## RECOMMENDATION:

Approve a Site Plan Review for the western phase of the Shoreline Gateway Project, consisting of a 17-story, 224-unit residential tower with 9,182 square feet of retail space and 275 parking spaces, at 635 East Ocean Boulevard located in PD-30 (Downtown Plan). (District 2)

APPLICANT: Shoreline Gateway, LLC  
6701 Center Drive West, Suite 710  
Los Angeles, CA 90045  
(Application No.1304-12)

## DISCUSSION

The subject property is 0.7-acre site located at the northwest corner of Ocean Boulevard and Lime Avenue (Exhibit A – Location Map) and is currently developed with a vacant 33-unit apartment building and surface parking lot. The applicant is requesting approval of a Site Plan Review application for the western phase of the Shoreline Gateway project that consists of a 17-story, 224-unit residential tower with 9,182 square feet of retail space and 275 parking spaces.

Following is the history of key milestones related to the proposed project:

- July 2006 – The Redevelopment Agency Board certified EIR 18-05 for the originally designed 3-building, 358-unit project.
- November 5, 2007 – The Redevelopment Agency Board certified a Supplemental EIR and Stage III design approval was granted.
- July 2007 – The revised project was presented to the Planning Commission as an information item.
- November 15, 2007 – Planning Commission approved the Shoreline Gateway Master Plan that included a Tentative Tract Map, General Plan Conformity Finding, Administrative Use Permit and Site Plan Review for the 35-story east tower. These

entitlements are still in effect. It was anticipated that the east tower would be developed as phase 1; as such, Site Plan Review for the west tower was not granted at this time.

- December 2011– The Downtown Plan EIR was certified.
- January 2012 - The Downtown Plan was approved by the City Council and went into effect in February 2012. The plan included design guidelines to increase the quality of design and materials used throughout the Downtown area. In addition, the Downtown Plan revised parking standards for both residential and commercial land uses.
- February 2012 – The Long Beach Redevelopment Agency is dissolved pursuant to State Legislation AB 1X 26.
- March 2013 – The State of California Department of Finance approved the Amended and Restated Owner Participation agreement between the City of Long Beach Successor Agency and the applicant to allow the property transaction to move forward.

The project as proposed is designed to meet all Downtown Plan design guidelines and standards that address scale and massing by building type, context, architectural design and a list of allowable building materials. The guidelines were the basis for all of the discussions that staff had with the applicant team as the design of the proposed project progressed.

The proposed design is contemporary in style and utilizes smooth cement panels, architectural pre-cast panels, aluminum panels and glass as the primary materials (Exhibit B – Plans and Exhibits). The building is designed to provide visual interest from all four sides by including varying materials, colors and architectural planes and is complementary to the previously approved 35-story east tower.

The proposed project complies with all Downtown Plan requirements. Following is an analysis of the code requirements and the proposed project:

Code Standard	Downtown Plan	Proposed Project	Complies with Standard?
Height	500'	189'-4"	Yes
Parking	261 required	275 provided	Yes
Setbacks-			
Front (Ocean Boulevard)	0'	0'	Yes
Rear (alley from centerline)	10'	10' (min)	Yes
Side (alley from centerline)	10'	10' (min)	Yes
Common Open Space	6,080 sq. ft.	8,215 sq. ft.	Yes
Private Open Space	36 sq. ft./50 % of units	36 sq. ft/unit (min)	Yes

Ingress/egress to the site is provided from Broadway Court via two access points into the parking garage. The project is required to provide 261 on-site parking spaces per code based on the requirement of 1.25 parking spaces/residential unit (280 spaces) minus a five percent Transit Oriented Development credit (14 spaces). A total of 275 parking spaces are provided within the subterranean garage.

### CONCLUSION

This project represents the first major residential project proposed under the new Downtown Plan and the applicant team has worked with the City to refine the project by using the Downtown Plan design standards and guidelines. Construction of the proposed project will result in a quality building that fits well within the context of the area and provides a strong presence along Ocean Boulevard. Therefore, staff recommends approval of the project, subject to conditions (Exhibit C – Findings and Conditions).

### ENVIRONMENTAL REVIEW

The proposed Site Plan Review does not result in any additional impacts that were identified in either the previously certified project Environmental Impact Report (EIR 18-05) or the Downtown Plan Program EIR. Therefore, in accordance with the Guidelines for Implementation of the California Environmental Quality Act (CEQA), this project was previously assessed.

### RECOMMENDATION:

Find the proposed subterranean vacations of the eastern 3.5 feet of Broadway Court between Ocean Boulevard and Bronce Way, and a 560-square-foot section of Lime Avenue at the western terminus of Medio Street in conformance with the adopted goals and policies of the City's General Plan. (District 2)

APPLICANT: Shoreline Gateway, LLC  
c/o Ryan Altoon  
6701 Center Drive West, Suite 710  
(Case No. 1309-16)

### DISCUSSION

Pursuant to California Government Code Section 65402, no street, parcel or alley may be vacated until such action has been submitted to, and reported upon by the Planning Commission as to its conformity with the adopted General Plan. The proposed public right-of-way vacation is herein submitted for such review.

The applicant requests subterranean vacations of the eastern 3.5 feet of Broadway Court between Ocean Boulevard and Bronce Way, and a 560-square-foot portion of Lime Avenue at the western terminus of Medio Street (Exhibit A- Street Vacation Plan). The vacations will accommodate a portion of the subterranean parking structure for the West Phase of the Shoreline Gateway project. The proposed vacations have been reviewed by the Long Beach Public Works Department after consultation with other interested City departments.

A finding of conformity shall be made when the proposed re-use of the property conforms to the maps and policies of the General Plan. The General Plan consists of eleven elements and each element of the General Plan carries the same authority concerning land use issues. All elements of the General Plan were considered and staff finds this vacation in conformance with all the elements of the General Plan. A review of

the relevant elements and specific General Plan consistency findings are presented below:

General Plan Consistency Findings

The Land Use Element divides the City into 21 land use districts, which provide general guidance as to the type and density of land uses considered appropriate. The subject site is located within Land Use District No. 7 (Mixed Use). The Land Use Element states that "a careful blending of different types of land uses can serve to save time and energy in transportation and communications, simplify and shorten transactions of goods and services, vitalize a site, and give it more importance in the urban structure of the City". The proposed subterranean vacation will allow the West Phase of the Shoreline Gateway project to be constructed as approved without interfering with public access. Therefore, the proposed subterranean vacation is consistent with the Land Use Element.

ENVIRONMENTAL REVIEW

The proposed General Plan Conformity Finding does not result in any additional impacts that were identified in either the previously certified project Environmental Impact Report (EIR 18-05) or the Downtown Plan Program EIR. Therefore, in accordance with the Guidelines for Implementation of the California Environmental Quality Act (CEQA), this project was previously assessed.
