

Petition To Show Actual Size of Proposed Open Channel

This petition is a declaration asking for a delay in the approval of Phase 2 until the Actual Size of the proposed Channel has been "Staked out" and left up for Public Comment for 6 Weeks.

We are frequent users of the park and need to fully understand the impact this will have before we can lend our support in favor for, or against this.

The outreach by the City has been Marginal at best. A project of this magnituded demands this be shown at the actual site.

Petition Colorado Lagoon Open Channel

This petition is a declaration of opposition from Long Beach residents to the proposed Colorado Lagoon Open Channel project which if implemented would result in the following:

- Construction of a 250 foot wide channel through Marina Vista Park and Marine Stadium Park eliminating approximately 3.6 acres of vital and highly used park space.
- Creation of unsightly channel and fencing similar to a shallow version of the San Gabriel River
- Construction of an expensive set of bridges over the channel on Colorado Ave and Eliot Street virtually slicing our community in half and adding future maintenance cost to the City.
- An underground culver will achieve the same result with less cost and no loss of park space.
- Require expensive redirecting of wastewater utility line requiring pumping stations and ongoing operation and maintenance costs.
- Destruction of the existing baseball field and adjacent sports practice areas resulting in much of the current park being unusable for sports and recreation
- Channel will create a safety hazard for park users especially during storm events
- Will require costly relocation of soccer and baseball fields to an area of the park directly adjacent to residential communities (Windward Pointe, Spinnaker Coves). Further crowding an already impacted area.
- No existing commitment of funding for capital costs or operation and maintenance costs!
- No assurance project will be completed and maintained due to lack of funding source and City's ongoing long term budget deficits
- Significant reduction in space and impacts on the "Concert in the Park" area
- Project will require 2 years of construction and thousands of semi truck loads of earth removal
- The project is unnecessary – the existing system as improved by Phase I will achieve 90% of the project goals.

City of Long Beach: DON'T DO IT!
