

### CITY OF LONG BEACH

DEPARTMENT OF FINANCIAL MANAGEMENT

333 West Ocean Boulevard 6th Floor • Long Beach, CA 90802

September 19, 2006

HONORABLE MAYOR AND CITY COUNCIL City of Long Beach California

### RECOMMENDATION:

Refer the Fiscal Year 2006 Third Quarter Budget Performance Report to the Budget Oversight Committee. (Citywide)

### DISCUSSION

This report provides an update on the City's Fiscal Year 2006 (FY 06) budget and operational performance through June 30, 2006. The report covers a broad spectrum of financial information for all funds and departments with multi-year comparisons, charts and graphs to provide a clear picture of the City's financial situation. While the focus of the financial report is the General Fund, exceptional performance (both positive and negative) in other funds is highlighted where applicable.

### Summary

FY 06 is the third year of the City's Financial Strategic Plan (Plan). As such, over \$92 million in structural budget solutions have been included in the General Fund and related funds budgets over the past three fiscal years. These solutions, which have included the reduction of programs, services and positions, as well as increased revenue and cost recovery, have placed a substantial strain on the organization as it downsizes and becomes more efficient. While resources required to provide public safety, infrastructure maintenance, library, recreation and other general government services have been reduced significantly, public demand for services continues to grow. As a result, departments' ability to remain within appropriation limits while providing high quality service will be a continued challenge as the City implements the Plan and restores equilibrium between the services it provides and the resources available to support them.

As of June 30, 2006, the total adjusted General Fund expenditure budget was \$368.0 million, with budgeted revenue of \$360.0 million. The difference between budgeted revenue and expense reflects the use of fund balance. After nine months of the fiscal year, overall revenue and expenditures are on target. With 75 percent of the fiscal year complete, approximately 80.5 percent of anticipated General Fund revenue has been collected. During the same period, approximately 74.0 percent of the adjusted General Fund budget has been expended. The total Adjusted City Budget for all funds as of June 30, 2006 was \$2.697 billion. With 75 percent of the year complete, expenditure performance in all funds is at approximately 54.6 percent year-to-date.

Estimates-to-close for both revenue and expense provide an important guidepost for future budget decisions both in the current year and as the City plans for next year's budget. According to department estimates, General Fund revenue is expected to come in at 103.3 percent of the adjusted budget, which is \$11.7 million more than originally projected. General Fund expenditures are expected to come in at 101 percent of the current adjusted budget. While performance to date and estimates-to-close are promising, it is critical to maintain the utmost fiscal restraint as several million dollars of expected, but still to be achieved optimization related cost savings, one-time revenue and unbudgeted expenses related to newly negotiated compensation increases put increased pressure on the budget.

Focus on Results (FOR) Long Beach is a commitment to performance management designed to help departments improve operational efficiency and effectiveness, and to provide an improved means by which the City can communicate public value created by its programs and services. By creating a direct link between program results and the budgets that support them, FOR Long Beach will give the City the tools to support decisions that allocate scarce resources to the highest priority issues. By renewing departments' focus on the results they produce for the community, it will be easier to articulate the value created to the City Council and community. As this is the first year of FOR Long Beach implementation, data collection systems and analysis are developing and will be implemented over time. Nonetheless, significant progress has been made toward the full integration of the principles and management tools of FOR Long Beach into the daily business of the City. This third quarter report, as with all quarterly budget and operational performance reports going forward, includes Highlights of Departmental performance.

### FY 06 General Fund Revenue

Current and projected revenue performance is based upon a variety of sources, both structural and one-time. We must recognize the risks inherent in projecting revenue, many of which the City has limited, if any, authority to affect. We must also consider that the FY 06 budget was balanced using some one-time revenues, including the sale of several properties (i.e., City Hall East, State Building parking lot and the Video Choice property), with the sale of only one of the four properties now being slated to take place in FY 06. Therefore, the following update in revenue performance must be reviewed within this fluid context.

