d. UTM: Zone: 11 ; mE/ mN (G.P.S.)

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate) APN# 7207-013-033

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a one-story rectangular apartment building (duplex) with a hipped roof; it was constructed in 1956. The building is clad in stucco and the roof has composition shingles. Fenestration consists of wood-framed, double-hung windows on all sides. The two primary entrances are on the south façade. The porch consists of simple roof extensions and concrete steps. The building is in fair condition. This resource currently does not meet the 50-year threshold for evaluation for the National Register of Historic Places, and therefore, must be considered under Criteria Consideration G. This resource is not of "exceptional importance" or "a contributing part of a National Register eligible district," therefore, it is not eligible for the National Register under Criteria Consideration G.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story Craftsman bungalow with a front-gabled roof; it was built in 1920/1922. The building is clad in horizontal wood siding and has a composition shingle roof. The primary entrance is on the west façade and is characterized by a front-gabled room addition. The front door is located on the southwest corner of the building and is characterized by a small cement porch with a roof overhang supported by a square beam. Fenestration consists of double-hung wood windows on all sides. In addition, the south façade is characterized by a bay window with double-hung windows. Although this house is in fair condition, it is not eligible for the National Register under any of the significance criteria. Under Criterion A, the resource is not associated with any events that have made a significant contribution to the broad patterns of our history. Under Criterion B, the resource is not associated with the lives of any significant persons, or likely to yield information important to history (Criterion D). In addition, this resource does not have distinctive characteristics of a type, period or method of construction, or represent the work of a master (Criterion C).

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource consists of two single-family houses located on the parcel. The front house is a single-story house constructed in 1948. The house is rectangular in mass and has horizontal wood siding and a side-gabled roof. Fenestration consists of wood-framed, double-hung windows. The rear house is also one-story with a side-gabled roof; it was constructed in 1955. The rear building was constructed to match the style of the original house. Although the houses are in fair condition, the buildings are not eligible for the National Register under any of the significance criteria. Under Criterion A, the resource is not associated with any events that have made a significant contribution to the broad patterns of our history. Under Criterion B, the resource is not associated with the lives of any significant persons, or likely to yield information important to history (Criterion D). In addition, this resource does not have distinctive characteristics of a type, period or method of construction, or represent the work of a master (Criterion C).

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate) APN# 7207-011-032

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story rectangular Victorian house with a hipped roof; it was constructed in 1909. The building is clad in horizontal wood siding and has a wood shingle roof. The primary entrance is on the west façade and has a small front-gabled porch. A wooden sign hangs over the door that says "Bergendahl." The primary façade is characterized by two wood-framed fixed windows on the north end and a bay window with three metal-framed windows (one sliding and two fixed) on the south end. A brick veneer covers the bottom 1/3 of the primary façade. The south façade has five windows which appear to be wood framed. The north façade has four windows-all of which have been replaced by metal-framed windows. This resource appears to be in fair condition and may be eligible for the NRHP. The construction of the resource may meet Criterion C, as it may possess distinctive characteristics of a type, period, or method of construction, or represent the work of a master. Further analysis is warranted to make this determination.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story house that is currently being used as a medical office for the Children's Clinic portion of the Long Beach Memorial Medical Center complex. According to the County of Los Angeles Assessor's Office, the building was constructed in 1941; however, the building has the characteristics of a Craftsman bungalow, typically constructed between 1905 and 1930. The building is clad in horizontal wood siding and has a front-gabled composition shingle roof. The front porch is located on the east façade and has a separate gabled element that is supported by square columns. The front door is wooden and has a metal security door. Large vinyl windows are on either side of the front door. Brick veneer adorns the lower 1/3rd of the primary façade; it appears to be a recent addition. The windows on the north and south façades have been replaced with metal-framed, sliding windows. A two car garage is located to the rear of the building. Although the resource is in fair condition, it is not eligible for the National Register. The building is not associated with any events that have made a significant contribution to the broad patterns of our history (Criterion A), associated with the lives of any significant persons (Criterion B), or likely to yield information important to history. In addition, this resource does not have distinctive characteristics of a type, period or method of construction, or represent the work of a master (Criterion C).

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story Craftsman bungalow that is currently being used as a medical office for the Pediatric Infectious Diseases portion of the Long Beach Memorial Medical Center complex. It was constructed between 1922 and 1928. The building is clad in stucco and has a front-gabled composition shingle roof. The primary entrance is on the east façade and is characterized by a porch that extends partially across the front of the house. The front door is wood framed with a metal screen door. There is one metal-framed sliding window on either side of the front door. The north and south facades are characterized by two metal-framed sliding windows on each side. All of the windows are covered by metal security bars. A one-car garage is located to the rear of the building. Although the resource is in fair condition, it is not eligible for the National Register. The building is not associated with any events that have made a significant contribution to the broad patterns of our history (Criterion A), associated with the lives of any significant persons (Criterion B), or likely to yield information important to history. In addition, this resource does not have distinctive characteristics of a type, period or method of construction, or represent the work of a master (Criterion C).

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story Craftsman bungalow with a front-gabled roof; it was built ca. 1905-1930. The building is clad in horizontal wood siding and has a composition shingle roof. The primary entrance is on the west façade and is characterized by a front-gabled porch with square columns. The front door is in the center of the west façade and one large fixed multi-pane window is on either side of the front door. The front door appears to be original to the house and is characterized by detailed geometric woodwork. The north façade has several wood framed double-hung windows and a side entrance with two fixed 12-pane-wood-framed windows, and one 18-pane glass and wood door. The east façade has a metal screened porch that appears to be an addition to the house. This house appears to be in good condition and may be eligible for the NRHP under Criterion C, as it may possess distinctive characteristics of a type, period, or method of construction, or represent the work of a master. Further analysis is warranted to make this determination.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource is a single-story, ranch-style building that houses the Memorial OB/GYN Clinic; it was built in 1959. The building is situated in the southeast corner of the Long Beach Memorial Medical Center complex. The building is a rectangular-shaped mass with an east and a west wing; the middle section of the building is square-shaped. The building is clad with vertical wood siding on all sides and has a wood shingle roof. The east and west wings have pitched roofs; the middle section roof is hipped. The primary façade is located on the north side of the building and contains the entrances to the three suites of the building. Fenestration on the north façade consists of metal-framed sliding windows and several large-sized, wood-framed, fixed glass windows. Fenestration on the west façade consists of two metal-framed sliding windows. An air-conditioning unit is situated on the ground, adjacent to the west façade; it is screened from view by a six-foot-tall wooden fence. The south façade does not have any doors or windows; however, the south façade of the east wing does contain two vertical bands of split rock veneer. The east façade does not have any doors or windows. This resource currently does not meet the 50-year threshold for evaluation for the National Register of Historic Places (National Register), and therefore, must be considered under Criteria Consideration G. This resource is not of "exceptional importance" or "a contributing part of a National Register eligible district", therefore, it is not eligible for the National Register under Criteria Consideration G.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The resource consists of two L-shaped, two-story apartment buildings constructed in 1960. The two buildings form a rectangular mass with an open courtyard in the center; the building is oriented to the south. The façade of each building is constructed of brick that has been painted white. Several vertical bands of bricks adorn run from the ground to the roof on both sides of the metal-framed sliding windows. The roof is flat. The ends of each building do not have any windows.

This resource currently does not meet the 50-year threshold for evaluation for the National Register of Historic Places (National Register), and therefore, must be considered under Criteria Consideration G. This resource is not of "exceptional importance" or "a contributing part of a National Register eligible district", therefore, it is not eligible for the National Register under Criteria Consideration G.
