File #: 18-0154, **Version:** 1

Recommendation to authorize City Manager, or designee, to execute all necessary documents, and any subsequent amendments, with the State Water Resources Control Board to receive and expend grant funding in the amount of \$100,000 to provide beach water quality monitoring from July 1, 2017 through June 30, 2018. (Citywide)

The State mandates that all coastal health jurisdictions conduct weekly bacterial testing of waters adjacent to public beaches that have more than 50,000 visitors annually and are near storm drains that flow in the summer. The State Water Resources Control Board (State Water Board) awarded the City \$100,000 in grant funding to administer the Health and Human Services Department's (Health Department's) Beach Water Quality Monitoring and Public Notification Program. These funds are available to support the current beach water quality testing program, including reimbursement for testing conducted through June 30, 2018, and support continued public notification activities, such as posting weekly recreational water quality sampling results on the Health Department's website and posting warning signs at beaches when bacterial levels exceed State standards. The Health Department exceeds State requirements by conducting year-round testing.

This matter was reviewed by Deputy City Attorney Linda T. Vu on January 29, 2018 and by Revenue Management Officer Geraldine Alejo on February 1, 2018.

City Council action on this matter is not time critical.

The total amount of the agreement is \$100,000 for the period of July 1, 2017 through June 30, 2018. Sufficient funds are currently appropriated in the Health Fund (SR 130) in the Health and Human Services Department (HE). No match or in-kind service mandate is required, and there is no local job impact associated with this recommendation.

Approve recommendation.

KELLY COLOPY
DIRECTOR OF HEALTH AND HUMAN SERVICES

APPROVED:

PATRICK H. WEST
CITY MANAGER
