Subject: River Park Residential Project Comments

-EXTERNAL-

To whom it may concern,

I am concerned about the River Park Residential Project which plans to build 200+ homes and condos next to the LA River. I implore you to NOT approve this project.

- The site has seen historic pollution from oil and gas companies.
- There is very little green space on the west side of Long Beach compared to the more affluent east. This concrete jungle is the opposite of what folks in the area need.
- A majority of the homes will be rental properties with profits going to big corporations.
- Will dramatically increase the density of Wrigley Heights leading to even worse traffic.
- The FEIR is woefully inadequate and glosses over many of the environmental impacts.

Thank you.

-Adam
