<sup>Answer</sup>  
Your displays show that proposed mixed  
use properties will be stepped back  
to transition to the height of adjacent  
single family homes. ~~These~~ However  
many commercial lots along  
Long Beach Blvd and Market  
are too small or shallow to  
allow a 4 plus story bldg to  
be stepped back. Should shallow  
lots be deleted from the map?

## Question :

READ

Mayor Garcia has said he wants to make Long Beach another High Tech center, which will attract Businesses and jobs, like Google & Amazon. Do have these kind of jobs requires a highly skilled and educated workforce, which provides high paying jobs. This is not the kind of workforce that is looking for High Density housing. Isnt this in conflict with Mayor Garcia's vision? Wouldn't Long Beach be better served by beautifying our residential neighborhoods and making Long Beach a more desirable place to live?

## Comments on LUE

I agree with the "spirit" of the LUE update, although I have several questions about the "letter" of the LUE.

- 1) How does the LUE address economic development without gentrification?
- 2) The LUE assumes widespread mass transit utilization, but a system that large, useful, affordable, dependable, and safe doesn't exist. What can the city do to address this?
- 3) This LUE leaves a lot of the actual development to developers (makes sense), but what will the city do to ensure equity, economic justice + environmental justice are pursued above profits of private developers?

Thank you, I look forward to the Long Beach envisioned in the LUE.
