Owner may inspect documentation supporting the roof inspection, preventive maintenance, general housekeeping, and/or any other services or repairs performed by DEERS or its subcontractors. However, unless documented to the satisfaction of the Owner, such nonperformance shall be cause for termination of this Agreement without penalty to the Owner.

The above building Owner agrees to the following warranty as part of its purchase of the Republic Single-Ply System (hereinafter "RSPS") defined above and understands and agrees that the liability of Republic Powdered Metals Inc. (hereinafter "Republic") relating to the RSPS and the installation thereof shall be limited to the obligation to address warranty concerns as set forth herein.

DEFINITION: The RSPS shall mean all product components and accessory materials manufactured and/or supplied by Republic.

THE REPUBLIC WARRANTY

Republic hereby warrants to the above-named Owner that the RSPS, when applied over conventional roof surfaces which are in sound condition and according to Republic specifications, will remain free from leaks during the term of the warranty described above. Should such leaks occur in any area of the RSPS during the warranty period, Republic warrants that it will furnish, no-charge, sufficient material and labor to correct the affected area(s). This warranty becomes effective upon final inspection and approval of the RSPS by Republic; when Republic has been paid in full for all materials, warranties, supplies and services it has furnished in connection with the RSPS; and when the warranty has been signed by authorized Republic personnel.

A. OWNER'S RESPONSIBILITIES

It is agreed by the parties that Republic, by this warranty, does not assume possession or control of any part of the RSPS. Control and ownership of the RSPS and all parts of the building remains solely with the Owner. The Owner is solely responsible for all requirements imposed by any federal, state or local law, ordinance or regulation, and all repair, maintenance, and other work with respect to the RSPS and the building, except as expressly stated herein this warranty.

The Owner shall, at all times, exercise reasonable care in the use and maintenance of the RSPS in accordance with standard good roofing practice and as outlined in the attached REPUBLIC CARE AND MAINTENANCE GUIDE. If the leak is not within the warranty coverage, Republic shall advise the Owner, and the Owner shall have the necessary repairs performed within thirty (30) days according to Republic specifications by a Republic registered or approved applicator. The Owner agrees to provide Republic with unrestricted ready access to the RSPS and all areas of the building on which the RSPS is located.

PLEASE BE AWARE THAT THE BUILDING OWNER'S FAILURE TO FULFILL ANY OF THE RESPONSIBILITIES ENUMERATED ABOVE SHALL RESULT IN AUTOMATIC AND EFFECTIVE CANCELLATION OF THIS WARRANTY AND SHALL RELEASE AND DISCHARGE REPUBLIC FROM ANY FURTHER OBLIGATION UNDER THIS WARRANTY.

B. WARRANTY EXCLUSIONS

This warranty does not cover any leaks, damage or failure of the RSPS or any part thereof as a result of:

1. Natural or accidental disasters including, but not limited to, damage caused by lightning, hailstorms, floods, hurricane force winds, tornadoes, earthquakes, fire, vandalism, animals, penetration of the membrane, or chemical attack by outside agents.

OR ANY AFFILIATE SHALL BE LIABLE FOR ANY DAMAGES WHICH ARE BASED UPON NEGLIGENCE, BREACH OF WARRANTY, STRICT LIABILITY OR ANY OTHER THEORY OF LIABILITY OTHER THAN THE EXCLUSIVE LIABILITY SET FORTH IN THIS WARRANTY.

The Owner agrees that this warranty, and the services and remedies set forth herein, are exclusive, and there are no other warranties between the Owner and Republic or any affiliate. Roof System Care and Maintenance Guide

Congratulations on your recent purchase of a Republic Roofing System (coatings and single ply). In order to maximize your investment and to obtain the full benefit of your new roofing system, it is important that you, as the building owner, understand your obligation under the Republic System Warranty. Reasonable care and maintenance are the responsibility of the building owner and a requirement of the warranty.

Warranty Obligations of Building Owner

The Republic System Warranty is a contract between Republic and the building owner, which requires the building owner to perform reasonable care and maintenance of the Republic System, as described below. Please be aware that the warranty is expressly conditioned upon the building owner's performance of these repair and maintenance procedures, and the building owner's failure to fulfill this obligation may result in cancellation of the warranty.

Although these reasonable care and maintenance procedures can be performed by the building owner's own maintenance personnel, our experience demonstrates that these procedures should be performed by a qualified, independent roofing contractor or other agency trained in good roofing practices and skilled in roofing systems, acting on behalf of the building owner.

