January 19, 2021

HONORABLE MAYOR AND CITY COUNCIL City of Long Beach California

RECOMMENDATION:

Determine that the project is categorically exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15305 (Class 5 – Minor Alterations to Land Use Limitations) of the CEQA Guidelines and none of the exceptions in 15300.2 apply, and that it is further exempt pursuant to Section 15308 (Actions by Regulatory Agencies for Protection of the Environment) and Section 15061(b)(3) (Common Sense Exemption), as it will not result directly or indirectly in significant environmental impacts (CE20-090);

Declare an Ordinance amending Title 21, Zoning Regulations (Zoning Code), of the Long Beach Municipal Code to add Chapter 21.61 (Maintenance of Low Income Housing in the Coastal Zone) to limit exceptions to the requirements to replace affordable units and to increase the in-lieu fees for Coastal Zone areas of Long Beach, read the first time and laid over to the next regular meeting of the City Council for final reading; and,

Adopt a Resolution authorizing the Director of Development Services to submit amendments to the Long Beach Zoning Regulations to the California Coastal Commission for its review, approval, and certification. (Districts 1, 2, 3)

DISCUSSION

In 2014, the City Council adopted the current 2014-2021 General Plan Housing Element. The document identifies several actions to be completed during the 2014-2021 period including Program 4.4 related to Affordable Housing Funding Opportunities. One of the actions involves an update to the Coastal In-Lieu Fees that developers are required to pay if a lower-income unit is demolished within the Coastal Zone. Along with the updating of the fees to reflect current market costs, this action will remove a one- to two-unit exemption from the fee requirements that is no longer consistent with State law and best practices.

In 1981, the California legislature enacted Government Code Section 65590, the Mello Act, which prohibits the demolition of lower-income housing units within the Coastal Zone unless a provision is made for those units to be rebuilt onsite or within a certain distance or to be replaced through the payment of in-lieu fees. Between 1981 and 2014, the City of Long Beach (City) received over \$2 million in in-lieu fees related to demolitions and condo conversions within the Coastal Zone. These fees supported the construction of 393 affordable units to offset the loss of 111 affordable units.

HONORABLE MAYOR AND CITY COUNCIL January 19, 2021 Page 2 of 3

Around 2008, City and Coastal Commission policy began to evolve alongside changes in market and regulatory conditions in Long Beach. The payment of in-lieu fees is no longer desirable when considering the rapidly increasing cost of developing affordable housing units. Preservation of existing housing or replacement onsite are superior options under current conditions. No Mello Act fees have been collected since 2014; however, it remains a legal requirement to offer in-lieu fees as an alternative means of compliance with the Mello Act.

Proposed Ordinance

On October 1, 2020, the Planning Commission approved the staff recommendation and recommended that the City Council adopt the proposed Ordinance to increase in-lieu fees (Attachment A). Unlike other development impact fees, Mello Act fees exist within the Zoning Code and must be modified by amending Title 21 of the Long Beach Municipal Code (LBMC). This action will match the fee to the full financial gap associated with the construction of affordable units, as demonstrated in a technical study from Keyser Marston Associates (Attachment B). Below are the proposed updated in-lieu fees:

In-Lieu Fee Schedule			
Number of Bedrooms in Displaced Unit	Very-Low Income	Low Income	Moderate Income
Studio	\$241,000	\$222,000	\$127,000
1 Bedroom	\$296,000	\$272,000	\$155,000
2 Bedrooms	\$350,000	\$322,000	\$183,000
3+ Bedrooms	\$404,000	\$372,000	\$212,000

The proposed ordinance will also eliminate exceptions for projects involving one and two units that exist in the current code provisions (Attachment C). As the number of individuals renting single-family homes, duplexes and accessory dwelling units has increased, it is no longer appropriate to exempt those properties from the requirements of the Mello Act. Findings in support of the proposed Zoning Code Amendment are attached to this report (Attachment D).

Public Notice and Environmental Compliance

Notice of this public hearing was published in the Long Beach Press-Telegram on December 21, 2020, in accordance with provisions of the Zoning Code (Title 21). Due to the declared state of emergency, notices were not provided to City libraries (they are closed), notice posting was provided at City Hall but not at multiple locations. A notice of the proposed Zoning Code amendment was distributed through the City's LinkLB e-mail blast system and to individual stakeholders who have requested notification on this item. No responses were received as of the date of preparation of this report. Any comments received prior to the City Council hearing will be provided at the hearing.

In accordance with the California Environmental Quality Act (CEQA) Guidelines, the proposed Ordinance is exempt from CEQA pursuant to Section 15305 (Class 5 – Minor Alterations to Land Use Limitations) of the CEQA Guidelines and none of the exceptions in 15300.2 apply, and it is further exempt pursuant to Section 15308 (Actions by Regulatory Agencies for Protection of the Environment) and Section 15061(b)(3) (Common Sense Exemption), as it will not result directly or indirectly in significant environmental impacts.

HONORABLE MAYOR AND CITY COUNCIL January 19, 2021 Page 3 of 3

This matter was reviewed by Assistant City Attorney Michael J. Mais on December 15, 2020 and by Budget Analysis Officer Julissa José-Murray on December 19, 2020.

SUSTAINABILITY

There is no sustainability impact associated with this recommendation.

TIMING CONSIDERATIONS

City Council action is requested on January 19, 2021, to allow sufficient time to implement the revised fees for the current Fiscal Year 2021.

FISCAL IMPACT

When levied, the revised Mello Act in-lieu fees will result in additional revenue to help offset the development of affordable housing units in the Coastal Zone. The revenue impact of the Mello Act in-lieu fees is anticipated to be limited. In the past decade, there has been a lack of development in the Coastal Zone to trigger Mello Act fees, and an accurate estimate of new revenues generated cannot be estimated with accuracy at this time. Implementation of the Mello Act update has no staffing impact beyond the normal budgeted scope of duties and is consistent with existing City Council priorities. There is no local job impact associated with this recommendation.

SUGGESTED ACTION:

Approve recommendation.

Respectfully submitted,

e e C

OSCAR W. ORCI DIRECTOR OF DEVELOPMENT SERVICES

	4	CITY OF LONG BEACH AMENDING THE LONG BEACH			
	5	MUNICIPAL CODE BY AMENDING CHAPTER 21.61			
	6	RELATING TO MAINTENANCE OF LOW INCOME			
	7	HOUSING IN THE COASTAL ZONE			
	8				
	9	The City Council of the City of Long Beach ordains as follows:			
	10				
	11	Section 1. Chapter 21.61 of the Long Beach Municipal Code is amended			
RNEY orney Floor	12	to read as follows:			
TY ATTOI I, City Atto evard, 9th CA 90802	13	CHAPTER 21.61			
543 [°]	14	MAINTENANCE OF LOW INCOME HOUSING IN THE COASTAL ZONE			
PA Bes	15				
DFFICE OF CHARLES 411 W. Oce Lona	16	21.61.010 Purpose.			
0FF CH 411	17	The purpose and intent of this Chapter is to maintain the present			
	18	number of very low, low and moderate income housing units within the			
	19	coastal zone and to require that any applicant for a coastal development			
	20	permit, as a condition of permit issuance, be responsible for replacing			
	21	existing very low, low and moderate income housing on a one-to-one basis.			
	22				
	23	21.61.020 Definitions.			
	24	Very low, low and moderate income households and housing units			
	25	are defined in Chapter 21.15 (Definitions).			
	26				
	27	21.61.030 Applicability of this Chapter.			
	28	Any applicant proposing to remove existing affordable housing in the			
		MJM:kjm A20-06946 12/18/20; 12/29/20 01219800.docx			

coastal zone shall be responsible for replacing on a one-to-one basis all existing very low, low and moderate income housing removed. This provision shall not apply in the following instances:

If the residential structure has been condemned and would require the expenditure of fifty percent (50%) or more of the improvement value, not including land value, to meet applicable building codes or regulations.

21.61.040 Administration.

A. Authority. The administration of the replacement housing requirement and in-lieu fee payments is delegated to the Director of Development Services. The Development Services Department shall adopt appropriate guidelines for program administration consistent with the intent of this Chapter. Any fees assessed in connection with the administration of this Chapter shall be established by the City Council by resolution.

B. Determination.

It shall be the responsibility of the Director of
 Development Services to make all determinations regarding the very low,
 low and moderate cost housing displaced. In order to avoid short-term
 actions by the owner to disqualify housing from the very low, low and
 moderate income definitions, the Department of Development Services shall
 develop procedures to average rental levels over a three (3) year period and
 to establish fair market sales values based upon prior sales and

2. Determinations made by the Director of Development Services shall be attached by the applicant to the coastal development permit application and shall become a public record in all proceedings and hearings related to that application. The Department of Development Services shall verify the rent/sales value history and insure that there have

been no price changes made for the purpose of circumventing this Chapter or these regulations.

