Agenda For a More Imaginative Park Construction

- ① A miniature golf course with the "American Revolution" theme to be managed and built by private enterprise. This is a profit venture that has been proven in other cities secure. (We once had "Shady Acres" that had longevity and profit to recommend it.)
- ② To defray costs oil wells on ground level with a iron grill over them and further hidden by Juniper trees would like the latter. Defray costs for the park.
- ③ A jet that will be turned into junk by the military as it is obsolete. To be put in the park for fun, the steering wheel retained and some of the controls. Such a project, visionary, is an adventure and representative of Boeing that is the forefront of airplane building and employs more people here than any other industry.
- ④ Nearby a trampoline for the youngster too, with swings and sand box.
- ⑤ A waterfall and flowered area for family and wedding pictures as background.
- ⑥ A path way around the park for skaters boarding and across, and area set aside for walking a dog and caring for fecal matter.
- ⑦ A Linguistic Center for those with communicative problems, and Asian and Mexican literature in the stacks for Asian and American to study and improve on for those not native to our land in writing and speech.
 can be addressed needs. disorder