Regardless of whether the building owner performs the reasonable care and maintenance procedures, or utilizes the services of an independent roofing contractor or outside agency, it is imperative that these procedures be performed on an on-going basis in order to maximize the value of your investment and to ensure the continued viability of the Republic System Warranty. Accordingly, please familiarize yourself with the reasonable care, maintenance and repair procedures outlined below.

Reasonable Care and Maintenance

A. Reasonable Care. Reasonable care refers to the routine tasks that must be performed on a regular, custodial basis to ensure that the roofing system functions properly and remains clean and free of debris and outside effluents. In addition to fulfilling your building owner requirements under the terms of the warranty, reasonable care will help prevent causes of roof leaks, covered and not covered under the warranty.

1. Inspect your roof on a regular, on-going and as-needed basis. During these inspections, as an essential component in preventing damage to the Republic System, the building owner should: (a) ensure that the roof drains freely; (b) clear the entire roof and all drains of debris; (c) remove any sharp objects which may puncture or tear the membrane (e.g., nails, screws, tools, etc.).
2. Ensure the roofing system is not exposed to outside effluents (i.e. solvents, greases, oils, petroleum products and other deposits,) which could have adverse effects on the Republic System. Such substances should be removed from the membrane by cleaning with a solution of mild detergent (laundry or dish washing soap) and water, or other appropriate means.
3. Provide advance written notification to Republic of any alterations, additions, core samples, construction or repairs on or to the Republic System not effected by Republic. Additionally, new equipment (e.g., HVAC units, antennas, drains, etc.) or building additions requiring a tie-in to the existing Republic System needs to be reported to Republic prior to installation. All such alterations, additions, core samples, construction and/or repairs must be made or installed in accordance with Republic specifications, in a manner compatible with the Republic System, or your warranty may be voided.
4. Provide immediate written notification to Republic of any major changes of building use.

B. Maintenance. Although reasonable care may be performed with a minimum time investment on a regular basis, maintenance includes a thorough roof system inspection by an individual trained in good roofing practices and skilled in roofing systems. If you do not have personnel with such expertise, we strongly recommend that you contact a qualified, independent roofing contractor or outside agency to perform these services on your behalf.

Maintenance inspections should be performed on a semi-annual basis--in spring and fall. Additional inspections should be made after unusually severe weather conditions. In addition to those items listed under Reasonable Care, a maintenance inspection should include, but not necessarily be limited to:

1. Careful examination of the entire membrane system to ensure there are no openings in the membrane which would permit water infiltration.
2. Verification that all counter flashing, metal work, drains, equipment curb and supports, caulking and any other rooftop accessories in conjunction with the Republic System are functioning and properly maintained.
3. Verification that all water drains from the roof in accordance with the National Roofing Contractors Association's definition of positive drainage, "complete drainage of the roof area within 48 hours of rainfall precipitation." Progressive deck deflection over the years can reduce positive roof drainage. If your roof holds excessive amounts of water, we recommend the lowering and/or addition of new drainage.
4. Verification that all condensate from air conditioning units is piped to the drain.
5. Inspection of areas that will be exposed to foot traffic, specifically around equipment which is maintained, should have protective walkways installed.

Repair Procedures

Building owners who fulfill their responsibility of reasonable care and maintenance will enhance the long-term performance of a properly installed Republic System. Should you encounter a leak, however, please refer to the following guidelines.

1. If necessary, make emergency temporary repairs in a manner compatible with the Republic System.
2. The Republic System Warranty obligates you to notify Republic immediately in the event you discover a leak and confirm such notification in writing within seven (7) days after such discovery. Leak complaints should be immediately reported by telephone to Republic's Technical Service Department at **1-800-551-7081**, or by fax to **1-800-382-1218**.
3. Upon receipt of a leak complaint, Republic (or others as retained by Republic) will investigate the leak complaint in order to determine whether it is covered under the terms of the warranty. Leaks covered by the warranty will be repaired in accordance with the terms and conditions of the applicable Republic System Warranty.
4. The warranty does not provide for the investigation of repair of leaks not attributable to the performance of the Republic System or not covered under the terms of the warranty. The source of the leak can often be traced to mechanical damage to the membrane, a broken skylight, or other problems which would not be Republic's responsibility to correct under the terms of the warranty. If it is determined upon inspection by Republic that a leak is not covered by the Republic System Warranty, you will be invoiced up to \$750.00 for investigation and/or repair services rendered, and notified of any additional actions necessary on your part to maintain warranty coverage.
5. As the Building owner you are responsible for immediately repairing any non-warranted leak to prevent damage to underlying components of the roofing system. Your Republic registered contractor can assist you in correcting such leaks at your own expense. You must also notify Republic immediately upon the completion of non-warranted leak repairs. Please note that employing a Republic register contractor to repair the leak does not constitute notification to Republic.

