LACRIS - Facial Recognition

LACRIS - Statement of Record

LACRIS Facial Recognition Technology is provided strictly for law enforcement purposes with human review and **additional investigation** needed for each search

...user activity within the system are routinely audited to prevent misuse, and to identify possible training topics for future users

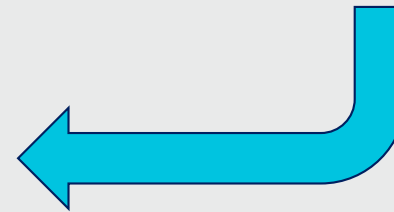

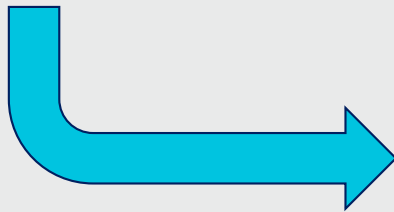

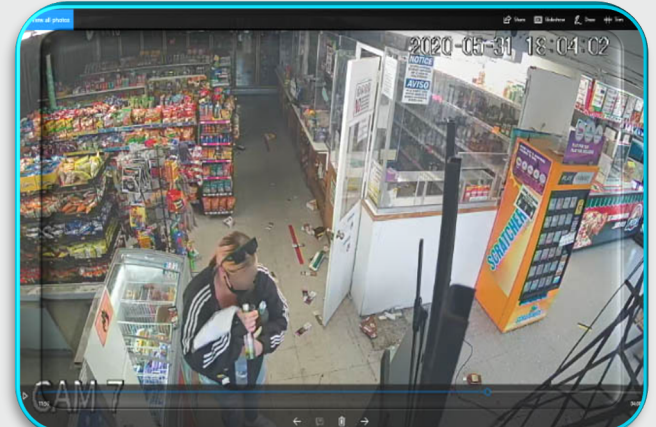

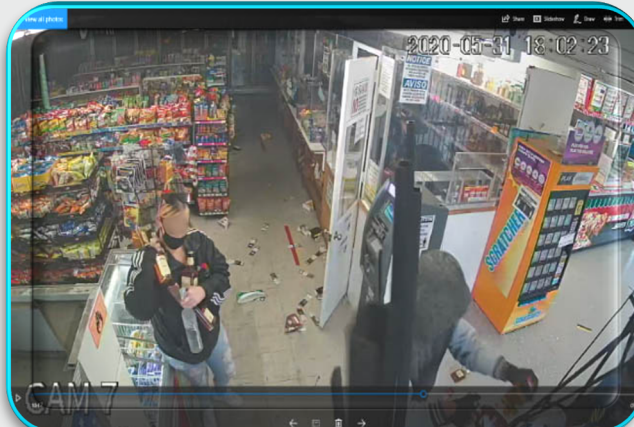

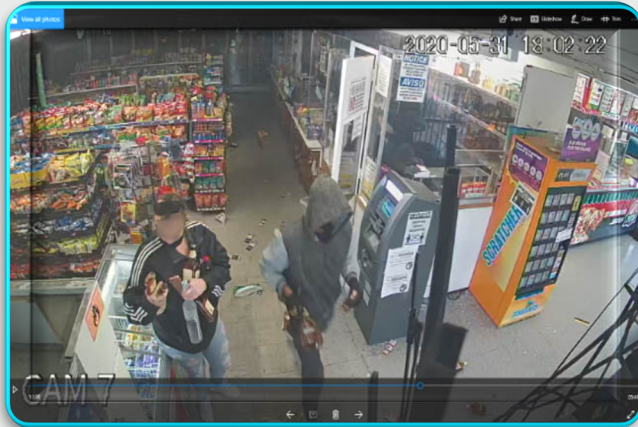

The use of Facial Recognition produces a potential investigative lead and **requires investigative follow-up** to corroborate the lead before any action is taken.

Facial Recognition tools offered to the Los Angeles Law Enforcement community is **not surveillance**. The system does not have the capability to record, ingest, process, scan, or save live video feeds.

Facial Recognition is **not identification**, nor can it be the sole basis of an arrest or detention.
