Subject: Responses to Questions from the August 11, 2015 Budget Hearing

This memo provides responses to outstanding questions raised by members of the City Council during the August 11, 2015 Budget Hearing.

Parks, Recreation & Marine Department

1. What is the cost of adding one Animal Control Officer (ACO)?

The fully loaded annual cost of an Animal Control Officer I is \$68,344. In addition, each ACO requires \$2,500 in training and materials and supplies, for a total annual cost of \$70,844 per position.

For every two ACO's added, the Department will need to purchase one new truck, at an estimated one-time cost of \$52,873, plus ongoing fuel, maintenance and replacement costs of \$23,363 per year.

2. What is the annual cost of the Municipal Band? In what parks and Council Districts are the concerts held? How do the costs of holding a Municipal Band concert compare to the costs of holding alternative types of park concerts?

The annual cost of the five-week program is roughly \$300,000 to provide 20 concerts. Each concert is approximately \$15,000 and performed four days per week. Prior to FY 12, the Department provided alternative summer concerts with varied types of musical performances by local artists at 10 parks throughout the City. This alternative concert program in FY 16 would cost approximately \$6,000 per concert. For more information, see the attached memo on the Municipal Band Program (Attachment A).

3. What is the status of the Park Patrol Pilot Program? What are the per park costs of continuing the program and recommended level of support for each park?

Since August 2014, the Department of Parks, Recreation and Marine has piloted an unbudgeted park safety program at Bixby Park and Chittick Field to address community concerns of misconduct and illegal activity. For information and statistics on the program and an evaluation of its success, see the attached memo on the Park Patrol Program (Attachment B).

Public Works Department

4. Is there a rebate program available from the City for residents wishing to install LED lighting in alleyways?

The City does not offer any rebates for LED lighting as Southern California Edison (SCE) is the electric utility provider to the City and any LED rebates would come from them, if any.

If you have any questions, please contact Budget Manager Lea Eriksen at 8-6533.

Subject: **Municipal Band Program**

This memorandum is provided in response to the Mayor and the City Council's questions from the Department of Parks, Recreation and Marine's (Department) August 11, 2015 Proposed Budget Presentation regarding the Long Beach Municipal Band Program (Program).

PROGRAM INFORMATION

The annual cost of the five-week Program is roughly \$300,000 to provide 20 concerts. Each concert is approximately \$15,000, and performed four days per week, Tuesday through Friday, at the following locations:

- Tuesdays: Bluff Park or Whaley Park
- Wednesdays: Los Cerritos Park
- Thursdays: Marine Stadium
- Fridays: El Dorado West Park

Support for the Program has been provided by the following sources:

	Budget	Actual
Long Beach Gas and Oil Department	\$ 50,000	\$ 50,000
Port of Long Beach	50,000	50,000
Environmental Services Division, Department of Public Works	50,000	50,000
Fundraising (Last Three Years) - <i>Pass the Bucket, Partners of Parks, & Other Fundraising Efforts</i>	85,000	70,000
Tidelands Operations Fund (Last Three Years)	65,000	80,000
Total	\$ 300,000	\$ 300,000

An additional week of the Program with four concerts would cost \$60,000. Based on FY15's performance, it is expected that \$11,000 would be collected in "pass the bucket" donations during the week of concerts, if held at the current locations, therefore \$49,000 in funding would be required.

ALTERNATE PROGRAM OPTIONS

Prior to FY 12, the Department provided an additional summer concert series with varied types of music provided primarily by local performers to increase the

Municipal Band Program
August 24, 2015
Page 2

outdoor music programs for the community. The concerts were located at ten parks throughout the City, including: Admiral Kidd, Chavez, Coolidge, Drake, Houghton, Ramona, Silverado, Somerset, Stearns, and Whaley Parks. This alternative concert program in FY16 would cost approximately \$6,000 per concert.

Subject: Park Patrol Program Update

Since August 2014, the Department of Parks, Recreation and Marine (PRM) has piloted an unbudgeted park safety program at Bixby Park to address community concerns of misconduct and illegal activity and a modified permit compliance program at Chittick Field. This memorandum provides program information, statistics and update, as well as cost considerations should the program be structurally funded in the future.

BACKGROUND

Staff assigned to the Park Patrol Program (Program) provide information to park and facility patrons; educate on park rules, regulations and permits; and contact the Long Beach Police Department (LBPD) when law enforcement services are required. LBPD is responsible for park security, Program staff are specially trained recreation personnel and do not have the ability to cite or arrest. They identify and report to LBPD any illegal or troubling activities, while proactively and positively engaging with park patrons. Two staff work at each location during Program hours, four hours during the week, and eight hours each day on busy weekends. Over 20 Recreation Leader Specialists have been trained by PRM along with LBPD. Training topics included: customer service; community interaction; suspicious activity reporting; PRM program information and park rules and regulations; and, protocols for calling 9-1-1 to request assistance from LBPD or other City resources.

PROGRAM UPDATE

Program staff's interaction with the hundreds of community members utilizing these two sites has been positive. Program staff engage with park patrons, especially the regular park users. Patrons have started to self-regulate and increased compliance of park and facility rules and regulations at each site has occurred. Community contact data was tracked and categorized for the patrols occurring at Bixby Park over the last year. In one-third of the almost 2,000 contacts with the community, Program staff provided park users with information and referral services to recreation and social service programs. Alcohol and smoking-related issues make up 41 percent of all contacts. It appears this activity may be decreasing, but without previous information to compare it to, we can only rely on anecdotal evidence. Of the almost 2,000 contacts with the community, only 2% resulted in a call to the LBPD.