The SYSTEM complies with all attributes of the Southern California Edison ("SCE") Self-Generation Incentive Program as well as utilizes components that are listed on the California Energy Commission's list eligible equipment.

The Photovoltaic system modules are manufactured by United Solar Ovonic. The SYSTEM components are specified by Uni-Solar to maximize efficiency and power production performance. It will comprise of Uni-Solar Triple Junction 136 Watt Laminates (model# PVL-136) and will be applied to the membrane. The DC output will be converted to AC and interconnected to run in parallel with SCE. SatCon inverters will be used as a part of the PV SYSTEM.

The installation and commissioning of the SYSTEM will be completed within the time constraints allowable by the SCE Self-Generation Incentive Program.

SYSTEM OWNER will supply all necessary drawings, layouts, product data sheets, etc. to comply with all permitting and SCE Self-Generation Incentive Program requirements.

EXHIBIT "B" – RATES AND BILLING SYSTEM

Each year beginning at the commencement date and ending 20 years thereafter or upon earlier termination as provided in the Agreement, THE CITY shall pay for the amount of kWh produced by the SYSTEM. The rate at which THE CITY shall pay SYSTEM OWNER will be calculated on an annual basis and shall be the greater of \$.0765 per kWh (increasing annually at a 3% inflation rate) or the kWh rate as calculated by multiplying THE CITY's actual avoided electrical expense as a result of the operation of the SYSTEM by 90%. The actual avoided electrical expense shall be the total amount of avoided billing / charges from SCE as a result of the installation of the SYSTEM.

The annual anticipated kWh production of the SYSTEM is 1,082,538.00 kWh. SYSTEM OWNER will invoice THE CITY monthly in the amount equal to $(\$0.0765 \times 1,082,538.00 / 12)$ \$6,901.37. THE CITY shall make payments on a monthly basis and payments will commence thirty (30) days after successful completion of the scope of work and acceptance of the project by THE CITY (see Exhibit "E"). THE CITY shall be obligated to pay SYSTEM OWNER the monthly amount. At the end of each year of the Term of the Agreement, SYSTEM OWNER shall furnish to THE CITY a Reconciliation Report for the previous Term year. SYSTEM OWNER shall refund to THE CITY any overcharged amounts or invoice THE CITY for undercharged amounts based upon the difference between the sum of the monthly payments (\$82,816.45) and the actual amount due SYSTEM OWNER for that Term year.

Examples:

1. SYSTEM produces 1,082,538.00 kWh in Year 1, 90% of the actual avoided electrical expense is less than \$.0765 per kWh, THE CITY has paid monthly invoices in full. Amount due to THE CITY is \$0.00. Amount due to SYSTEM OWNER is \$0.00.
2. SYSTEM produces 982,538.00 kWh in Year 1, 90% of the actual avoided electrical expense is less than \$.0765 per kWh, THE CITY has paid monthly invoices in full. Amount due to THE CITY at year end in the form of a refund is \$7,650.00.
3. SYSTEM produces 1,182,538.00 kWh in Year 1, 90% of the actual avoided electrical expense is less than \$.0765 per kWh, THE CITY has paid monthly invoices in full. Amount due to SYSTEM OWNER at year end is \$7,650.00.
4. If the actual avoided electrical expense for Year 1 is \$100,000.00 based on 1,000,000 kWh actually produced or \$.10 per kWh, THE CITY shall pay SYSTEM OWNER at the greater of 90% of the avoided electrical expense = \$90,000.00 $(\$0.10 \text{ per kWh} \times 90\% = \$0.09 \text{ per kWh} \times 1,000,000 \text{ kWh})$ and \$76,500.00 $(\$0.0765 \text{ per kWh} \times 1,000,000 \text{ kWh})$. Amount due to SYSTEM OWNER at year end would be equal to $(\$90,000.00 \text{ less } \$82,816.45)$ \$7,183.00.