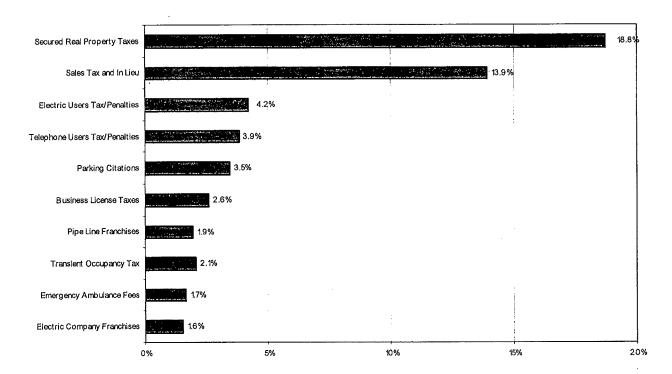

Overall, year-to-date General Fund revenue is \$289.7 million, or approximately 80.5 percent of total projected revenue, and is in line with the expected performance after three quarters of the year. Total General Fund revenue is estimated to finish the fiscal year at 103.3 percent, or \$11.8 million higher than originally budgeted. The table below highlights year-to-date performance for selected General Fund revenues:

| Revenue Source          | FY 06 YTD<br>Revenue | YTD Rev<br>as % of<br>Adjusted<br>Budget | FY 06<br>Estimates<br>to Close | Notes   |
|-------------------------|----------------------|--|--------------------------------|---|
| Secured Property<br>Tax | \$54,340,027         | 93.7%                                    | \$58,980,000                   | The fifth of seven secured property tax payments from the County has been received. Secured Property Tax is expected to finish the year slightly above budgeted levels of \$58,015,000. |

| Revenue Source   | FY 06 YTD<br>Revenue | YTD Rev<br>as % of<br>Adjusted<br>Budget | FY 06<br>Estimates<br>to Close | Notes  |
|--|----------------------|--|--------------------------------|--|
| Sales and Use Tax<br>(net of sharing<br>agreements and<br>adjusted for the<br>Triple Flip) | \$40,395,921         | 84.6%                                    | \$50,547,466                   | The Sales and Use Tax payments were reduced by 25 percent for the State Triple Flip and are offset by the bi-annual Property Tax In-Lieu of Sales Tax payment from the State. Sales tax performance is approximately 9 percent ahead of budget; this is due to healthy growth in the City's sales activity and the one-time receipt of an additional \$1,033,253 for an Office Depot sales tax settlement. |
| Motor Vehicle In-<br>Lieu Tax (VLF),<br>combined with<br>Property Tax in Lieu<br>of VLF    | \$29,233,059         | 115.8%                                   | \$29,977,000                   | Payments for VLF are received monthly, while the Property Tax In-Lieu of VLF is received in January and May. Collections are trending well above budget due to growth in the City's gross assessed property valuation that is used as the methodology to compute the Property Tax In-Lieu VLF. Motor Vehicle In Lieu Tax collections are also performing above budgeted levels.                            |
| Utility Users Tax  | \$30,218,212         | 73.2%                                    | \$41,354,000                   | Electric UUT collections are trending above budget due to first and second quarter rate increases. Natural gas UUT collections are higher than anticipated despite the warm winter due to higher gas prices. Telephone UUT collections are lower, likely due to increased price competition in the telephone industry. Water UUT collections are trending around budget.                                   |
| Parking Citations  | \$10,062,705         | 93.6%                                    | \$12,628,640                   | Collections for Parking Citations are trending above budget due to fully staffing enforcement positions.   |
| Business License<br>Tax  | \$7,587,686          | 76.4%                                    | \$10,130,000                   | Collections are trending slightly above budget due to a continued increase in the number of licenses issued and annual CPI adjustments.  |
| Emergency<br>Ambulance Fees  | \$4,886,165          | 59.3%                                    | \$8,480,000                    | Compared to FY 05, Emergency Ambulance fees are higher due to the implementation of the Basic Life Support (BLS) Pilot Ambulance Program. Despite a slower YTD trend in collections, the Fire Department anticipates exceeding its revenue projections for this new program by year-end by \$240,000 or 2.9 percent.   |
| Transient<br>Occupancy Tax   | \$5,983,133          | 73.4%                                    | \$8,150,000                    | Transient Occupancy Tax receipts are trending at budgeted levels. Occupancy levels and room rates are demonstrating growth over those in FY 05.  |
| Pipeline Franchises  | \$5,643,212          | 69.4%                                    | \$6,790,000                    | Southern California Gas Pipeline Franchise fee revenue is expected to end the year below budget by \$1,337,000 or 16.5 percent. Though natural gas prices are higher, the volume transferred to electric plants during the past two quarters was nearly half that of the same period in FY 05.   |