3. When the units provided under this program are not under the ownership and control of the City, the Director of Development Services shall act to insure that the units continue to be made available to very low, low and moderate households. The City and the property owner shall enter into an agreement and shall cause necessary covenants and deed restrictions to be recorded as provided for in Subsections 21.61.080.E and F.

21.61.050 Responsibility to provide housing.

No coastal permit and no permit to demolish units shall be issued until the applicant has demonstrated compliance with the responsibility to provide replacement units, or has demonstrated the intention to comply with this Chapter prior to occupancy of the new development. No certificate of occupancy shall be issued prior to the satisfaction of this responsibility.

21.61.060 Method of replacement.

An applicant shall provide replacement housing units by one of the methods outlined in Subsections 21.61.060.A through E:

 A. On-site—New Units. The replacement units may be provided on the same site as the units being removed.

B. Off-site—New Units. Replacement units may be provided at an off-site location as approved by the Director of Development Services.
The new units shall be completed and ready for occupancy within three (3) years of issuance of a coastal development permit. To assure performance, the applicant shall post a performance bond in favor of the City in an amount equal to the applicable in-lieu fee required for the number of units

C. Off-site—Rehabilitated Units. Replacement units may consist of rehabilitated existing residential units at a site approved by the Director of Development Services. The units to be rehabilitated shall have been cited as substandard by the City Building Official. Also one (1) of the following shall apply:

1. The units to be rehabilitated must, in the opinion of the Director of Development Services or designee, require an investment equal to at least twenty-five percent (25%) of the improvement value (total value less land value) of the units to correct the substandard conditions; or

2. The applicant may rehabilitate two (2) units for each unit displaced, provided that the existing units are substandard and require an investment equal to at least twelve and one-half percent ($12\frac{1}{2}$ %) of the improvement value of the units to correct the substandard condition.

D. Off-site—Unit Conversion. Replacement units may be provided through the permanent conversion of existing units to housing for very low, low and moderate income households. The existing units, prior to conversion, must be renting or selling at least twenty percent (20%) above the affordable housing limit of very low and low income housing units displaced and fifteen percent (15%) above the limit of moderate income units displaced.

E. In-lieu Fees. A developer may choose to pay in-lieu fees rather than provide replacement housing. Fees shall be paid in accordance with the provisions of Section 21.61.070. If the in-lieu fee is selected in a redevelopment project area, the developer shall be credited with the amount of relocation benefit actually paid to displaced residents, up to a maximum of four thousand five hundred dollars (\$4,500.00) per unit, provided that the relocation payments made to displaced residents by the redevelopment

Δ

agency are subsequently reimbursed by the developer.

21.61.070 In-lieu fees.

Α. Payment Schedule. In-lieu housing replacement fees shall be paid in accordance with the schedule indicated in Table 61-I. The fee shall be paid to the Director of Development Services for deposit in the Housing Trust Fund, or any similar successor fund, and shall be based on the number, size and income groups served by the displaced units. The schedule in Table 61-1 shall be adjusted annually in accordance with the current Construction Cost Index for the Los Angeles metropolitan area.

Dispensation of In-lieu Fees. The Director of Development Β. Services shall place all in-lieu funds received into the Housing Trust Fund, or any similar successor fund, for the purpose of funding for very low, low and moderate income housing. The funds must be dispensed by the Director of Development Services or designee within three (3) years from the date of receipt.

C. Inventory of Properties. The Director of Development
Services shall maintain an inventory of properties suitable for rehabilitation,
new construction or acquisition within the area specified in Subsection
21.61.080.B.

D. Priority.

The Director of Development Services shall seek housing opportunities funded by in-lieu fees in accordance with the following order of priority:

1. Rehabilitation of existing substandard units.

2. Conversion of existing standard market rate units to housing for very low, low and moderate income persons.

3. Construction of new housing for very low, low and moderate income persons.

The intent of this priority order is to maximize the number of affordable units produced so that the number produced will approximate or exceed the number of units lost to displacement. The authority Director of Development Services may alter this priority as deemed reasonable to accomplish the objectives of this Chapter. The Authority Director shall attempt to reproduce affordable units in a mix proportional to the City-wide housing need, as established by the most current adopted general plan housing element and housing assistance plan.

E. Annual Report Required. The Development Services Department shall make an annual report to the City Council on its progress in this program. The report shall include annual and cumulative figures, in size and cost, for the number of housing units lost and the number of units provided by the program, as well as the relationship between program achievements and existing housing needs as established by the Housing Element and housing assistance plan. This reporting may be integrated into

overall annual reporting to the City Council regarding the Housing Element.

21.61.080 Conditions on replacement housing.

A. Equivalency. An applicant shall provide replacement housing units which are equivalent to the units displaced in terms of size, measured by the number of bedrooms and income range served, for persons of very low, low and moderate incomes. Subject to the approval of the Director of Development Services, and upon a showing that provision of equivalent units is not feasible, an applicant may provide replacement housing in a mix of household sizes and incomes. The mix shall be proportional to the Citywide housing need, as established in the most current General Plan Housing Element and housing assistance plan.

B. Location.

1. Any affordable housing produced through this program shall be located within the City of Long Beach anywhere south of the following line:

Beginning at the Los Angeles River and Anaheim Street; thence east along Anaheim Street to Pacific Coast Highway; thence southeast along Pacific Coast Highway to Seventh Street; thence east along Seventh Street to West Campus Drive; thence north along West Campus Drive to the common boundary between Cal. State Long Beach and the Veterans Administration (VA) Hospital on the north side of the hospital; thence west, north, east and south around the Cal. State Long Beach property line, returning to Seventh Street along East Campus Drive; thence east along Seventh Street to the boundary line between Los Angeles and Orange Counties.

2. The Director of Development Services shall attempt to achieve a reasonable distribution throughout this area in accordance with

City General Plan Housing Element policies.

C. Income Requirements.

1. Housing units produced through the replacement program shall be available to households of very low, low and moderate income. To achieve this, each new tenant of rental property and each new buyer of for sale property shall first be qualified by the Director of Development Services or designee in accordance with procedures set forth by HUD under Section 8 of the Housing Act of 1937, as amended, or similar procedures which take into account annual household income and total household assets.

2. Applicants shall be qualified as very low income, low income and moderate income, corresponding to the three (3) classes of housing units (very low, low and moderate) defined in Chapter 21.15 (Definitions).

D. Guarantee. An applicant shall guarantee that replacement housing provided pursuant to Section 21.61.040 will continue to be provided for very low, low and moderate income households. The applicant shall enter into a recorded agreement or covenant with the City as specified in Subsections 21.61.060.C and D.

E. Rental Units Guarantee. Affordable housing developed as rental units shall be subject to the following:

1. Prior to the issuance of an occupancy permit, the developer shall enter into an agreement with the Director of Development Services to assure that all units will continue to be rented at prices affordable to very low, low and moderate income renters. The agreement shall bind the developer and any successor in interest to the real property being developed. The agreement shall be recorded as a covenant running with the land, with no prior liens, other than tax liens, for a period extending

fifty-five (55) years from the date the agreement is recorded. The agreement shall provide that either:

a. The unit rents shall be fixed at a level affordable
to very low, low and moderate income households. The rent may be
adjusted annually to reflect changes in the median income. Tenants must
qualify as meeting the definition of very low, low and moderate income; or

b. The units shall be rented at the fair market rent for new construction as established by the Department of Housing and Urban Development (HUD). The units shall be rented to persons who either meet the standards for rent subsidy established by HUD pursuant to Section 8 of the Housing Act of 1937, as amended, or to persons who meet the requirements of other rent subsidy or funding program that provides rental housing for low income households.

c. The developer and all successors in interest shall be subject to affordable housing covenant monitoring fees as may be established by the City Council by resolution.

The developer shall make best efforts to accomplish the intent of this Chapter. Those efforts shall include, but not be limited to, entering into contracts offered by HUD, the Housing Authority, or other such agency administering a rent subsidy program; or, refraining from taking any action to terminate any rent subsidy programs entered into.

3. In the event that any time within fifty five(55) years after the agreement is recorded housing subsidies are not available, the developer or their successor shall maintain the rental levels for the unit at amounts no higher than those affordable to persons within the appropriate income categories described in this Title. In the event that so-called Section 8 or comparable maximum rental levels are no longer published by the federal government or local governmental agencies, maximum rental levels

shall be a base rent established by the last rental ceiling published for the Section 8 program, adjusted by a percentage to reflect the percentage increase or decrease in median income.

