

MORE TAX DOLLARS

DOWN THE DRAIN

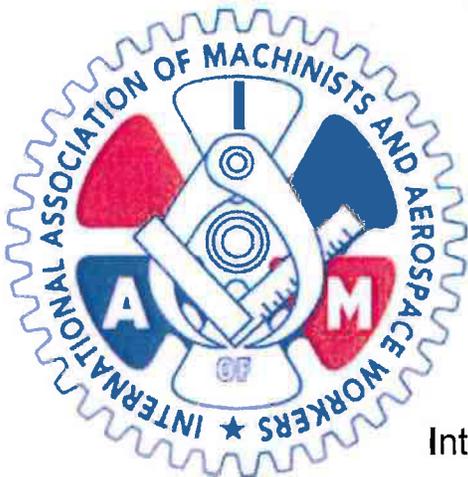

City Management is asking the City Council to approve an Early Works Agreement for the new Civic Center at a cost to the Long Beach tax payer of over

\$900,000 PER MONTH!

All because City Management failed to come to the negotiating table with the IAM in a timely manner to discuss the impacts the new Civic Center Project would have on City Employees. This is the same gamble City Management took with the furlough case and lost.

Instead of using tax money wisely, and investing in expanding City Services, City Management is more committed to wasting money. This Civic Center is nothing more than a monument to mismanagement.