General Fund revenue estimates-to-close are at \$371.7 million, which is 3.3 percent more than the Current Adjusted Budget. This equates to approximately \$11.8 million in additional revenue, much of which is one-time (e.g., Upland Oil transfer, Office Depot Settlement and prior-year secured real property tax payments.) A summary of the top 40 General Fund revenues with estimates-to-close is included in **Attachment A**, and a year-to-year (FY 05 to FY 06) comparison of the top 15 General Fund revenues is included in **Attachment B**. Exhibit 1 below shows the City's top 10 General Fund revenue sources in FY 06 as a percentage of total General Fund revenue.

Exhibit 1 - Top 10 FY 06 General Fund Revenue Sources as a Percentage of the \$289.7 million Total Year-to-Date

Please see **Attachment C** for a breakdown of General Fund revenue with estimates-to-close by department.

### FY 06 General Fund Expenditures

The Adopted General Fund budget for FY 06 was \$362.1 million. As of June 30, 2006, the total adjusted General Fund budget was \$368.0 million, including the City Council approved budget adjustments totaling approximately \$5.9 million primarily due to added grant funded or revenue offset programs or projects. The overall year-to-date General Fund spending is 74 percent of budget. Department estimates-to-close are in line with the adjusted budget at 101 percent of the current adjusted budget. Necessary budget adjustments will be made during the fourth quarter of the fiscal year, including salary adjustments and summer programs. Attachment D provides a listing of all departments' year-to-date General Fund expenditure performance with estimates-to-close.

### FY 06 General Fund Expenditures by Department

Though there were few expenditure performance exceptions at the department level, those worth noting include:

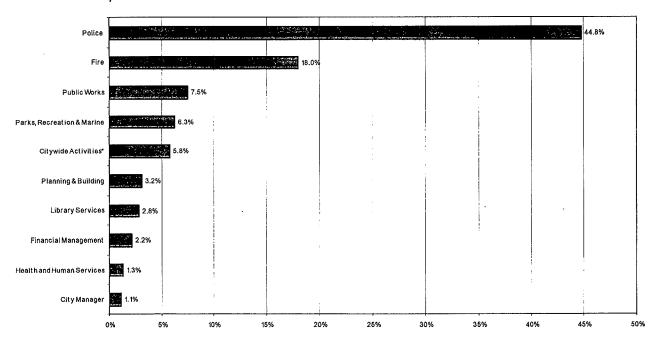

• Citywide Activities reflects spending at 148.1 percent of budget year-to-date, with an estimate-to-close of 176.1 percent. This is primarily due to the fact that the Adjusted Budget reflects anticipated savings from optimization studies. These structural

savings are still anticipated, but will likely be realized fully by next fiscal year. The Citywide Activities budget will be supported by using one-time revenues.

• The Department of Planning and Building incurred unanticipated increased construction costs related to the major overhaul of the Development Services Center. Due to these costs, the Department is estimating to end the year over appropriation by approximately \$365,000. The Department will submit a Fourth Quarter Budget Adjustment to City Council to increase their current allocation.

At mid-year, the majority of General Fund expenditures have come from departments providing public safety services. Of the \$272.3 million expended to date, the Police Department (44.8 percent) and Fire Department (18.0 percent) comprise 62.8 percent of the total General Fund year-to-date expenditures. Exhibit 2 below shows the largest departments as a percentage of General Fund year-to-date expenditures.

