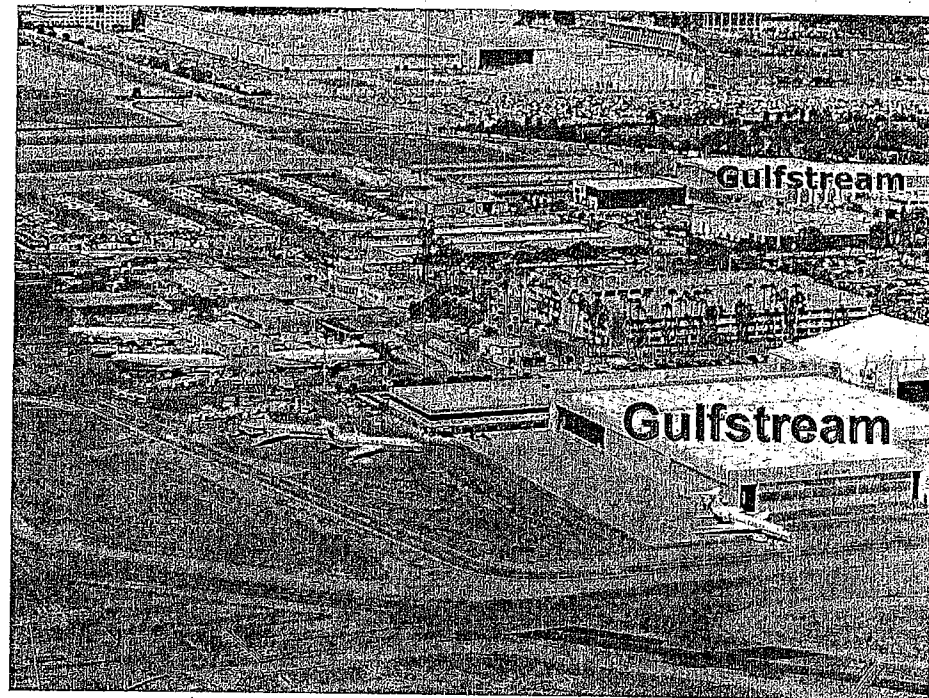

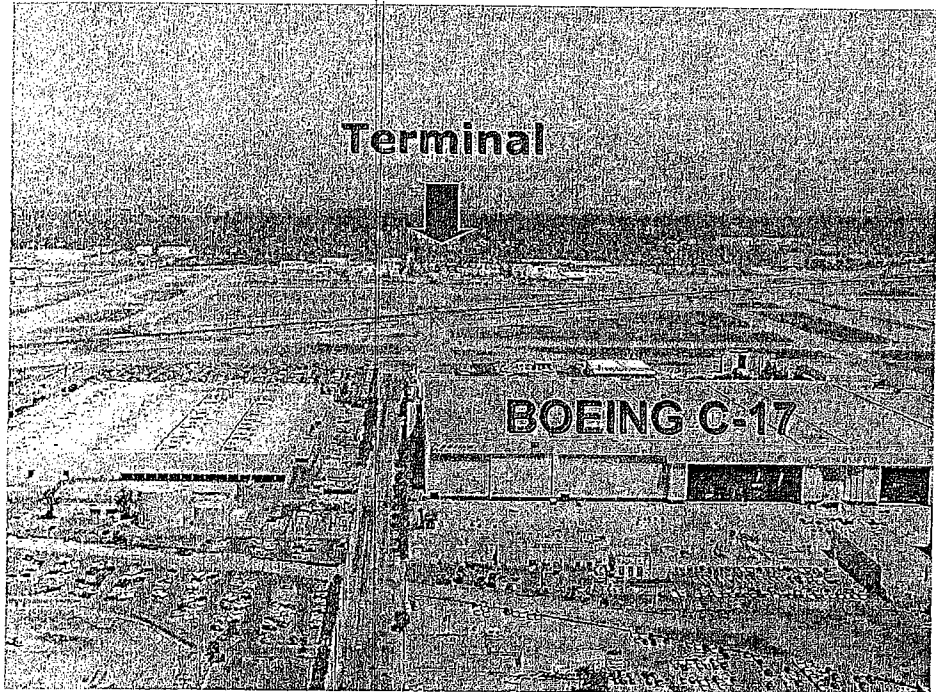

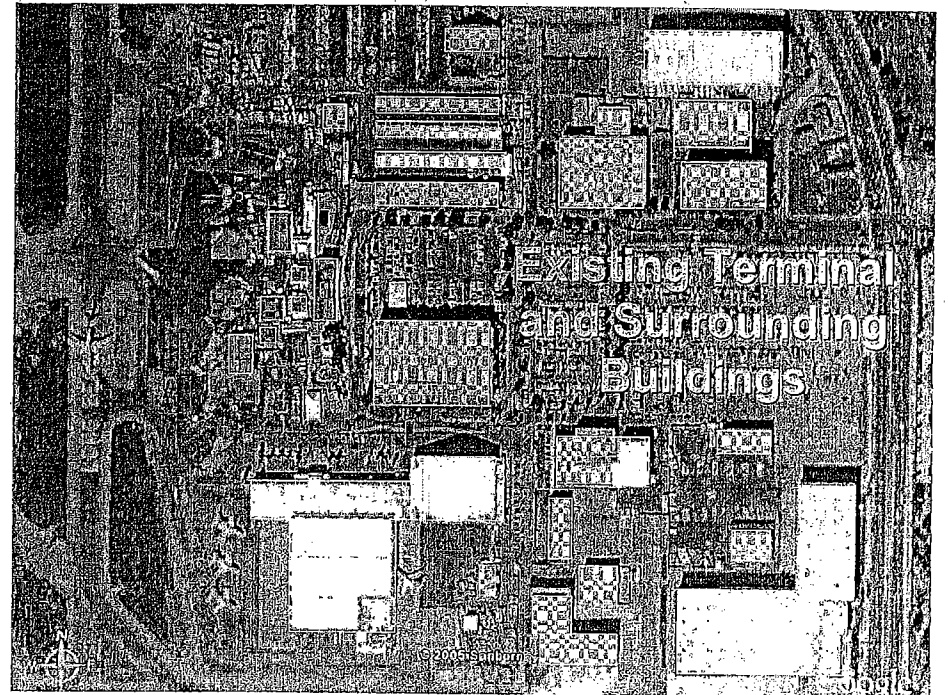

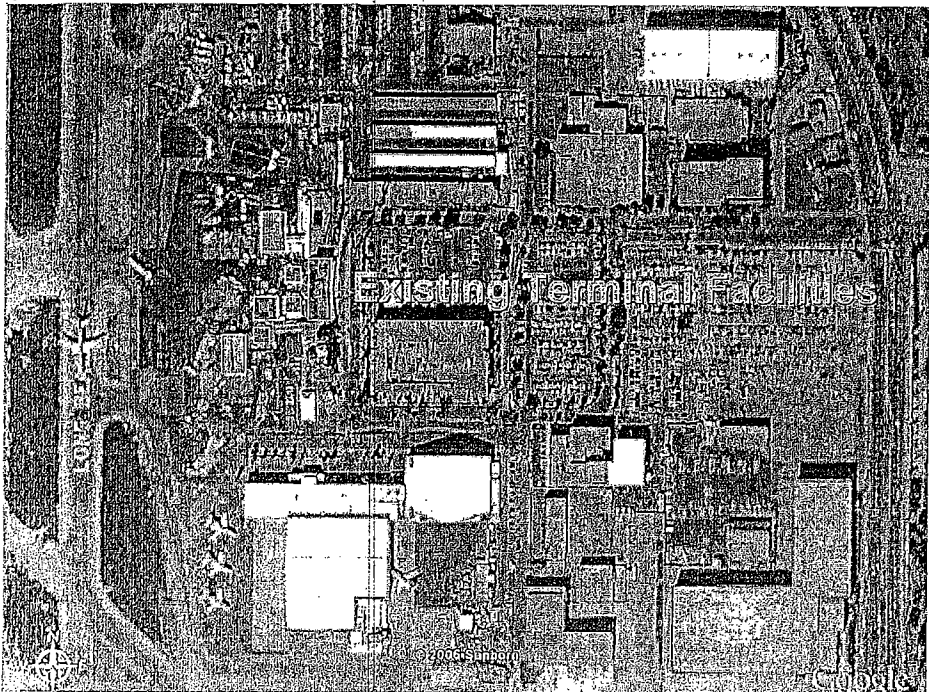

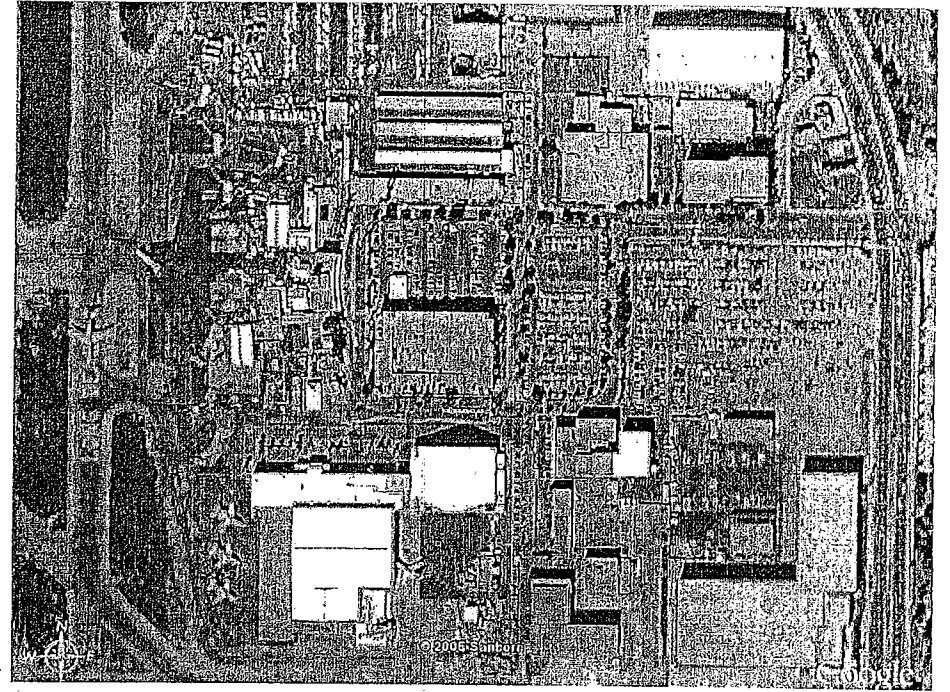

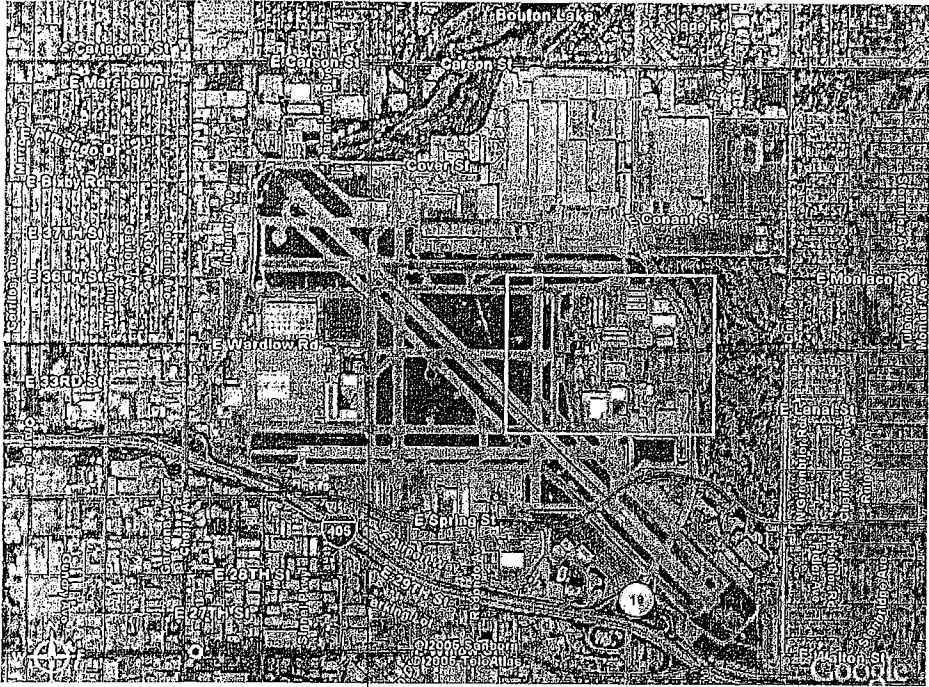

Fact

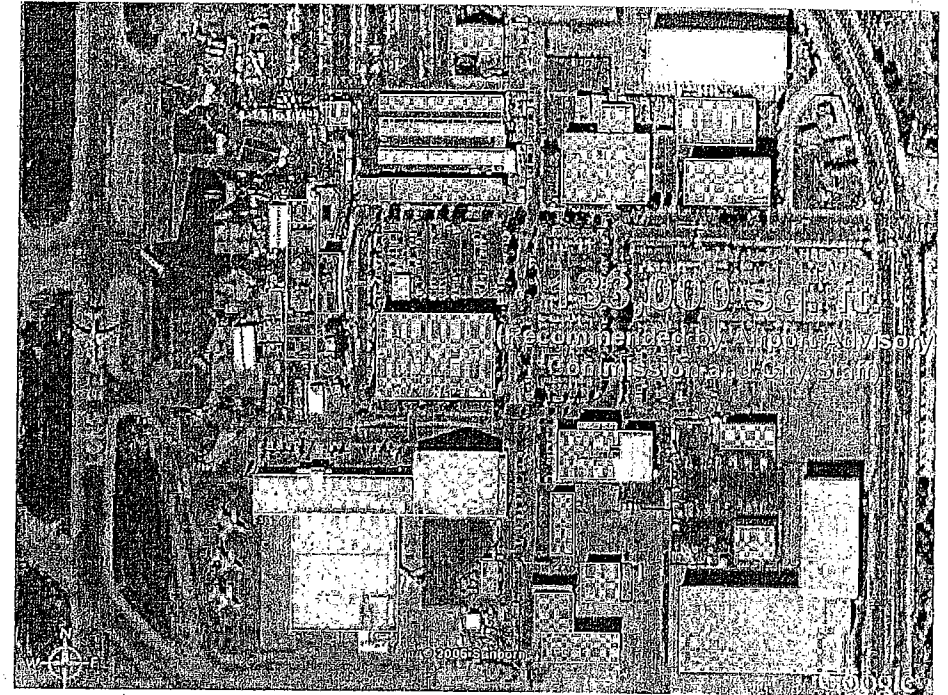

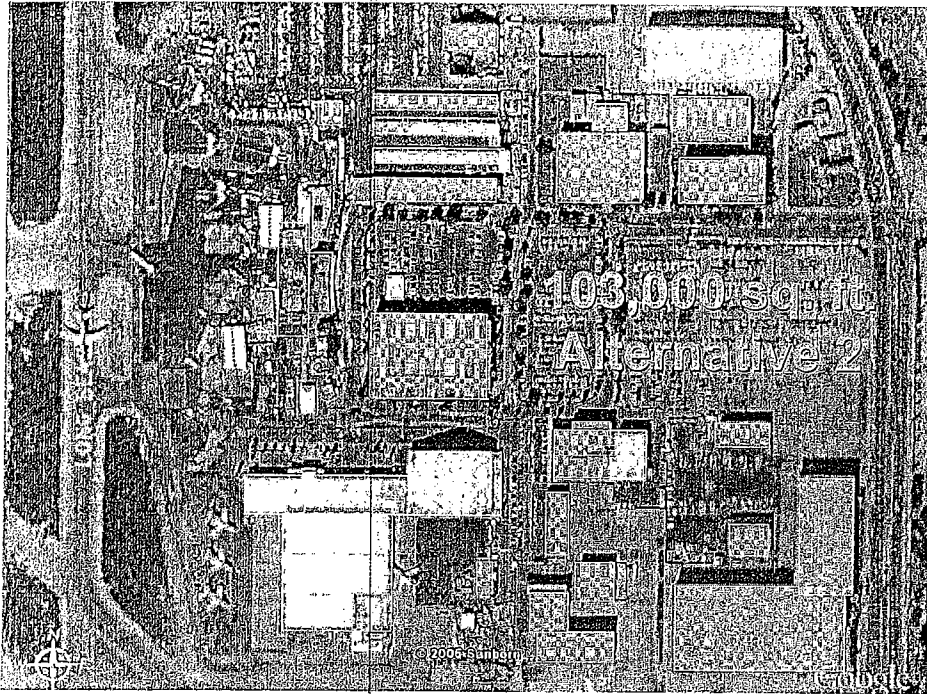

Existing buildings at the airport **DWARF** the existing and proposed terminal sizes.

BUILDING MASS

Facts

- 41 + 25:** Current number of flights per day under the ordinance.
