

Section 6

ACKNOWLEDGMENTS

This section of the Master Plan acknowledges the extensive team of health care and consulting professionals that contributed to its development.

Meetings were held with ISES Corporation and ADAMS Project Management Consulting, LLC to review the study and findings of the Facilities Condition Analysis Reports. The ISES Corporation reports were used to establish the scope of work relating to the infrastructure for the facilities. Reports prepared by Nabih Youssef and Associates and Linscott, Law & Greenspan Engineers were provided by the hospital and were used to establish direction for the structural status and parking analysis of the hospital. Existing project information was provided by the architects working on those projects and by the hospital. All relevant information resulting from preparation of the Draft Environmental Impact Report (EIR) and supporting technical appendices was integrated into this 2005 Master Plan.
