The service charges in this Section shall only include water used for fire extinguishing purposes and a reasonable amount of water used for testing the fire line.

B. Whenever the Public Utilities Department finds that water through a private fire protection service is being used for purposes other than fire extinguishing or testing the fire line, the General Manager may make a determination of the quantity of water used, the quantitative charges for that water, and the service charges to be applied. The General Manager's determination shall be final. In addition, if water through a private fire protection service is used for purposes other than fire extinguishing or testing the fire line, the Public Utilities Department may discontinue the private fire protection service or may install a domestic or fire flow meter, at either the customer's or its expense as the General Manager may determine, and thereafter the service shall be classified as regular service and billed at the rates applicable thereto.

Section 8. The primary purpose of fire hydrants is extinguishing fires and they shall be opened and used only by the Public Utilities Department or the Long Beach Fire Department, or such other persons as may be authorized to do so by the General Manager or the Chief of the Fire Department. Where fire hydrants are installed and maintained by the Public Utilities Department, there shall be no standby charge made to the Fire Department.

Section 9.

A. For all sewer service where the sewer lateral connects to a main line maintained by the Public Utilities Department, or the sewer lateral is located in the public right-of-way, the charge for sewer service shall consist

1 of both a daily sewer rate and a volumetric sewer rate.

2 B. The daily sewer rate shall be in accordance with the following  
3 table:

4 <u>Size of Service</u>	<u>Daily Sewer Rate</u>
5 5/8 or 3/4 inch	\$0.248
6 1 inch	\$0.366
7 1-1/2 inch	\$0.961
8 2 inch	\$1.658
9 3 inch	\$3.862
10 4 inch	\$5.587
11 6 inch	\$15.565
12 8 inch	\$16.499
13 10 inch	\$25.540
14 12 inch	\$32.212
15 16 inch	\$47.376

16  
17 C. The volumetric sewer rate shall be \$0.393 per 100 cubic feet of  
18 water furnished where water service size is 5/8 inches or larger. The  
19 volumetric sewer rate shall not be applicable to fire services.

20 Industrial customers may apply for separately metered sewer  
21 discharge in accordance with the "Rules, Regulations and Charges  
22 Governing Potable Water, Reclaimed Water, Sewer Service, and the Water  
23 Shortage Contingency Plan" of the Public Utilities Department.

24 D. For volumetric sewer rates, there are the following customer  
25 classifications: single family residential; duplex residential; multi-family  
26 residential; City Departments; commercial; and industrial.

27 Volumetric sewer rates for single family residential, duplex  
28 residential and multi-family residential shall be computed based on the

1 average of actual potable water use during the winter billing periods. The  
2 winter billing periods used will be determined by the meter reading schedule  
3 for the account. The actual winter usage is divided by the number of winter  
4 days to obtain an average volume. The average volume will be the base  
5 volume on which the volumetric sewer rate is charged for the next twelve-  
6 month period beginning with May's billing periods. Each year, the average  
7 volume will be recalculated for the succeeding twelve-month period.  
8 Exceptions to the above calculation methodology will use the average volume  
9 for the water service size in which the customer falls as the average volume  
10 or a calculation using available usage information for the account. For those  
11 residential customers with no previous history of use during the winter billing  
12 periods, the average volume for the water service size in which the customer  
13 falls will be used.

14 E. For all users of the sewer system that do not receive a water  
15 bill from the City but where the user's sewer lateral connects to a main line  
16 maintained by the Public Utilities Department, or where the sewer lateral is  
17 located in the public right-of-way, the charge for sewer service shall consist  
18 of both a daily sewer rate and a volumetric sewer rate. The daily sewer rate  
19 shall be as provided in Subsection 8(B) of this Resolution. For these  
20 customers, the volumetric sewer rate shall be based on the average volume  
21 for the customer's water service size.

22 F. The City shall collect from all developments and all  
23 developments shall be required to pay a capacity charge of One Hundred  
24 and Twenty-One Dollars and Thirty-Nine Cents (\$121.39) per equivalent  
25 fixture unit at the time application for sewer service is made, but in no event  
26 later than the time that the City issues a sewer permit for connection to the  
27 City sewage system, as set forth in the Long Beach Municipal Code and the  
28 "Rules, Regulations and Charges Governing Potable Water, Reclaimed

1 Water, Sewer Service and the Water Shortage Contingency Plan” of the  
2 Public Utilities Department.

3 G. Upon receipt of an application for sewer service, the City’s  
4 Department of Development Services (through the Plan Checker for  
5 Plumbing) shall calculate the amount of the capacity charge by: 1)  
6 determining if this resolution applies to the development; and 2) if this  
7 resolution does not apply, indicating same on the application for sewer  
8 service and the reason this resolution does not apply, and processing the  
9 application in accordance with ordinances, resolutions, and regulations; or 3)  
10 if this resolution does apply, determining the number of equivalent fixture  
11 units in the development and multiplying that number by the capacity charge  
12 per equivalent fixture unit.

