**RE: Bluff Park Historic Lamppost Project – Temple Ave. (Phase 2)**

Ms. Williams,

City Light & Power, Inc. (CLP) is pleased to submit a proposal to remove the existing concrete street light poles and install decorative post top street lights on Temple Ave. between Ocean Blvd. and Broadway. A detailed description is listed below.

CLP will remove (9) existing concrete street light poles and install (10) customer-provided decorative post top (PT) poles, fixture housings and LED kits. CLP will bore and install conduit in two locations on the eastside of Temple Ave. to accommodate new locations. CLP will install concrete bases for all poles and will utilize the existing wire for the poles installed adjacent to the existing location and will pull in new wire at all new locations. Additional pull boxes will be installed for bore crossings, new PT poles and to cover the removed street light bases. Once completed, CLP will energize the circuits to ensure all lights are operating properly.

Pricing for this project is **Ninety Thousand Nine Hundred Ninety Dollars (\$90,990)**.

Notes:

1. City of Long Beach to provide new pole, fixture and anchor bolts.
2. CLP to provide LED kits.
3. City of Long Beach Public Works will need to approve the street light pole, fixture, wattage specification as well as the location of the new street lights.
4. Pricing based on Job Walk conducted on January 23, 2020 and Bluff Park Neighborhood Association provided drawing dated December 12, 2019.

If you agree with the above scope of work and would like to proceed with the project, please sign below email it to my attention. If you have any questions, please call me at (562) 216-2151.

Sincerely,

Shannon Mockridge  
Regional Manager
