Your land use decisions directly affect us. You have got to become more outspoken about the very specific responsibilities of this committee. Please inform the city council tonight that they cannot continue to contribute to environmental disasters by permitting a self storage facility with parking for nearly 600 RV's right next to the river. What happened to your commitment to open space; our health &amp; equity? These poor land use decisions are NOT sustainable. Do not approve the ordinance tonite. The property is in escrow. The buyer took a risk in acquiring it. Please demand a full EIR. Allowing this use adds to heat island effect, eliminates habitat, &amp; denies the public open space. Stop adding to the climate issues. The city has to do a better job for us. Use your CAAP.</p>	4/19/2021

<p>PUBLIC COMMENT</p>	Michelle Baker	michellebaker199@gmail.com						<p>As a resident of Long Beach for over 10 years, I am shocked by the amount of litter in the city. We need to address the litter on the streets, beach and on Ocean. We need to educate the community about the trash and picking up litter. This hurts our birds and fish when we litter. Please make this a priority.</p>	4/17/2021

PUBLIC COMMENT	Gregory Perkins	gperkins@glendale.edu						I wish to comment in support of Item R 10 to establish a comprehensive and consistent program of tree replacement for the City of Long Beach to allow all residents to request trees to be planted in any areas previously occupied by trees that have been removed within the past ten years, if possible, as an affirmative means of combating global warming due to carbon emissions. This is a practical way to beautify the city and achieve carbon credits.	4/15/2021