13 H. The sewer capacity charge shall be subject to annual  
14 adjustment, effective October 1 of each year, to reflect the increase of the  
15 Construction Cost Index (“CCI”) for Los Angeles as published in the  
16 “Engineering News-Record”. The increase shall be calculated each  
17 September by dividing the CCI published in August of the current calendar  
18 year by the CCI published in August of the preceding calendar year; that  
19 figure multiplied by the sewer capacity charge in effect in October shall be  
20 the new sewer capacity charge. No adjustment shall be made to reflect a  
21 decrease in the CCI.

22 I. Funds derived from capacity charges shall be placed in the  
23 Sewer Fund and shall be used only for the operation, construction,  
24 reconstruction, acquisition, or maintenance of the City sewage system.

25 J. Anyone who has paid a capacity charge may apply for a full or  
26 partial refund if within one year after payment: 1) the applicant has not been  
27 permitted to connect to the City sewage system; or 2) the development on  
28 which the capacity charge was calculated has been modified pursuant to

1 applicable City ordinances, resolutions, or regulations, resulting from a  
2 reduction in the number of equivalent fixture units. Refund applications shall  
3 be made on forms provided by the City and shall contain a declaration under  
4 oath of those facts, along with relevant documentary evidence, which qualify  
5 the applicant for the refund. In no event shall a refund exceed ninety percent  
6 (90%) of the amount of the capacity charge actually paid.

7 K. Anyone subject to a capacity charge who constructs, deposits  
8 money into escrow with the City for the construction of, participates in an  
9 assessment district for the construction of, or otherwise contributes money or  
10 improvements to the City for the operation, construction, reconstruction,  
11 acquisition, or maintenance of the City sewage system shall be eligible for a  
12 credit for such contribution against the capacity charge otherwise due. The  
13 amount of the credit shall be the value of the contribution as determined by  
14 the City provided, however, that the credit shall not exceed ninety percent  
15 (90%) of the amount of the capacity charge. Applications for said credit shall  
16 be made on forms provided by the City and shall be submitted at or before  
17 the time of application for sewer service. The application shall contain a  
18 declaration under oath of those facts, along with relevant documentary  
19 evidence, which qualify the applicant for the credit.

20 L. The capacity charge and requirements pertaining thereto shall  
21 not affect in any way the permissible use of property, density of development,  
22 design and improvement standards, public improvement requirements, or  
23 any other aspect of the development of land or construction of buildings  
24 which may be imposed by the City pursuant to the Long Beach Municipal  
25 Code, Subdivision Regulations, or other state or local laws, ordinances or  
26 regulations which shall be in effect with respect to all developments.

27 M. The capacity charge is a charge on development that reflects a  
28 development's proportionate share of the present depreciated value of the

1 existing City sewage system. As such the capacity charge is additional to  
2 and not in substitution of the following: 1) on-site sewer facility requirements  
3 imposed by the City pursuant to the Long Beach Municipal Code, Subdivision  
4 Regulations, and other state or local laws, ordinances or regulations; 2)  
5 sewer permit fees; 3) connection charges; 4) sewer rates; and 5) other fees,  
6 rates, and charges including but not limited to sewer standby or immediate  
7 availability charges and capital facilities charges for services or facilities other  
8 than as a proportionate share of the present depreciated value of the existing  
9 City sewer system. In no event shall an applicant for sewer service be  
10 obligated to pay fees, rates, or charges in excess of those calculated  
11 pursuant to applicable City ordinances, which shall not individually or  
12 collectively exceed the reasonable cost of providing sewer service to the  
13 development.

14 Section 10. Any term not defined herein which is defined in the Long Beach  
15 Municipal Code or in the “Rules, Regulations and Charges Governing Potable Water,  
16 Reclaimed Water, Sewer Service, and the Water Shortage Contingency Plan” of the Public  
17 Utilities Department shall have the meaning stated therein.

