**RE: Install a New Street Light & Upgrade Fixture on Existing Street Light at the Intersection of Clark Ave. & Garford St.**

Dear Mr. Christoffels:

City Light & Power, Inc. (CLP) is pleased to submit a proposal to install a new street light and upgrade an existing light at the intersection of Clark Ave. & Garford St. A detailed description is listed below.

CLP will excavate and install a new concrete street light pole base at the northeast corner of Clark & Garford which will include the installation of anchor bolts. Once the concrete has cured, CLP will install a new 31' concrete street light pole with 6' arm and a 150 watt high pressure sodium (HPS) fixture. This street light will be serviced by an overhead feed consistent with the other street lights in the area. CLP will also upgrade the existing 70 watt HPS fixture on the southeast corner of Clark & Garford to a 150 watt HPS fixture. The cost to complete this project is Five Thousand Five Hundred Eighty-Five Dollars (\$5,585).

If you agree with the above scope of work and would like to proceed with the project, please sign below and fax or email it to my attention so that we may schedule the work.

If you have any questions, please call me at (562) 216-2159.

Sincerely,  
CITY LIGHT & POWER, INC.
