#### FIRST AMENDMENT TO CONTRACT NO. 35090

35090 Extension of Contract No. 35090 (ITB-LB18-119) for furnishing & delivering Hazardous Waste RE: Removal Services for the City of Long Beach (3190000009, formerly BPLB19000009)

This Amendment to Contract No. 35090 is made and entered as of October 27, 2020, by and between the CITY OF LONG BEACH, a municipal corporation, and Ocean Blue Environmental Services (Contractor)

Contract No. 35090 is amended by mutual agreement of the parties and as indicated below by a check or other mark preceding the appropriate amendment:

	• 11 · · · · · · · · · · · · · · · · · ·
X	1. First Renewal option extending the term to November 11, 2021.
_X_	2. Adding \$1,264,000 with a 10% contingency in the amount of \$126,400 for a new amount not to exceed \$3,918,400.
	3. Prices during this period shall remain firm.
<u>X</u>	4. The price for certain items shall be increased as shown on Exhibit "A", which is attached hereto and incorporated herein by this reference.
	5. The price for certain items shall be decreased as shown on Exhibit "A", which is attached hereto and incorporated herein by this reference.
	6. The discount offered to the City is increased by %
	7. The items or locations identified on Exhibit "B", which is attached hereto and incorporated herein by this reference, are hereby deleted from the Contract.
	8. The items or locations identified on Exhibit "B", which is attached hereto and incorporated herein by this reference, are hereby added to the Contract.
<u>X</u>	9. Current permits, licenses, insurance and other required information are attached as Addendum No. 1.

Except as expressly amended above, all terms and conditions in this Contract are ratified and confirmed and remain in full force and effect. Executed with all formalities required by law as of the date first stated above.

### NEWS RELEASE BUREAU OF LABOR STATISTICS U. S. DEPARTMENT OF LABOR

For Release: Tuesday, October 13, 2020

20-1935-SAN

'20

WESTERN INFORMATION OFFICE: San Francisco, Calif.

Technical information: (415) 625-2270 BLSinfoSF@bls.gov www.bls.gov/regions/west

Media contact:

(415) 625-2270

#### Consumer Price Index, Los Angeles area – September 2020 Area prices were down 0.3 percent over the past month, up 1.2 percent from a year ago

Prices in the Los Angeles area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), decreased 0.3 percent in September, the U.S. Bureau of Labor Statistics reported today. (See table A.) Assistant Commissioner for Regional Operations Richard Holden noted that the September decrease was influenced by lower prices for shelter and new and used motor vehicles. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect seasonal influences.)

Over the last 12 months, the CPI-U rose 1.2 percent. (See chart 1 and table A.) The index for all items less food and energy increased 1.4 percent over the year. Food prices rose 4.2 percent. Energy prices declined 7.3 percent, largely the result of a decrease in the price of gasoline. (See table 1.)

Chart 1. Over-the-year percent change in CPI-U, Los Angeles-Long Beach-Anaheim, CA, September 2017–September 2020

Source: U.S. Bureau of Labor Statistics.

#### **Food**

'17

Food prices were unchanged for the month of September. (See table 1.) Prices for food at home decreased 0.7 percent, led by lower prices for meats, poultry, fish and eggs (-2.3 percent). Prices for food away from home advanced 0.6 percent for the same period.

'19

'18

Over the year, food prices rose 4.2 percent. Prices for food at home increased 3.2 percent, influenced by higher prices for meats, poultry, fish, and eggs (5.2 percent). Prices for food away from home advanced 5.1 percent since a year ago.

#### **Energy**

The energy index rose 0.4 percent over the month. The increase was mainly due to higher prices for gasoline (0.8 percent). Prices for electricity edged down 0.1 percent, while natural gas service prices were unchanged for the same period.

Energy prices declined 7.3 percent over the year, largely due to lower prices for gasoline (-15.7 percent). Prices paid for natural gas service jumped 14.2 percent, and prices for electricity rose 6.2 percent during the past year.

#### All items less food and energy

The index for all items less food and energy decreased 0.4 percent in September. Lower prices for new and used motor vehicles (-1.8 percent) and shelter (-0.3 percent) were partially offset by higher prices for apparel (3.5 percent) and medical care (0.3 percent).

Over the year, the index for all items less food and energy increased 1.4 percent. Components contributing to the increase included medical care (6.1 percent) and shelter (2.3 percent). Partly offsetting the increases were price decreases in new and used motor vehicles (-3.0) and household furnishings and operations (-2.9 percent).

The October 2020 Consumer Price Index for the Los Angeles area is scheduled to be released on November 12, 2020.

#### Coronavirus (COVID-19) Pandemic Impact on September 2020 Consumer Price Index Data

Data collection by personal visit for the Consumer Price Index (CPI) program has been suspended since March 16, 2020. When possible, data normally collected by personal visit were collected either online or by phone. Additionally, data collection in September was affected by the temporary closing or limited operations of certain types of establishments. These factors resulted in an increase in the number of prices considered temporarily unavailable and imputed.

While the CPI program attempted to collect as much data as possible, many indexes are based on smaller amounts of collected prices than usual, and a small number of indexes that are normally published were not published this month. Additional information is available at <a href="https://www.bls.gov/covid19/effects-of-covid-19-pandemic-on-consumer-price-index.htm">https://www.bls.gov/covid19/effects-of-covid-19-pandemic-on-consumer-price-index.htm</a>.

#### **Technical Note**

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 29 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 5,000 housing units and approximately 22,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/homch17\_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater

volatility than the national index, although their long-term trends are quite similar. NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.

The Los Angeles-Long Beach-Anaheim. metropolitan area covered in this release is comprised of Los Angeles and Orange Counties in the State of California.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

#### Footnotes

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>(1)</sup> Indexes on a December 1977=100 base.

<sup>(2)</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>(3)</sup> Indexes on a December 1982=100 base.

<sup>(4)</sup> Special index based on a substantially smaller sample.

<sup>(5)</sup> Indexes on a December 1993=100 base.

<sup>(6)</sup> Indexes on a December 1997=100 base.
