**RE: LED Conversion Phase 4B – Marine Park**

Mr. Solhjoui,

City Light & Power, Inc. (CLP) is pleased to submit a proposal to install LED fixtures in Marine Park in the City of Long Beach. A detailed description is listed below.

CLP will remove the existing high pressure sodium (HPS) cobra-head fixtures and replace them with light emitting diode (LED) cobra-head fixtures. These cobra head fixtures are in a parking lot and will include occupancy motion sensors to qualify for SCE's rebates and On-Bill Financing (OBF). Once the lights are converted, CLP will energize the circuits to ensure the lights are working properly. All lights will have a CCT/Kelvin rating of 4000K as directed by the City of Long Beach. CLP's pricing is based on fixtures selected by the City of Long Beach and their consultants.