F. Sale Unit Guarantee. Affordable units developed as sale units shall be subject to the following:

1. Prior to the issuance of a certificate of occupancy, the developer shall enter into an agreement with the Housing Authority Director of Development Services to assure that subsequent sales following the initial sale of the unit will be at a price affordable to households earning substantially the same percentage of the median income as the initial purchasers. The agreement shall bind the developer, any successor in interest and all subsequent purchasers of the unit. The agreement shall be recorded as a covenant running with the land, with no prior liens other than tax liens. The agreement shall provide as follows:

a. The applicant, his successors and any subsequent purchasers shall give the City and Department of Development Services Housing Authority an option to purchase the units. The City may assign this option to an individual private purchaser who qualifies as a very low, low or moderate income person and who falls within substantially the same income group as the person for whom the initial sales price was originally established.

 Whenever the applicant or any subsequent owner of the unit wishes to sell or transfer the unit, the applicant shall notify the Authority Director of Development Services of his intent to sell. The authority City shall have the right to exercise the option cited in Subsection 21.61.080.F.1 within one hundred and eighty (180) days of the initial sale of the unit by the developer, or within ninety days for subsequent sales. Following the exercise of the option, escrow shall be opened and closed

27

within ninety (90) days after delivery of the notice to exercise the option.

3. The option price paid by the authority City or its designee shall be the original sales price of the unit plus an amount which reflects any increase in the median income since the time of original sale.

4. Following the notice of intent to sell the unit, the authority City shall have the right to inspect the premises to determine whether repair or rehabilitation beyond the requirements of general or deferred maintenance is necessary. If such repair or maintenance is necessary, the authority City shall determine the cost of repair, and the cost shall be deducted from the purchase price. The repair costs shall be paid to the authority City, its designee, or contractors chosen by the authority City to carry out the deferred maintenance, and the money received shall be expended in making repairs.

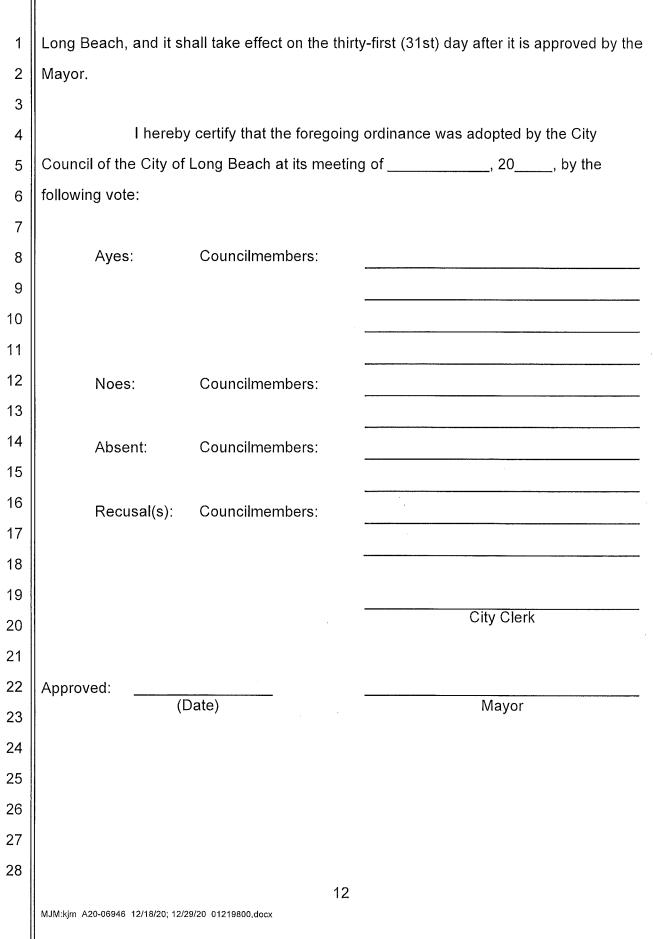

5. The purchaser shall not sell, lease, rent, assign or otherwise transfer the property without the expressed written consent of the Housing Authority Director of Development Services. This provision shall not prohibit encumbrancing the property for the sole purpose of securing financing. However, in the event of foreclosure or sale by deed of trust or other involuntary transfer, title to the property shall be taken subject to the recorded agreement.

21.61.090 First option.

Any resident displaced by new construction or condominium conversion in the coastal zone shall have the first option to rent or buy affordable housing.

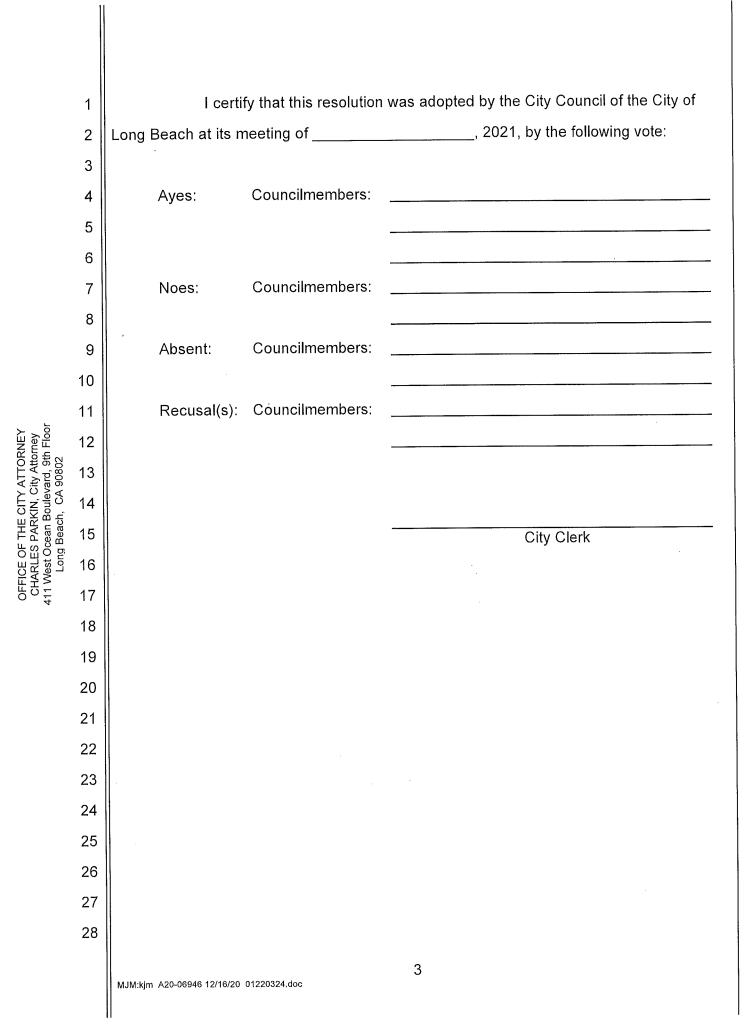

27Section 2.The City Clerk shall certify to the passage of this ordinance by28the City Council and cause it to be posted in three (3) conspicuous places in the City of

AGENDA ITEM No. 2

October 1, 2020

CHAIR AND PLANNING COMMISSIONERS City of Long Beach California

RECOMMENDATION:

Recommend that the City Council determine that the project is categorically exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15305 (Class 5 – Minor Alterations to Land Use Limitations) of the CEQA Guidelines and none of the exceptions in 15300.2 apply, and that it is further exempt pursuant to Section 15308 (Actions by Regulatory Agencies for Protection of the Environment) and Section 15061(b)(3) (Common Sense Exemption), as it will not result directly or indirectly in significant environmental impacts. (CE20-090); and

Recommend that the City Council adopt Zoning Code Amendment ZCA20-014, consisting of changes to Title 21 of the Long Beach Municipal Code (LBMC) that would amend section 21.61 (Maintenance of Low Income Housing in the Coastal Zone) to limit exceptions to the requirements to replace affordable units and to modify the in-lieu fees for Coastal Zone areas of the City. (CD 1,2 and 3)

APPLICANT: City of Long Beach, Development Services Department 411 West Ocean Boulevard, 3rd Floor Long Beach, CA 90802 (Application No. 2009-04)

BACKGROUND

In 2014, the City adopted the current 2014-2021 General Plan Housing Element. That document identifies several actions to be completed during the 2014-2021 period including Program 4.4 related to Affordable Housing Funding Opportunities. One of those actions involves an update to the Coastal In-Lieu Fees that developers are required to pay if a lower-income unit is demolished within the Coastal Zone. Along with the updating of the fees to reflect current market costs, this action will remove a one to two unit exemption from the fee requirements that is no longer consistent with state law and best practices.