**Exhibit 2** – Largest FY 06 General Fund Expenditures Year-to-Date by Department, as a Percentage of the \$272.3 million Total Expenditures.

<sup>\*</sup>Citywide Activities include debt payments, pass through transactions, old Police and Fire pension plan, General Fund project funding, etc.

Attachment E displays General Fund spending at the department level as compared to the departments' current adjusted budget, including an FY 06 to FY 05 comparison. FY 06 General Fund expenditures total 74.0 percent of the \$368.0 million budget compared to 74.3 percent of the \$377.9 million budget for the same time period in FY 05.

HONORABLE MAYOR AND CITY COUNCIL September 19, 2006 Page 6

### FY 06 Expenditure Performance – All Funds

The City's Adopted FY 06 Budget for all funds includes \$2.069 billion of annual funds, carryover (multi-year grants and capital projects funds) of \$245.4 million, prior year encumbrances (goods and services ordered in FY 05 but received in FY 06), and mid-year City Council approved budget amendments. Combined, the total Adjusted City Budget as of June 30, 2006 was \$2.697 billion. Please see **Attachment F** for a breakdown of Citywide expenditures by fund.

While it is not expected that department or fund expenditures would occur equally throughout the fiscal year or be fully expended in the current fiscal year due to the inclusion of multi-year projects, monitoring the rate of expenditure is a helpful indicator of resource management. With 75 percent of the year complete, expenditure performance in all funds is at approximately 54.6 percent year-to-date. Overall, there are no fund performance anomalies to note.

### **Other Significant Issues**

### Oil Revenue

Wilmington Crude prices have remained strong, with the price at \$61.85/bbl, as of June 27, 2006. This results in additional payments to the State, as well as increased revenue for the Tidelands Fund and General Fund. The Long Beach Gas and Oil Department estimates that the transfer to the Tidelands Fund will increase from \$11.2 million to \$15.6 million, while the transfer to the General Fund will increase from \$10.2 million to \$13.3 million.

### Focus on Results – Operational Performance

Focus on Results (FOR) Long Beach is the City's comprehensive performance management program, which is in its first year of implementation. The goal of the program is to improve the efficiency and effectiveness of City operations by aligning City operations around the City Council's and community's priorities and increasing accountability at all levels of the organization. The program was developed to provide the community, elected officials, City management, and department staff with the tools to achieve key priorities through an integrated planning, budgeting, management, reporting, evaluation and decision making system. A central component of the program is performance measurement, and departments have been tracking performance information on key output measures since the beginning of FY 06. This will be expanded in the coming year with the implementation of a tracking system. This quarterly report includes Highlights of Departmental performance through June 2006 in **Attachment G**.

### FY 07 General Fund Outlook

On August 14, the Mayor released the City Manager's FY 07 Proposed Budget to the City Council. The FY 07 Proposed Budget reflects the elimination of the structural deficit. As was anticipated two years ago by staff, the passage of State Proposition 1A has prevented the State from usurping local revenues and in turn has made prediction of City funding more certain. Staff is confident that the local economy will continue its solid growth, and that key City revenues will also remain strong. Future commitments made by the City relative to labor contracts, particularly for Police, could create a new structural deficit if current spending is not moderated and available resources saved for these future liabilities.

HONORABLE MAYOR AND CITY COUNCIL September 19, 2006 Page 7

### Conclusion

Despite the positive year-to-date performance and estimates-to-close, there is reason to maintain a firm position of fiscal restraint. We must be ever mindful of the tenuous nature of General Fund revenue sources, the current-year budgetary reliance upon one-time revenue from planned land sales and some of the current year planned savings from optimization studies will likely not be realized until next fiscal year. Also, the judicious use of additional one-time resources earned this fiscal year must be allocated toward the City's highest priority one-time uses (e.g. capital projects, pay-down existing debt or other non-recurring needs). Looking to the future, we must not lose sight of the fact that the new Police Officers Association labor agreement includes a wage adjustment to median of the ten comparable police agencies in September 2009; the actual amount of that wage increase will not be known until that time but is anticipated to be a substantial double-digit increase to General Fund costs that is anticipated to absorb most, if not all, of the projected net structural revenue growth.