- 41 + 25:** Number of flights per day under the ordinance following terminal improvements.
- 41 + 25:** Number of flights per day under the ordinance if **NO** terminal improvements are made.

Environmental Impact Report

- ❑ The number of flights and the number of passengers WILL drive the results of the EIR.
- ❑ The terminal size WILL NOT materially effect the results of the EIR.
- ❑ The EIR WILL document that better accommodation of the air and ground traffic with adequate airline parking slots, functional passenger facilities and car parking will reduce negative impacts to the community.
- ❑ The EIR WILL NOT tell you what size building to build.

We're Full

- ❑ It's not "if we build it, they will come;" they've arrived and we're all waiting.
- ❑ The recent request for the remaining commuter slots will **completely fill all 41 + 25 commercial flight slots.**
- ❑ What is needed are adequate facilities.

Start Now

- ❑ The Alliance supports and defends the current noise ordinance.
- ❑ The Alliance **EXPECTS** all 9 Council members to take an active leadership role in planning the airport **NOW!**
- ❑ The City Council cannot wait around for the final EIR report in Spring 2006 before beginning **ACTIVE** planning.
- ❑ The Alliance **WILL NOT SUPPORT LESS THAN 103,000 square feet of passenger terminal space and 14 aircraft parking pads.**

Time to Plan

- ❑ The current ordinance followed 13 years of litigation to preserve and protect local control.
- ❑ Failing to provide adequate facilities puts at risk the City's ability to maintain local control.
- ❑ The time to start designing and planning the new terminal is **NOW.**
- ❑ We commend the council for putting this agenda item forward this evening.