DISCUSSION

In 1981, the California legislature enacted Government Code Section 65590, the Mello Act, which prohibits the demolition of lower-income housing units within the Coastal Zone unless provision is made for those units to be rebuilt on-site, within a certain distance, or through the payment of in-lieu fees. Between 1981 and 2014 the City of Long Beach received over two million dollars in in-lieu fees related to demolitions and condo conversions within the Coastal Zone. These fees supported the construction of 393 affordable units to offset the loss of 111 affordable units.

CHAIR AND PLANNING COMMISSIONERS October 1, 2020 Page 2 of 3

Around 2008, City and Coastal Commission policy began to evolve alongside changes in market and regulatory conditions in Long Beach. The payment of in-lieu fees is no longer desirable when considering the rapidly increasing cost of developing affordable housing units. Preservation of existing housing or replacement on-site are superior options under current conditions. No Mello fees have been collected since 2014. It remains however a legal requirement to offer in-lieu fees as an alternative means of compliance with the Mello Act.

Staff proposes to increase in-lieu fees to match the full financial gap associated with the construction of affordable units, as demonstrated in a technical study from Keyser Marston Associates (Exhibit A). Unlike other development impact fees, Mello fees exist within the Zoning Code and must be modified by ordinance. As part of the proposed ordinance, staff also recommends deleting an exemption to the Mello Act that is no longer appropriate for Long Beach. As the number of individuals renting single-family homes, duplexes and accessory dwelling units has increased, it is no longer appropriate to exempt those properties from the requirements of the Mello Act.

PUBLIC HEARING NOTICE

In accordance with public hearing notification requirements for a Zoning Code Amendment in Long Beach Municipal Code (LBMC) Section 21.21.302.C, notice of this public hearing was published in the Long Beach Press-Telegram on September 17, 2020. Due to the declared state of emergency, notices were not provided to City libraries (they are closed), notice posting was provided at City Hall but not at multiple locations. A notice of the proposed zoning code amendment was distributed through the City's LinkLB e-mail blast system and to individual stakeholders who have requested notification on this item. Copies of the public notice were also forwarded to the California Coastal Commission.

ENVIRONMENTAL REVIEW

In accordance with the California Environmental Quality Act (CEQA) and the CEQA Guidelines, the Zoning Code Amendment is exempt from CEQA under Section 15305 (Minor Alterations to Land Use Limitations) and Section 15308 (Actions by Regulatory Agencies for Protection of the Environment) and none of the exceptions in Section 15300.2 apply. Section 15305 exempts projects that consist of minor alterations in land use limitations in areas with an average slope of less than 20%, which do not result in any changes in land use or density. The properties affected by this ZCA have an average slope of less than 20%.

The ZCA is further exempt pursuant to Section 15308 (Actions by Regulatory Agencies for Protection of the Environment) and Section 15061(b)(3) (Common Sense Exemption), as it will not result directly or indirectly in significant environmental impacts. The Zoning Code Amendment does not change any physical conditions in the environment because it is limited to amendment of the Zoning Code to specify fees for otherwise permitted development, where residential uses are currently permitted. The proposed ordinance does not change the height, intensity of land use, or allowable land uses currently permitted by the underlying planned development district zoning or specific plan. Finally, projects seeking approval subsequent to this Zoning Code Amendment will be subject to individual CEQA review, as appropriate. Individual projects in the Coastal Zone, including demolitions, require a local coastal development permit (LCDP), which is a discretionary action subject to CEQA.

SAN DIECO	Code Chapter	^r 21.61 – Maintenance of Low Income Housing in the Coas	

SAN DIEGO Paul C. Marra In accordance with your request, Keyser Marston Associates, Inc. (KMA) prepared an analysis of the replacement housing obligations imposed by the Long Beach Municipal Code Chapter 21.61 – Maintenance of Low Income Housing in the Coastal Zone (Chapter 21.61). The purpose of the KMA analysis is to assist the City of Long Beach Housing Services Bureau (City) in updating the in-lieu fee schedule to be included in Chapter 21.61.070.

BACKGROUND STATEMENT

The City enacted Chapter 21.61 to comply with the Mello Act, which was adopted by the State of California (State) in 1982, and is codified in Government Code Section 65590 (Section 65590). One requirement imposed by Section 65590 is that the conversion or demolition of existing residential units in the "Coastal Zone", that are occupied by low or moderate income households, triggers a replacement housing obligation.

Chapter 21.61.060 details the methods that can be applied to fulfill the replacement housing obligation. These methods include on-site construction, off-site construction, the substantial rehabilitation of existing units, the conversion of existing market rate units, and the payment of an in-lieu fee.

500 SOUTH GRAND AVENUE, SUITE 1480 ➤ LOS ANGELES, CALIFORNIA 90071 ➤ PHONE 213.622.8095

The City engaged KMA to prepare an analysis of the financial gaps associated with replacing very-low, low and moderate income units under the defined criteria. These analyses are then used as the basis for creating a recommended in-lieu fee schedule to be included in Chapter 21.61.070.

SCENARIOS TESTING

It is a fundamental assumption that the in-lieu fee amount should provide sufficient revenue to fulfill the defined replacement housing obligations. In order to make this determination, KMA prepared conceptual pro forma analyses to estimate the financial gaps associated with the following scenarios:

- 1. The conversion of quality market rate apartment units into income restricted units subject to long-term income and affordability covenants.
- 2. The development of new apartment units under the following financing scenarios:
 - A project that is structured to be competitive for the award of the 9%
 Low Income Housing Tax Credit (9% Tax Credit);
 - A project that is financed with Tax-Exempt Multifamily Bonds (Bonds) and the automatically awarded 4% Low Income Housing Tax Credits (Bond/4% Tax Credits); and
 - A project that is financed with a conventional permanent loan and the private equity supported by the project's stabilized net operating income (Unleveraged Scenarios).
- 3. The acquisition of an existing market rate apartment project that requires substantial rehabilitation as defined in Chapter 21.61.060. The financing scenarios are:
 - a. A 9% Tax Credit project;
 - b. A Bonds/4% Tax Credit project; and
 - c. Unleveraged Scenarios.

EXECUTIVE SUMMARY

Based on the conceptual pro forma analyses prepared by KMA, the financial gaps associated with providing very-low, low and moderate income units are as follows:

Financial Gap Summary				
Range of Gaps				
Very-Low Income Units	\$137,000 - \$390,000			
Low Income Units	\$98,000 - \$364,000			
Moderate Income Units	\$41,000 - \$233,000			
Average Gap				
Very-Low Income Units	\$281,000			
Low Income Units	\$252,000			
Moderate Income Units	\$163,000			

The low end of the gaps is related to the scenarios that include the competitively awarded 9% Tax Credit. The high end of the gaps is related to the scenarios that do not include any outside funding assistance. KMA evaluated the various scenarios tested in this analysis and concluded that the Substantial Rehabilitation: Unleveraged Scenario represents the best proxy for the replacement housing costs. This conclusion was reached for the following reasons:

- It is likely that the replacement housing obligations generated by the majority of projects will be too small to make effective use of 9% Tax Credits or Bonds/4% Tax Credits.
- 2. The financial gaps associated with the Substantial Rehabilitation: Unleveraged Scenarios are most comparable to the average financial gaps derived from the seven scenarios tested in the KMA analysis.
- 3. The in-lieu fees generated under this structure should allow the City to provide sufficient assistance to the developers that agree to fulfill the replacement housing obligations and can make use of outside leveraging sources.

The recommended in-lieu fee schedule is presented in the following table:

Recommended In-Lieu Fee Schedule			
	Very-Low Income	Low Income	Moderate Income
Studios	\$241,000	\$222,000	\$127,000
One Bedroom	\$296,000	\$272,000	\$155,000
Two Bedrooms	\$350,000	\$322,000	\$183,000
Three Bedrooms +	\$404,000	\$372,000	\$212,000

The in-lieu fee schedule applied in Chapter 21.61.070 should be updated regularly to keep pace with changes in economic conditions. KMA recommends that the fee be adjusted annually based on changes in the Construction Cost Index. Then, once every five years, a new in-lieu fee analysis should be undertaken to keep pace with changes in the real estate and affordable housing markets.

METHODOLOGY

The conceptual pro forma analyses include development cost estimates, projections of stabilized net operating income and estimates of the funding sources that are potentially available to fund the project costs. The difference between the available funding sources and the estimated development costs represents the financial gap associated with providing the affordable units. This "affordability gap" is then translated into the financial gap associated with providing units.

