BELMONT SHORE PARKING AND BUSINESS IMPROVEMENT AREA COMMISSION MEMBERS

City of Long Beach
California

REFERENCE: 14-037BS

SUBJECT: Recommendation to approve expenditure of \$95,000 for purchase and installation of 16 public security cameras on 2nd Street in Belmont Shore.

DISCUSSION

The Belmont Shore Parking and Business Improvement Area Advisory Commission (BSPBIAAC) is pursuing installation of public security cameras on 2nd Street in Belmont Shore. The boundaries for the Belmont Shore Parking and Business Improvement Area include 2nd Street from East Livingston Drive to Bay Shore Avenue.

Since 2012 there have been several presentations made to the commission, as well as the formation of an ad hoc subcommittee that included input from City Tech Services and Long Beach Police Department staff. These efforts initially resulted in commission approval of installation of 14 cameras on 2nd Street at a cost not to exceed \$70,000. Subsequent ad hoc subcommittee meetings resulted in the recommendation of installing 16 security cameras, as well as the decision for the Tech Services staff to go out to bid for purchase of the hardware. The initial cost estimate would necessarily be exceeded due to, among other factors, the increased number of cameras. The installation cost will be covered by the City.

After a second bid attempt, the lowest proposed cost from the most qualified bidder resulted in the contract being awarded at a cost of \$95,000 for all necessary hardware. A detailed security camera parts list can be found in the attachment. The two fixed cameras (located on Granada Avenue), as well as the 14 other pan/tilt/zoom (PTZ) cameras will all utilize high definition technology (HD 1080P models). The City's Financial Management Department is in the process of creating a purchase order. Once the purchase order has been created, it is estimated that it will take approximately 30 days to receive the parts, and an additional 30 days for installation.

RECOMMENDATION

Approve recommendation.
