Subject: Redistricting Partners Inc. Report on 2020 Redistricting Data Update

On August 31, 2021, staff provided a memo on Preliminary Redistricting Data which included the 2020 Census (Legacy) data in the existing City Council districts. The California Statewide Database released the Adjusted 2020 Census Files with the adjusted inmate reallocation on September 20, 2021. Redistricting Partners Inc. has updated the attached report to include the Prison Population Adjustments for the 2020 Census data in the existing City Council districts.

If you have any questions, please contact Bradley Bounds II at (562) 570-6787 or via email at Bradley.Bounds@longbeach.gov.

#### 2010 District Populations

The City of Long Beach last redistricted in 2011 with a council-based process. Materials from that redistricting, including community of interest testimony and draft plans, were provided to the commission in a prior agenda item.

The populations of each district at that time were based on the 2010 Decennial Census. The full redistricting plan was balanced to a deviation standard of 10%, with a specific adherence to a full plan range of +5% / -5%.

2010 Census Population

	Population	Devi	ation
1	49,117	-2,247	-4.4%
2	51,232	-132	-0.3%
3	52,320	956	1.9%

8	53,009	1,645	3.2%
9	53,828	2,464	4.8%
Total	Deviation		9.2%

As the following table shows, utilizing the American Community Survey (ACS) data from the 2006-2010 vintage which would be used in the 2011 redistricting, there was no district which was 50% or more of any single Citizen Voting Age Population (CVAP) ethnic/racial subset.

2010 Citizen Voting Age Population (2006-2010 ACS)

	Total CVAP	CVAP A	CVAP Asian		lack	CVAP Latino

This data in the maps that follow include the white and other small population CVAPs under a title of "CVAP Other," a calculation that represents groups that would not have potential effective concentration in the City of Long Beach.

#### Population Growth and Estimated Deviations

The Statewide Database at UC Berkeley recently released the final census dataset, which identifies the whole count of persons and where they resided as of April 1, 2020. Redistricting Partners has concluded the work of placing this data into the census blocks, block groups, and tracts.<sup>1</sup>

This data represents the whole population data after to a state required reallocation of prison population that was performed by the Statewide Database at UC Berkeley.

The prison population adjustment added 2,158 residents to the city's population when compared to the legacy data that was released in August. The greatest growth was in District 9 which gained 400 residents. The least growth was District 3 which gained only 50 residents.

Including the adjustment, the population change over the last decade ranged from a growth of 2,892 residents in District 7 to the loss of 2,030 residents in District 6.

2020 Census Populations and Growth (2010 Census to 2020 Census)

	2020	2010	Cha	Change		
1	47,710	49,117	-1,407	-2.9%		
2	51,771	51,771 51,232 539		1.1%

9	55,028	53,828	1,200 2.2%			
Total	468,898	462,274	6,624	1.4%		

With a new total population of 468,898, the ideal population for any district would be 52,100.

As the following table shows, the seat with the greatest population is District 7 with a deviation of 5.8% and the district with the lowest population is District 6 with a deviation of -8.9% placing the city at a total of 14.7% deviation, outside of the 10% required deviation range.

<sup>&</sup>lt;sup>1</sup> These counts are based on the 2020 Census geography. There may be slight differences as many census blocks were consolidated.

2020 Total Census Population and Deviations

	Population	Deviation			
1	47,384	-4,476	-8.6%		
2	51,558	-302	-0.6%		
3	53,317	1,457	2.8%

5	51,900	40	0.1%		
6	47,270	-4,590	-8.9%		
7	54,847	2,987	5.8%		
8	54,332	2,472	4.8%		
9	54,628	2,768	5.3%		
Total	Deviation		14.7		

The CVAP Population has grown considerably faster than the overall city population. Based on these estimates, during the 10-year period since the last redistricting, the population of Adult Citizens has grown by 15.5% - significantly higher than the city population as a whole. This increased the share of the population that are eligible voters from 57% of all residents to 65%.

#### **Ethnic and Racial Composition**

The ethnic and racial composition of the city, and each district, can be compared between the 2010 census and the 2020 prison population adjusted census as one way to understand the changing communities. Overall, the city saw the greatest increase among Latino residents at a citywide 7% growth rate.

9	5,057	5,593	11%	10,484	8,620	-18%	31,477	34,350	9%	

The ethnic and racial data used for Voting Rights Act calculations comes from the ACS which has been finalized for the current redistricting cycle. These data show the change in the ethnic composition of districts using a different dataset, one which relies on multi-year averages and is not as prone to wide swings based on single-year counts.

These totals for current CVAP in comparison to the data from 2010 presents the significant rates of growth for each of these protected classes, as can be seen in the following chart. Overall, Adult Citizen growth was 7% among Latinos, 1% among Asians, and there was a loss of 3% among African Americans. Most significant change was the double-digit Latino CVAP growth in Districts 8 and 9, and a shift in two districts, 1 and 9, to more than 45% Latino.