The results of the conceptual pro forma analyses are presented in a Summary Table that follows this memorandum. The supporting documentation is presented in the following Appendices and Exhibits:

	Appendices and Exhibits
Appendix A:	Market Rate Conversion
Appendix B:	New Development Scenarios
Exhibit I	9% Tax Credit Scenario
Exhibit II	Bonds/4% Tax Credit Scenario
Exhibit III	Unleveraged Scenario

	Appendices and Exhibits
Appendix C:	Substantial Rehabilitation Scenarios
Exhibit I	9% Tax Credit Scenario
Exhibit II	Bonds/4% Tax Credit Scenario
Exhibit III	Unleveraged Scenario
Appendix D:	Background Information
Exhibit I	Apartment Sales Survey
Exhibit II	Apartment Rent Survey

BASIC ASSUMPTIONS

The conceptual pro forma analyses are based on the key assumptions identified in the following sections of this memorandum.

Unit Mix

Each of the scenarios is based on a 50-unit project. The unit mixes applied in the analyses are presented in the following table:

Unit	Mix Assumptions	
	9% Tax Credit Scenarios ¹	All Other Scenarios
Unit Type	Percentage of Units	
Studios	10%	15%
One Bedroom	30%	40%
Two Bedrooms	30%	40%
Three Bedrooms	30%	5%

¹ A project must include at least 30% three-bedroom units to be competitive for 9% Tax Credits.

Estimated Development Costs

The key assumptions applied in the development cost estimates are as follows:

Property Acquisition Costs

- The acquisition cost for the market rate conversion project is estimated at \$433,000 per unit. This value represents the weighted average sales prices for the Class A and B apartment buildings included in Appendix D – Exhibit I.
- KMA performed a survey of residential land sales and set the property acquisition cost for the new development scenarios at \$205 per square foot of land area.
- Using the weighted average of the Class C apartment sales prices listed in Appendix D – Exhibit I, the property acquisition cost for the substantial rehabilitation scenarios is estimated at \$267,000 per unit.

Direct Costs

The direct cost estimates applied in the new development and substantial rehabilitation scenarios are based on the assumption that prevailing wage requirements will not be imposed on the project. In both sets of scenarios, the contractor related costs are set at 16% of construction costs, and a direct cost contingency allowance equal to 5% of other direct construction costs is applied. The balance of the direct cost assumptions can be detailed as follows:

New Construction Scenarios

- 1. The project density is set at 125 units per acre.
- 2. An allowance of \$20 per square foot of land area is provided for site improvement costs.
- 3. It is assumed that 1.25 parking spaces per unit are provided, with the cost for first level subterranean spaces estimated at \$35,000 per space and the second level subterranean spaces estimated at \$45,000 per space.

4. Building costs are estimated at \$125 per square foot of gross building area (GBA).

Substantial Rehabilitation Scenarios

The direct building costs for the substantial rehabilitation scenarios are estimated at \$55,000 per unit. This comports with the requirements imposed by Chapter 21.61.060.

Indirect Costs

- The architecture, engineering and consulting; and taxes, insurance, legal and accounting costs are estimated based on industry standard percentages of direct costs.
- 2. The public permits and fees cost estimates are based on other affordable housing projects that KMA has analyzed for the City. These costs are estimated as follows:
 - a. For the new development scenarios the public permits and fees costs are estimated at \$20,000 per unit. These fee estimates are reduced by a \$5,303 fee waiver for every very low and low income unit included in the development scenario.
 - b. The public permits and fees costs are estimated at \$2,500 per unit in the substantial rehabilitation scenarios.
- 3. A \$5,000 per unit allowance is provided for marketing and leasing costs.
- 4. The Developer Fee is estimated based on the following assumptions:
 - a. The Developer Fee for the 9% Tax Credit Scenarios is subject to the following requirements:
 - i. In the new development scenario the Developer Fee is equal to the lesser of \$2.0 million or 15% of eligible construction costs.
 - For the substantial rehabilitation scenario the maximum
 Developer Fee is equal to 15% of the eligible rehabilitation costs
 plus 5% of eligible property acquisition costs.

- b. The Developer Fee for the Bonds/4% Tax Credit Scenarios is subject to the following requirements:
 - i. For the new development scenario the maximum Developer Fee is equal to 15% of eligible construction costs. No cap is applied.
 - For the substantial rehabilitation scenario the maximum
 Developer Fee is equal to 15% of the eligible rehabilitation costs
 plus 5% of eligible property acquisition costs.
- c. In the Unleveraged Scenarios the Developer Fee is set at 5% of total construction costs.
- 5. A soft cost contingency allowance equal to 5% of other indirect costs is provided.

Financing Costs

- 1. Construction period interest:
 - a. The interest rate on the construction loan is set at 3.6%.
 - b. The construction period is set at 18 months for the new development scenarios and 12 months for the substantial rehabilitation scenarios.
- 2. The loan origination fees are estimated as follows:
 - a. The fees for the conventional financing scenarios are set at 2.0 points.
 - b. The fees for the Bonds/4% Tax Credit scenarios are set a 2.5 points for the Series A Bonds, and 4.0 points for the Series B Bonds.
- 3. In accordance with the Tax Credit regulations, a three month reserve for operating expenses and debt service is provided.
- 4. Tax Credit fees include a \$2,000 application fee and a \$410 per unit monitoring fee. In addition a fee equal to 4% of the gross Tax Credit proceeds for one year is applied to the 9% Tax Credit Scenarios, and a 1% fee is applied to the Bonds/4% Tax Credit Scenarios.

Stabilized Net Operating Income

Rent Revenue

Chapter 21.15 provides definitions of the maximum household income for very-low, low and moderate income households, but it does not define a standardized rent calculation methodology. For the purposes of this replacement housing analysis, KMA applied the calculation methodology defined in California Health and Safety Code Section 50053 (H&SC 50053).

The gross rents applied in each scenario are set at the more stringent of the H&SC 50053 standard or the rent standards imposed by the outside assistance source. The gross rent is then reduced by the monthly utilities allowances for energy efficient apartments that were put into effect by the Long Beach Housing Authority on December 12, 2018:²

Utilities Allowances		
Studios	\$34	
One Bedroom	\$40	
Two Bedrooms	\$47	
Three Bedrooms	\$54	

9% Tax Credit Scenarios

The rents applied in the 9% Tax Credit scenarios are set to maximize the number of points received in the Tax Credit award competition. To achieve this, and to fulfill the replacement housing obligations, the rent levels are set based on the following standards:

² The utilities allowances assume electric heating, cooking, water heater; other electric; and air conditioning.

Rent Calculation Assumptions – 9% Tax Credit Scenarios			
H&SC Standard	Percentage of Tax Credit Median Income	Percentage of Units	
Very-Low Income	30%	30%	
Low Income	50%	50%	
Moderate Income	60%	20%	

The weighted average rent across the units mix is \$910 per month. This equates to 42% of the Tax Credit median income and 60% of the area median income (AMI) published by the California Department of Housing and Community Development (HCD).

Bonds/4% Tax Credit Scenarios

To meet the requirements imposed by the Bonds/4% Tax Credit Scenarios, KMA allocated 20% of the units to very-low income households. The unit mix is presented in the following table:

Rent Calculation Assumptions – Bonds/4% Tax Credit Scenarios			
H&SC Standard	Percentage of Tax Credit Median Income	Percentage of Units	
Very-Low Income	50%	20%	
Low Income	60%	40%	
Moderate Income	60%	40%	

The weighted average rent across the unit mix is \$983. The translates to 48% of the Tax Credit median income and 67% of the AMI published by HCD.

Unleveraged Scenarios

The Unleveraged Scenarios assume that the only funding sources available to the project are conventional debt financing and the supportable private equity contribution. For analysis purposes, KMA set the income and affordability mix as follows:

Rent Calculation Assumptions – Unleveraged Scenarios		
H&SC Standard	Percentage of HCD AMI	Percentage of Units
Very-Low Income	50%	20%
Low Income	60%	40%
Moderate Income	110%	40%

Vacancy Allowance and Operating Expenses

- 1. A 5% allowance is provided for vacancy and collection costs.
- 2. The general operating expenses are estimated at \$5,000 per unit per year.
- A \$200 per unit per year allowance for social services costs is provided in the 9% Tax Credit Scenarios to enhance the project's competitiveness for a Tax Credit award.
- 4. The property tax expenses are estimated as follows:
 - a. For the 9% Tax Credit and Bonds/4% Tax Credit Scenarios it is assumed that the development team would include a member that is entitled to receive the property tax abatement accorded to non-profit organizations that own and operate apartment projects restricted to low income households.
 - For the Unleveraged Scenarios, the property tax expense is based on the property's value estimated using a 5.5% capitalization rate, and a 1.1% property tax rate.
- Deposits to a reserve for capital repairs are set at \$250 per unit per year for the 9% Tax Credit and Bonds/4% Tax Credit Scenarios, and \$150 per unit per year for the Unleveraged Scenarios.