### TIMING CONSIDERATIONS

City Council action on this matter is not time critical.

### FISCAL IMPACT

There is no fiscal impact associated with the recommended action.

SUGGESTED ACTION:

Approve recommendation.

Respectfully submitted,

MICHAEL A. KILLEBREW

<sup>&</sup>lt;sup>1</sup> The County distributes property tax in multiple installments, five of these distributions occurred in December, January, February, April and May. <sup>2</sup> The second half of the Property Tax In-Lieu payment posted in May, total receipts exceeding original budget projections. <sup>3</sup> Collections for Parking Citations are trending above budget due to fully staffed enforcement positions. <sup>4</sup> Low to date revenues are attributable to late billings. <sup>5</sup> Overall collections are higher due to natural gas price increase. <sup>6</sup> Vehicle Code Fine revenue is low primarily due to the timing of cash receipts, the year-to-date does not reflect up to two months of fines from the Los Angeles and Long Beach courts. <sup>7</sup> Low revenues to date are due to low year-to-date capital project billings. <sup>8</sup> These Special Services will be performed by Public Works at a later point in the fiscal year. <sup>9</sup> The County's delinquent property tax collections from prior years are well above projections. <sup>10</sup> Collections are trending below FY 05 during the same period due to the slowing of the real estate market. <sup>11</sup> Collections are trending below budget due to lower equipment purchases and equipment depreciation. <sup>12</sup> Although percent of budget is low, this revenue source is tracking higher than last year.

| TOTAL                                  | \$ 358,238,805          | \$ 1,696,744 | \$ 359,935,549     | \$ 289,720,072          | \$ 371,686,878 | 103.3% | \$ 70,215,478 | 80.5%      |

<sup>&</sup>lt;sup>1</sup> Amendments reflect budget adjustments approved by the City Council during the fiscal year.

<sup>&</sup>lt;sup>2</sup> The City Clerk will receive a refund from Long Beach City College and the Long Beach Unified School District for expenses related to the June election.

<sup>&</sup>lt;sup>3</sup> The \$1 million in budgeted revenue for marketing and advertising will not be actualized in FY 06. The selected marketing firm was recently approved by the City Council. Expected revenues from parking, the County, and transfers will not be realized until the second half of the fiscal year.

<sup>&</sup>lt;sup>4</sup> Includes Parking Citation revenues that will be distributed to client departments as the year progresses.

<sup>&</sup>lt;sup>5</sup> Citywide Activities include tax revenues and pass through transactions.

<sup>&</sup>lt;sup>6</sup> Animal Control contracts with other jurisdictions are billed to close out the end of the year (e.g., Seal Beach, Los Alamitos and Cerritos).

<sup>&</sup>lt;sup>7</sup> Currently a program is funded with an expense and a matching revenue for \$160,000. This program has not been implemented yet, therefore the department is not recognizing the revenue or the matching expense.

<sup>&</sup>lt;sup>8</sup> Planning and Building revenue reflects continued strong demand for fee-based building, electrical, zoning, plumbing, and NPDES plan checks.

<sup>&</sup>lt;sup>9</sup> Police will see a significant increase in parking citation revenues this fiscal year.

<sup>&</sup>lt;sup>1</sup> Amendments reflect budget adjustments approved by the City Council during the fiscal year including prior-year encumbrances.

<sup>&</sup>lt;sup>2</sup> Expenses related to compliance with the Voting Rights Act (Section 203 VRA), and Dept. of Justice Requirements for minority languages for 2006 Election. A budget adjustment may be needed and will be delivered after all elections costs are tallied and prior to fiscal year-end.

<sup>&</sup>lt;sup>3</sup> Several Community Development contracts will not commence until the second half of the fiscal year. Code Enforcement rent payments will begin in the third quarter.

