Board of Water Commissioners
September 5, 2019 Board Meeting

CHRISTOPHER J. GARNER, General Manager

Subject:

Authorize the General Manager to enter into an Agreement with City of Lakewood to provide limited recycled water service, subject to interruption and termination, to the City of Lakewood.

Executive Summary:

The City of Lakewood has worked collaboratively with LBWD over the years, with recent examples including the supplying of water to LBWD through an interconnect to reduce imported water purchases and entering into a groundwater rights lease agreement to assist LBWD in managing groundwater rights. The City of Lakewood has requested LBWD provide recycled water service for four service connections to irrigate a section of street medians and parkways on Carson Street between Cherry Avenue and Lakewood Drive.

An extension to the LBWD recycled water main system would not be necessary to supply the requested area because there is already an existing LBWD recycled water main running through Lakewood via Carson Street. The median/parkway areas could be served by simply constructing four new service laterals. Since the relevant portion of the LBWD recycled water main on Carson Street is located within the City of Lakewood, Lakewood would construct the four recycled water service laterals with inspection oversight from LBWD.

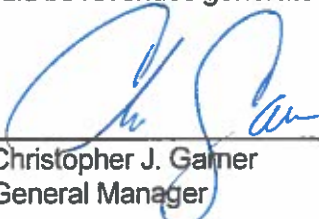

The attachment is a draft outline of the key terms of the proposed agreement which would provide limited, interruptible service for the City of Lakewood street medians and parkways on Carson Street between Cherry Avenue and Clubhouse Drive. The terms of the proposed agreement are consistent with the provisions of the City Charter governing LBWD. The proposed terms emphasize that this agreement would provide limited interruptible recycled water service, subject to the availability of reclaimed water supply above and beyond the needs of LBWD's other reclaimed water customers. Additionally, the term of service is open, with the specific limitation allowing either party to terminate upon 365 days' notice.

Recommendation/Fiscal Impacts:

Authorize the General Manager to enter into an Agreement with City of Lakewood to provide limited recycled water service, subject to interruption and termination, to the City of Lakewood.

Fiscal Impact: There is no budgetary impact. There would be revenues generated from recycled water sales at the metered connections.