Underwriting Assumptions

The underwriting assumptions applied in the various scenarios can be described as follows:

- The supportable permanent debt is estimated based on a 125% debt service coverage ratio applied against the stabilized net operating income. The interest rate is set as follows:
 - a. For the conventional financing scenarios the interest rate is set at 6.0%; and
 - b. For the Bonds/4% Tax Credit Scenarios the interest rate is set at 5.0%.
- 2. The equity contribution to the project is estimated as follows:
 - a. The eligible basis in the 9% Tax Credit Scenarios is voluntarily reduced as needed to generate at least a 45% tiebreaker score in the competitive process. The net Tax Credit equity is estimated based on a syndication rate equal to \$.98 per gross Tax Credit dollar.
 - b. The net Tax Credit equity for the Bonds/4% Tax Credit Scenarios is based on a \$.98 per gross Tax Credit dollar syndication rate.
 - c. The supportable equity contribution for the Unleveraged Scenarios is based on the stabilized net operating income minus the annual debt service on the permanent loan, capitalized at an 8% rate.
- Deferred Developer Fees are potentially available as funding sources in the 9% Tax Credit and Bonds/4% Tax Credit Scenarios. The Developer Fee deferral assumptions used in this analysis are:
 - In the 9% Tax Credit Scenarios it is assumed that the developer will defer the portion of the Developer Fee that cannot be included in the Tax Credit eligible basis.
 - b. In the Bonds/4% Tax Credit Scenarios it is assumed that the developer will defer any Developer Fee amount in excess of \$2.5 million.

FINDINGS/RECOMMENDATIONS

Conceptual Pro Forma Analyses

The purpose of the KMA analysis is to identify an in-lieu fee amount that will provide sufficient revenue to fulfill the replacement housing obligations imposed by Section 65590, as codified in Chapter 21.61. The conceptual pro forma analyses described in the preceding section of this analysis provide order-of-magnitude estimates of the financial gaps associated with each scenario being tested.

Conceptual Pro Forma Summary			
Market Rate Conversion	Estimated Development Costs \$21,650,000	Available Funding Sources \$4,467,000	Estimated Financial Gap \$17,183,000
New Development Scenarios			
9% Tax Credit	\$22,121,000	\$13,568,000	\$8,553,000
Bonds/4% Tax Credits	\$23,025,000	\$9,264,000	\$13,761,000
Unleveraged	\$20,860,000	\$4,467,000	\$16,393,000
Substantial Rehabilitation Scenarios			
9% Tax Credit	\$19,560,000	\$13,674,000	\$5,886,000
Bonds/4% Tax Credits	\$19,988,000	\$8,436,000	\$11,552,000
Unleveraged	\$18,624,000	\$4,467,000	\$14,157,000

The results of the conceptual pro forma analyses are summarized in the following table:

The total financial gaps are translated into the gaps per unit in the following table:

Total Financial Gap and Financial Gap Per Unit			
	Total Financial Financial Gap Per Unit		
Market Rate Conversion	\$17,183,000	\$343,700	
New Development Scenarios			
9% Tax Credit	\$8,553,000	\$171,100	
Bonds/4% Tax Credits	\$13,761,000 \$275,2		
Unleveraged	\$16,393,000	\$327,900	
Substantial Rehabilitation Scenarios			
9% Tax Credit	\$5,886,000 \$117,7		
Bonds/4% Tax Credits	\$11,552,000 \$231,0		
Unleveraged	\$14,157,000 \$283,10		

Using a pro rata distribution based on the rent levels supported at each of the household income levels being evaluated, KMA estimated the per unit financial gaps by income category as follows:

Financial Gap by Income Category			
	Very-Low Income	Low Income	Moderate Income
Market Rate Conversion	\$390,000	\$364,000	\$233,000
New Development Scenarios			
9% Tax Credit	\$190,000	\$151,000	\$94,000
Bonds/4% Tax Credits	\$295,000	\$271,000	\$214,000
Unleveraged	\$375,000	\$348,000	\$217,000
Substantial Rehabilitation Scenarios			
9% Tax Credit	\$137,000	\$98,000	\$41,000
Bonds/4% Tax Credits	\$251,000	\$227,000	\$170,000
Unleveraged	\$330,000	\$304,000	\$173,000

As can be seen in the preceding table, the financial gaps fall within the following ranges:

- 1. Very-low income units at \$137,000 to \$390,000 per unit;
- 2. Low income units at \$98,000 to \$364,000 per unit; and
- 3. Moderate income units at \$41,000 to \$233,000 per unit.

The wide range of financial gaps is directly related to the impacts created by the use of outside leveraging sources. As would be expected, the lowest financial gaps are generated by the 9% Tax Credit Scenarios and the highest gaps are associated with the Unleveraged Scenarios.

For reference purposes, the average gaps per unit are estimated as follows:

- 1. Very-low income units at \$281,000 per unit;
- 2. Low income units at \$252,000 per unit; and
- 3. Moderate income units at \$163,000 per unit.

Recommended In-Lieu Fee Schedule

KMA evaluated the characteristics of the scenarios tested in this analysis and concluded that the Substantial Rehabilitation: Unleveraged Scenario is a good surrogate to use in setting in-lieu fees for replacement housing costs. KMA reached this conclusion based on the following factors:

- It is the KMA assumption that small projects will make up the majority of the projects that incur replacement housing obligations under Chapter 21.61. Outside leveraging sources are most typically used for larger scale projects that are undertaken by non-profit and for-profit developers with significant affordable housing experience.
- 2. The estimated financial gap for the Substantial Rehabilitation: Unleveraged Scenario is fairly comparable to the average financial gaps generated by the seven scenarios being tested.

3. The City will have the flexibility to use in-lieu fees revenue to provide assistance to projects being developed by experienced affordable housing developers. The recommended in-lieu fee amounts should be sufficient to fill the financial gaps associated with affordable housing projects that are also accessing outside leveraging sources.

KMA created a recommended in-lieu fee schedule based on the number of bedrooms in the unit. The allocation is based on a combination of the relative size of the units and the rent generated by the units. The recommended in-lieu fee schedule is presented in the following table:

Recommended In-Lieu Fee Schedule										
	Very-Low Income	Low Income	Moderate Income							
Studios	\$241,000	\$222,000	\$127,000							
One Bedroom	\$296,000	\$272,000	\$155,000							
Two Bedrooms	\$350,000	\$322,000	\$183,000							
Three Bedrooms +	\$404,000	\$372,000	\$212,000							

In-Lieu Fee Updates

The in-lieu fee schedule applied in Chapter 21.61.070 should be updated periodically to keep pace with changes in economic conditions. Administrative objectives that should be taken into consideration in selecting an appropriate index for updating the in-lieu fee schedule are as follows:

- 1. The update methodology should be simple and easily administered;
- 2. The terms of the update should be clear and objective, not subject to interpretation; and
- 3. The update should be tied to a readily accessible and neutral third-party published source.

The following table identifies common indices that could be used to adjust the in-lieu fee schedule each year:

Patrick Ure, City of Long Beach Mello Act: Replacement Housing In-Lieu Fee Analysis

Index	Concept / Description	Advantages	Disadvantages
Construction Cost Index (CCI)	Fees go up or down based on changes in building construction costs Published by Engineering News Record (ENR) Available as a national average for 20 cities, including Los Angeles	Very well established Consistent fee burden is imposed relative to changes in construction costs	May not trend with changes in development cost components such as land and soft costs May not trend with the cost associated with producing affordable units
Building Cost Index (BCI)	Also published by ENR and similar to the Construction Cost Index, but with weighting towards structural costs	Very well established Consistent fee burden is imposed relative to changes in construction costs	The CCI is likely the more appropriate of the two ENR indices since it is more closely tracks labor costs
Consumer Price Index (CPI)	Published by the United States Bureau of Labor Statistics. Available for major metropolitan areas	Very well established Tracks with inflation generally Produced by a neutral government agency	May not trend with construction costs, or the cost to produce affordable housing units

Based on the identified advantages and disadvantages of the three common indices, KMA recommends that the CCI be used to adjust the in-lieu fee schedule each year. Then, at set intervals such as every five years, a new replacement housing in-lieu fee analysis should be prepared.

SUMMARY TABLE

MELLO ACT REPLACEMENT HOUSING 2019 IN-LIEU FEE ANALYSIS LONG BEACH, CALIFORNIA

				Financial Gap Per Affordable Unit							
<u>9</u>	Scenario	ا 	Development Cost Per Unit	Very-Low Income	Low Income	Moderate Income					
I. I	MARKET RATE CONVERSION	1	\$433,000	\$390,000	\$364,000	\$233,000					
II			NEW D	EVELOPMENT

CHAPTER 21.61 - MAINTENANCE OF LOW INCOME HOUSING IN THE COASTAL ZONE

21.61.010 - Purpose.