<sup>&</sup>lt;sup>4</sup> Citywide Activities include debt service payments, as well as interdepartmental transfers made at the beginning of the fiscal year, including transfers to the Capital Improvement Fund for sidewalk repairs and Parks and Recreation capital projects. Adjusted Budget reflects anticipated savings from employee healthcare benefit optimization, additional contracting opportunities, and a reduction in management.

<sup>&</sup>lt;sup>5</sup> The Department of Planning and Building has experienced unanticipated costs related to a project approved by City Council in January of 2005. Due to these costs, the Department is currently estimating to end the year over appropriation by approximately \$365,000. The Department will submit a Fourth Quarter Budget Adjustment to City Council to increase their current allocation along with a matching revenue to cover the unexpected overages.

<sup>&</sup>lt;sup>1</sup> The increase in budget for this fiscal year is due to Community Development taking responsibility for the Parking Operations from Technology Services.

<sup>&</sup>lt;sup>2</sup> The decrease in FY 06 reflects the transfer of the utility call center budget from the General Fund to the Gas Fund.

<sup>&</sup>lt;sup>3</sup> Citywide Activities include debt service payments, as well as interdepartmental transfers made at the beginning of the fiscal year, including transfers to the Capital Improvement Fund for sidewalk repairs and Parks and Recreation capital projects. Adjusted Budget reflects anticipated savings from employee healthcare benefit optimization, additional contracting opportunities, and a reduction in management.

<sup>&</sup>lt;sup>4</sup> The decrease in FY 06 reflects the transfer of Tidelands-related budgets, and their corresponding revenues, from the General Fund to the Tidelands Fund.

<sup>&</sup>lt;sup>5</sup> Higher expenditure transfers for Prop 172 related expenses from General Fund to General Grants Fund are anticipated for FY 06.

<sup>&</sup>lt;sup>6</sup> Reduction in FY 06 reflects removal of Gas Tax pass-through from General Fund.

Notes:

\*Estimates to close are continuously being updated. Funds without all-years carryover currently reflecting estimates-to-close exceeding budget will either have a pending budget adjustment or spending will be curtailed to bring expenditures within budget by year-end.

All-Years Carryover is composed of multi-year grants and Capital Improvement Program (CIP) funds; unspent amounts are carried over to future years.

Amendments reflect budget adjustments approved by the City Council during the fiscal year including All-Years Carryover Budget Adjustments approved in May 2006.

All years funds will not be expended this fiscal year.

Payment to the State estimated to total \$155.9 million as a result of high oil prices.

<sup>&</sup>lt;sup>5</sup> The 2nd of two annual loans of interest from the Subsidence Reserve Fund to the General Fund used to mitigate impact of the State's property tax shift was booked earlier this fiscal year. Adjusted Budget does not reflect 3rd Quarter Budget Adjustment for additional transfer to GP.

<sup>&</sup>lt;sup>6</sup> The Redevelopment Agency is currently estimated to end the year almost 10 percent over budget. The agency is incurring expense during the fiscal year that was originally appropriated in FY 05.

employment opportunities, products and services to a varied customer base. Winter months are usually slower in terms of demand for services, which speaks to development, marketing, technical assistance, access to capital, incentives and business improvement districts. Business services and assistance are critical to retaining businesses in the City. Financing, business workshop attendance, site assistance and incentives allow Long Beach businesses the opportunity to provide the rise in service level between Quarters 2 and 3. The first measure captures the total number of businesses using any of the services offered at the Business Development Center, including assistance with project

carried out by the Department. Acquisition levels are based on development demands. April acquisitions were for Redevelopment Agency (RDA) projects (North Village, Atlantic Avenue III, Menorah) and open space for a neighborhood park. The May acquisition was for a RDA project (North Village). June acquisitions were for the North Village Project, Orizaba Park Expansion and Cal Rec Center Expansion. The second measure captures the number of parcels of land acquired by Community Development. These acquisitions support development and housing projects

estimated based upon overall services levels during 2004. Fluctuations in service levels can be attributed to changes in unemployment rates, mass layoffs, and Transportation/Logistics) have created additional demand. Extraordinarily high service levels in May can be attributed to seasonal employment trends and the targeted recruitments. In addition, the Workforce Development Bureau's targeted industry initiatives (Construction Jobs Initiative, Health Care Collaborative, and The aduit employment services measure is based upon distinct monthly cases in which an individual may be receiving several instances of assistance. Targets are number of working days.

