## GOING GREEN!

All of the barrels we use are recycled food grade barrels. We purchase these barrels prior to them being disposed of into landfills. We are doing our part to not only prevent this process from occurring but to once again give life to these barrels in another beneficial product. It is a WIN – WIN situation all the way around. Please help our environment by not only saving water, but by keeping these barrels out of landfills.

*We believe...*

*“Water is the  
Petroleum of the 21<sup>st</sup> Century”*

We all can make a difference within our community. Looking forward to working with you.