The purpose and intent of this Chapter is to maintain the present number of very low, low and moderate income housing units within the coastal zone and to require that any applicant for a coastal development permit, as a condition of permit issuance, be responsible for replacing existing very low, low and moderate income housing on a oneto-one basis.

21.61.020 - Definitions.

Very low, low and moderate income households and housing units are defined in Chapter 21.15 (Definitions).

21.61.030 - Applicability of this Chapter.

Any applicant proposing to remove existing affordable housing in the coastal zone shall be responsible for replacing on a one-to-one basis all existing very low, low and moderate income housing removed. This provision shall not apply in the following instances:

- A. If the residential structure has been condemned and would require the expenditure of fifty percent (50%) or more of the improvement value, not including land value, to meet applicable building codes; or
- B. If the removal is for the purpose of building two (2) or fewer new residential units, or for converting two (2) or fewer rental units to condominium type units.

21.61.040 - Administration.

A. **Authority.** The administration of the replacement housing program and in-lieu fee payment are delegated to the Housing Authority Director of Development Services, subject to its consent as expressed in a resolution of its governing body. The Housing Authority Development Services Department shall adopt appropriate guidelines for program administration consistent with the intent of this Chapter. The authority may also adopt a fee schedule for the administration of this program as reasonably necessary.

B. Determination.

1. It shall be the responsibility of the Housing Authority Director of Development Services to make all determinations regarding the very low, low and moderate cost housing displaced. In order to avoid short-term actions by the owner to disqualify housing from the very low, low and moderate income definitions, the authority shall develop procedures to average rental Levels over a three (3) year period and to establish fair market sales value based upon prior sales and assessment records.

- 2. Determinations made by the authority Director of Development Services shall be attached by the applicant to the coastal development permit application and shall become a public record in all proceedings and hearings related to that application. The authority Department shall verify the rent/sales value history and insure that there have been no price changes made for the purpose of circumventing these regulations.
- 3. When the units provided under this program are not under the ownership and control of the Housing Authority City, the authority Director of Development Services shall guarantee that the units continue to be made available to very low, low and moderate households. The City authority and the property owner shall enter into an agreement and shall cause necessary covenants and deed restrictions recorded as provided for in Subsections 21.61.080.E and F.

21.61.050 - Responsibility to provide housing.

No coastal permit and no permit to demolish units shall be issued until the applicant has demonstrated compliance with the responsibility to provide replacement units, or has demonstrated the intention to comply with this Chapter prior to occupancy of the new development. No certificate of occupancy shall be issued prior to the satisfaction of this responsibility.

21.61.060 - Method of replacement.

An applicant shall provide replacement housing units by one of the methods outlined in Subsections 21.61.060.A through E.

- A. **On-site—New Units.** The replacement units may be provided on the same site as the units being removed.
- B. Off-site—New Units. Replacement units may be provided at an off-site location approved by the Housing Authority-Director of Development Services. The new units shall be completed and ready for occupancy within three (3) years of issuance of a coastal development permit. To assure performance, the applicant shall post a performance bond in favor of the City in an amount equal to the inlieu fee as specified in Section 21.61.070 required for the number of units being replaced.
- C. **Off-site—Rehabilitated Units.** Replacement units may consist of rehabilitated existing residential units at a site approved by the Housing Authority-Director of Development Services. The units to be rehabilitated shall have been cited as substandard by the City Building Official. Also one (1) of the following shall apply:
 - 1. The units to be rehabilitated must, in the opinion of the Building Official, require an investment equal to at least twenty-five percent (25%) of the

improvement value (total value less land value) of the units to correct the substandard conditions; or

- 2. The applicant may rehabilitate two (2) units for each unit displaced, provided that the existing units are substandard and require an investment equal to at least twelve and one-half percent (12½%)of the improvement value of the units to correct the substandard condition.
- D. **Off-site—Unit Conversion.** Replacement units may be provided through the permanent conversion of existing units to housing for very low, low and moderate income households. The existing units, prior to conversion, must be renting or selling at least twenty percent (20%) above the affordable housing limit of very low and low income housing units displaced and fifteen percent (15%) above the limit of moderate income units displaced.
- E. In-lieu Fees. A developer may choose to pay in-lieu fees rather than provide replacement housing. Fees shall be paid in accordance with the provisions of Section 21.61.070. If the in-lieu fee is selected in a redevelopment project area, the developer shall be credited with the amount of relocation benefit actually paid to displaced residents, up to a maximum of four thousand five hundred dollars (\$4,500.00) per unit, provided that the relocation payments made to displaced residents by the redevelopment agency are subsequently reimbursed by the developer.

21.61.070 - In-lieu fees.

- A. **Payment Schedule.** In-lieu housing replacement fees shall be paid in accordance with the schedule indicated in Table 61-I. The fee shall be paid to the Housing Trust Fund and shall be based on the number, size and income groups served by the displaced units. The schedule in Table 61-1 shall be adjusted annually in accordance with the current Construction Cost Index for the Los Angeles metropolitan area.
- B. **Dispensation of In-lieu Fees.** The Director of Development Services shall place all in-lieu funds received into a special account for very low, low and moderate income housing. The funds must be dispensed within three (3) years from the date of receipt.

Number of Bedrooms in Displaced Unit	Very-Low Income	Low Income	Moderate Income
Studio	\$241,000	\$222,000	\$127,000
1 Bedroom	\$296,000	\$272,000	\$155,000
2 Bedrooms	\$350,000	\$322,000	\$183,000

Table 61-1 In-Lieu Fee Schedule

3+ Bedrooms	\$404,000	\$372,000	\$212,000

Number of Bedrooms in	REQUIRED FEE Type of Housing							
Displaced Unit	Very Low	Low	Moderate I 80—100% ^(a)	Moderate II 100—120% ^(a)				
Zero/1	\$20,000	\$ 15,000	\$10,000	\$10,000				
2	20,000	20,000	15,000	10,000				
3	25,000	20,000	20,000	15,000				
4+	30,000	25,000	20,000	20,000				
(a) Percent of County median income.								

- C. **Inventory of Properties.** The Housing Authority Director of Development Services shall maintain an inventory of properties suitable for rehabilitation, new construction or acquisition within the area specified in Subsection 21.61.080.B.
- D. **Priority.** The Housing Authority Director of Development Services shall seek housing opportunities funded by in-lieu fees in accordance with the following order of priority:
 - 1. Rehabilitation of existing substandard units.
 - 2. Conversion of existing standard market rate units to housing for very low, low and moderate income persons.
 - 3. Construction of new housing for very low, low and moderate income persons.

The intent of this priority order is to maximize the number of affordable units produced so that the number produced will approximate or exceed the number of units lost to displacement. The authority Director of Development Services may alter this priority as deemed reasonable to accomplish the objectives of this Chapter. The Authority Director shall attempt to reproduce affordable units in a mix proportional to the City-wide housing need, as established by the most current adopted general plan housing element and housing assistance plan.

E. Annual Report Required. The Housing Authority Development Services Department shall make an annual report to the City Council on its progress in this program. The report shall include annual and cumulative figures, in size and cost, for the number of housing units lost and the number of units provided by the program, as well as the relationship between program achievements and existing housing needs as established by the housing element and housing assistance plan. This reporting may be integrated into overall annual reporting to City Council regarding the Housing Element.

21.61.080 - Conditions on replacement housing.

A. **Equivalency.** An applicant shall provide replacement housing units which are equivalent to the units displaced in terms of size, measured in the number of bedrooms and income range served, for persons of very low, low and moderate incomes. Subject to the approval of the Housing Authority Director of Development Services, and upon showing that provision of equivalent units is not feasible, an applicant may provide replacement housing in a mix of household sizes and incomes. The mix shall be proportional to the City-wide housing need, as established in the most current general plan housing element and housing assistance plan.

B. Location.

1. Any affordable housing produced through this program shall be located within the City of Long Beach anywhere south of the following line:

Beginning at the Los Angeles River and Anaheim Street; thence east along Anaheim Street to Pacific Coast Highway; thence southeast along Pacific Coast Highway to Seventh Street; thence east along Seventh Street to West Campus Drive; thence north along West Campus Drive to the common boundary between Cal. State Long Beach and the VA Hospital on the north side of the hospital; thence west, north, east and south around the Cal. State Long Beach property line, returning to Seventh Street along East Campus Drive; thence east along Seventh Street to the boundary line between Los Angeles and Orange Counties.