quarter includes youth visiting the Resource Center, enrolling in WIA Youth Development Program, participating in Work Readiness Workshops for the Summer Opportunities Fair, successfully completing the Spring Semester Inspired Internship program, participating in employment preparation or enrolling in the Summer The results of the youth measure represent a total count of each instance in which a youth accesses Community Development youth services. Reporting for this Inspired Internship program. Fluctuations can be attributed to program service schedules, school schedules and seasonal changes

the fire to the room of origin.

scene, the quicker the containment of the fire will be and limits the damage. In addition, the more skillful the responders are in combating a fire will also contain The measure of the percentage of structure fires confined to the room of origin indicates the effectiveness of the responders. The quicker the response to the fire

City, the lower the percentage of on-scene arrival. This results from circumstances where the closest responders are likely to already be on a scene so that a units arriving within 6 minutes or less. In addition, as the number of dispatched responders increases due to the increased number of emergencies occurring in the at the scene. The measure is also directly correlated with the number of available units; the more units that are available to respond, the higher the percentage of First Responders. A lower percentage for this measure may indicate that the responders are traveling farther distances or going through congested areas to arrive The measure of the on-scene arrival of the first appropriate unit for all emergency calls within six minutes or less is a direct measure of the response capability of secondary unit from a farther station will have to be dispatched to the emergency. The on-scene arrival time of Basic Life Support (BLS) units can also be affected

For many members of the community (residents, visitors and businesses) their first point of contact with the Fire Department is through making an emergency or 911 call requesting assistance. The City's performance target is to answer, triage, and dispatch support to the incident within 60 seconds. As the volume of emergency calls increases, this may negatively affect (lower) the percentage of calls processed within 60 seconds.

by an increased workload.

All of these measures demonstrate the ability of the department to respond to the community utilizing the current available resources. Population increases will result in a greater demand for services from the Fire Department as well as creating a more congested (traffic) environment in which responders need to travel. An increase in response times can affect the ability to contain fires to room of origin and providing other emergency assistance.

## Results Narrative

The Department of Public Works has been responsive to requests for service to the extent that the necessary resources are available

being done at the mobile mechanic sites. This report has been adjusted to reflect the January change. Fleet Services has aggressively focused resources on preventive maintenance services throughout the spring and summer months to prevent otherwise avoidable equipment failures The method for capturing number of preventive maintenance services completed was adjusted in January 2006 to more accurately reflect the work

will incorporate the tools needed to proactively address more of these dumping issues. meet the annual target. With continued implementation, through FY 2006, of the Clean Long Beach Program, the Environmental Services Bureau Pick-up of illegally dumped items reported to and collected by Public Works, with an average of 225 completed responses per month, is on pace to

incident responses and the increase in community festivals requiring traffic control. which cannot be predicted or controlled. The dramatic increase reflected in the third quarter can be attributed to both a heightened awareness of Emergency Response Crews are dispatched upon request from Police or Fire to deliver and maintain traffic and crowd control devices, portable lighting and other public safety field support. The number of incident responses is based on public safety demand and severe weather conditions,

Reported graffiti sites have experienced steep increases as weather conditions improved and the school summer vacation period began. Graffiti work crews continue to outpace their targeted work performance, however, the leveling of sites remediated in the face of increased demand is reflective of the exhaustion of current resource levels

installed. The target is based on FY 05 actual performance and the FY 06 target is higher than it should be. First quarter results include a major facility move and do not reflect ongoing productivity. The target will be re-evaluated and adjusted for FY 07. The number of voice and data network installations completed reflects the number of new or replaced telephone or network devices and equipment
