

**eComments Report for Public Safety Committee Meeting Agenda of May 8, 2020**

Item	Name	E-mail	Street	Neighborhood	City	State	Zip	Comment	Received
2. (20-0417) Recommendation to receive a report from Police on early release and zero bail. The County has begun some of this in response to the current crisis.	Stephen Downing	stephen.beachc omber@gmail.c om						It is disappointing that the Public Safety Committee (PSC) is not considering any of the ten policy items I identified in my email to committee members relating to the LBPD's planning and policy failures in response to the pandemic. As to the Bail issue: Ending the criminalization of poverty by abolishing cash bail and limiting fines and fees, deflecting and diverting more people away from the criminal justice system through public health responses and treatment, and promoting conviction integrity review thatÂ address racial inequities, reduces the footprint of the justice system, and promotes public trust and safety should be the focus of the committee's considerations. I also urge the committee to review the Phase 4 draft of the IACP LBPD report which is now in the possession of the City Attorney. It should provide enough information to justify weekly meetings of the PSC. Internal policy reform will go a long way toward meeting the economic crush occasioned by the pandemic.	5/7/2020
2. (20-0417) Recommendation to receive a report from Police on early release and zero bail. The County has begun some of this in response to the current crisis.	Dixie Miller	msdixipeach@y ahoo.com						You are jeopardizing the peoples of Long Beach and surrounding cities by releasing felons. Are you going to release their names, crime, photos, and where they will be residing? It is the mayor's responsibility to guarantee our safety and this is doing the complete opposite.	5/6/2020
ADJOURNMENT	Dixie Miller	msdixipeach@y ahoo.com						The city of Long Beach has opened testing sites for this virus corona-19. What are you doing regarding the other flu strains going around which have contributed to thousands of deaths to date? Furthermore, why is personal information being sent to the health and police departments regarding the testing?	5/6/2020