2. The Housing Authority Director of Development Services shall attempt to achieve a reasonable distribution throughout this area in accordance with City General Plan housing element policies.

C. Income Requirements.

- 1. Housing units produced through the replacement program shall be available to households of very low, low and moderate income. To achieve this, each new tenant of rental property and each new buyer of sales property shall first be qualified by the Housing Authority in accordance with procedures set forth by HUD under Section 8 of the Housing Act of 1937, as amended, or similar procedures which take into account annual household income and total household assets.
- 2. Applicants shall be qualified as very low income, low income and moderate income, corresponding to the three (3) classes of housing units (very low, low and moderate) defined in Chapter 21.15 (Definitions).

- D. **Guarantee.** An applicant shall guarantee that replacement housing provided pursuant to Section 21.61.040 will continue to be provided for very low, low and moderate income households. The applicant shall enter into a recorded agreement with the Housing Authority City as specified in Subsections 21.61.060.C and D.
- E. **Rental Units Guarantee.** Affordable housing developed as rental units shall be subject to the following:
 - 1. Prior to the issuance of an occupancy permit, the developer shall enter into an agreement with the Housing Authority Director of Development Services to assure that all units will continue to be rented at prices affordable to very low, low and moderate income renters. The agreement shall bind the developer and any successor in interest to the real property being developed. The agreement shall be recorded as a covenant running with the land, with no prior liens, other than tax liens, for a period extending thirty fifty five(55 30) years from the date the agreement is recorded. The agreement shall provide that either:
 - a. The unit rents shall be fixed at a level affordable to very low, low and moderate income households. The rent may be adjusted annually to reflect changes in the median income. Tenants must qualify as meeting the definition of very low, low and moderate income; or
 - b. The units shall be rented at the fair market rent for new construction as established by the Department of Housing and Urban Development (HUD). The units shall be rented to persons who either meet the standards for rent subsidy established by HUD pursuant to Section 8 of the Housing Act of 1937, as amended, or to persons who meet the requirements of other rent subsidy or funding program that provides rental housing for low income households.
 - c. The developer and all successors in interest shall be subject to period affordable housing covenant monitoring fees as may be established.
 - 2. The developer shall make best efforts to accomplish the intent of this Chapter. Those efforts shall include, but not be limited to, entering into contracts offered by HUD, the Housing Authority, or other such agency administering a rent subsidy program; or, refraining from taking any action to terminate any rent subsidy programs entered into.
 - 3. In the event that any time within thirty fifty five(55 30) years after the agreement is recorded housing subsidies are not available, the developer or his successor shall maintain the rental levels for the unit at amounts no higher than those affordable to persons within the appropriate income categories described in this Title. In the event that so-called Section 8 or comparable maximum rental levels are no longer published by the federal government or local governmental agencies, maximum rental levels shall be a base rent established by the last rental ceiling published for the Section 8 program, adjusted by a percentage to reflect the percentage increase or decrease in median income.
- F. **Sale Unit Guarantee.** Affordable units developed as sale units shall be subject to the following:

- 1. Prior to the issuance of an occupancy permit, the developer shall enter into an agreement with the Housing Authority Director of Development Services to assure that subsequent sales following the initial sale of the unit will be at a price affordable to households earning substantially the same percentage of the median income as the initial purchasers. The agreement shall bind the developer, any successor in interest and all subsequent purchasers of the unit. The agreement shall be recorded as a covenant running with the land, with no prior liens other than tax liens. The agreement shall provide as follows:
 - a. The applicant, his successors and any subsequent purchasers shall give the City and Department of Development Services Housing Authority an option to purchase the units. The authority may assign this option to an individual private purchaser who qualifies as a very low, low or moderate income person and who falls within substantially the same income group as the person for whom the initial sales price was originally established.
- 2. Whenever the applicant or any subsequent owner of the unit wishes to sell or transfer the unit, the applicant shall notify the Authority Director of Development Services of his intent to sell. The authority City shall have the right to exercise the option cited in Subsection 21.61.080.F.1 within one hundred and eighty (180) days of the initial sale of the unit by the developer, or within ninety days for subsequent sales. Following the exercise of the option, escrow shall be opened and closed within ninety (90) days after delivery of the notice to exercise the option.
- 3. The option price paid by the authority City or its designee shall be the original sales price of the unit plus an amount which reflects any increase in the median income since the time of original sale.
- 4. Following the notice of intent to sell the unit, the authority City shall have the right to inspect the premises to determine whether repair or rehabilitation beyond the requirements of general or deferred maintenance is necessary. If such repair or maintenance is necessary, the authority City shall determine the cost of repair, and the cost shall be deducted from the purchase price. The repair costs shall be paid to the authority City, its designee, or contractors chosen by the authority City to carry out the deferred maintenance, and the money received shall be expended in making repairs.
- 5. The purchaser shall not sell, lease, rent, assign or otherwise transfer the property without the expressed written consent of the Housing Authority Director of Development Services. This provision shall not prohibit encumbrancing the property for the sole purpose of securing financing. However, in the event of foreclosure or sale by deed of trust or other involuntary transfer, title to the property shall not be taken subject to the recorded agreement.

21.61.090 - First option.

Any resident displaced by new construction or condominium conversion in the coastal zone shall have the first option to rent or buy affordable housing.

FINDINGS

Maintenance of Low-Income Housing in the Coastal Zone – In-Lieu Fee Zoning Code Amendment (ZCA) Application No. XXXX-XX (ZCAXX-XXX) October 1, 2020

The Long Beach Municipal Code (LBMC) does not require specific findings for the adoption of a Zoning Code Amendment. The proposed Zoning Code Amendment, however, is consistent with state law and guidelines and applicable elements of the City's General Plan; will not adversely affect the character, livability, or appropriate development of the City; and is in conformity with public necessity, convenience, general welfare, and good planning practice. The City of Long Beach makes these findings in support of its adoption of the proposed Maintenance of Low-Income Housing in the Coastal Zone – In-Lieu Fee Zoning Code Amendment.

The Zoning Code Amendment is consistent with objectives, principles, and standards of the General Plan. The Zoning Code Amendment (ZCA) would not conflict with the City's General Plan, the 2010 Strategic Plan, local coastal program, or any other applicable land use plans and policies. The ZCA involves updating the in-lieu fee schedule contained in LBMC 21.61 – Maintenance of Low-Income Housing in the Coastal Zone, to match the full financial gap associated with the construction of deed-restricted affordable housing units. The ZCA is consistent with goals, policies, and strategies in the existing Land Use Element (LUE), Housing Element (HE), and Local Coastal Act (LCP) of the General Plan. Additionally, the ZCA is consistent with the 29 policies adopted by the City Council as part of the 2017 Revenue Tools and Incentives for the Production of Affordable and Workforce Housing, specifically Policy 2.3 which directs staff to conduct a financial analysis and nexus study to review the viability of the Coastal Zone In-Lieu Fee (LBMC 21.61) and consider revisions to the fee structure.

The proposed Zoning Code Amendment will not adversely affect the character, livability, or appropriate development of the City, and is in conformity with public necessity, convenience, general welfare, and good planning practice. As the City's current zoning code has not been substantively updated since 1989, there are many sections of the current code that maintain outdated standards, regulations, and references that affect quality of life in the City and inhibit good planning. The existing ordinance requires projects that result in the demolition of lower-income units to be replaced on an one for one basis, but the fee schedule in Table 61-1, adopted in 1988, has not kept pace with the cost of constructing affordable housing since then. As a result, the in-lieu fee option has become comparatively more attractive than on-site replacement, and these in-lieu fees collected are insufficient to assist in the construction of an equivalent number of replacement units. The proposed change will respond to a community need for affordable housing and a diverse housing stock and is consistent with good planning practice as it furthers the public interest to promote development and investment that is consistent with the General Plan.

The proposed Zoning Code Amendment is consistent and compliant with the California Environmental Quality Act. No adverse environmental impacts are expected as a result of the proposed action. The proposed ordinance only modifies the in-lieu fee schedule to match the full financial gap associated with the construction of affordable replacement housing units in the Coastal Zone. The proposed ordinance does not change the height, intensity of land use, or allowable land uses currently permitted by the underlying zoning and therefore does not result in an increase in overall development nor impact the scale or character of affected areas. In accordance with the California Environmental Quality Act (CEQA) and the CEQA guidelines, this ZCA is categorically exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15305 (Class 5 – Minor Alterations to Land Use Limitations) of the CEQA Guidelines, and none of the exceptions in 15300.2 apply. The ZCA is further exempt pursuant to Section 15061(b)(3) (Common Sense Exemption), as it will not result directly or indirectly in significant environmental impacts. (CE20-090);