18 Section 11.

19 A. Regular bills for water service and sewer service shall be  
20 issued at intervals of approximately one month (commonly called “monthly”)  
21 except in those cases where the General Manager or the Board of Public  
22 Utilities Commissioners shall prescribe another billing interval. Insofar as  
23 practical, meters shall be read at regular intervals for the preparation of  
24 regular bills, and meters shall be read as required for the preparation of  
25 opening, closing, and special bills.

26 B. Every water customer and every sewer customer shall be liable  
27 for payment of bills for water service and sewer service. Charges for water  
28 service and sewer service shall be included in municipal utility bills.

1 C. Anyone who has been granted an exemption under Chapter  
2 3.68 of the Long Beach Municipal Code as of the date of this resolution does  
3 not need to file a separate application for exemption hereunder.

4 Section 12. Whenever the correctness of any bill for water or sewer service  
5 is questioned by a customer, the procedures established in the “Rules, Regulations and  
6 Charges Governing Potable Water, Reclaimed Water, Sewer Service, and the Water  
7 Shortage Contingency Plan” of the Public Utilities Department shall be followed.

8 Section 13. The following words shall have the meanings defined as  
9 follows:

10 A. “Billing unit” means one hundred (100) cubic feet of water and  
11 equals 748 gallons;

12 B. “Commercial” refers to activities devoted primarily to business,  
13 property management, or a profession;

14 C. “Industrial” refers to activities devoted primarily to  
15 manufacturing or processing;

16 D. “Interruptible” refers to reclaimed water service that can be  
17 suspended at any time at the Board’s discretion, without liability and  
18 dependent upon the Public Utilities Department’s reclaimed water system  
19 needs for such service.

20 E. “Non-peaking” means total average daily demand occurring at  
21 a continuous, constant level over a twenty-four (24) hour period;

22 F. “Peaking” means total average daily demand occurring  
23 between the hours of 9:00 p.m. and 6:00 a.m.

24 G. “Winter billing period” means the time period used for sewer  
25 volumetric calculation purposes, which includes bills with a bill prepared date  
26 in December, January, February, or March.

27 Section 14. All other resolutions of the Board of Public Utilities  
28 Commissioners, or provisions thereof, which conflict with this resolution are hereby

OFFICE OF THE CITY ATTORNEY  
DAWN MCINTOSH, City Attorney  
411 West Ocean Boulevard, 9th Floor  
Long Beach, CA 90802-4664

1 rescinded. The charges, conditions, and provisions established in this Resolution shall  
2 supersede all others previously established.

3 Section 15. The Secretary of the Board of Public Utilities Commissioners  
4 shall certify to the passage of this resolution and it shall take effect by operation of law  
5 following its approval by the City Council by ordinance.

6 I hereby certify that the foregoing resolution was adopted by the Board of

- (2) Residential customers using gas for non-essential uses only, will pay the Tier II Rate for all usage. These non-essential uses include, but are not limited to decorative fireplaces, gas lamps and clothes dryers.
- (3) Long Beach Energy Resources' (ER) cost of gas is defined as an amount equal to ER's weighted average cost per therm of gas supply purchased, necessary to meet the forecasted Core and Non-Core demand for the month. In addition, the cost of gas shall include the cost to administer the transportation, purchasing, remarketing, balancing, etc., of ER's natural gas requirements, as well as the cost for any financial transactions implemented to reduce market exposure for the cost of gas. The gas purchased will be comprised of any one or combination of three increments of supply as follows:
  - (a) Interstate supplies delivered into the Southern California Gas Company (SoCalGas) intrastate pipeline system without consideration of SoCalGas (or any other intrastate pipeline company providing similar services) pipeline transportation and other system costs associated with intrastate delivery to the City of Long Beach (City);

- (5) The cost of all gas purchased by ER shall be assigned to either the Core or Non-Core Commodity Charge, according to the price of each increment. The Core demand (Rate Schedules 1, 2, 3, and 5) shall be met with sufficient volumes of the lowest cost increment(s) of gas.
- (6) The monthly Commodity Charge will be made available to customers by calling ER at (562) 570-2066 and will also be posted on the City's internet website. The actual cost of gas charged to the customer may differ from the posted rate as the customer's billing period may overlap over more than one month and therefore the billed commodity charge will reflect the weighted average commodity charge based on the number of days in each month under the customer's billing cycle.
- (7) The Commodity Charge shall be subject to adjustment as the result of tariff, pricing changes, or regulatory action that may be imposed by governmental entities having jurisdiction therein.
- (8) These rates do not apply to services provided by SoCalGas operating under franchise with the City.
