Subject: Public Safety Committee

-EXTERNAL-

When will an open forum be presented to the public? I would like to discuss the use of L-RAD's within the City of Long Beach by public safety personnel. These are dangerous devices that have been outlawed by the World Health Organization. I believe Officers who live at addresses [REDACTED] and another Officer at [REDACTED] are using an L-RAD and have been purposely harassing my family and have injured others in they're cowardly misuse of this dangerous weapon!

There is dire need to discuss this situation before another neighbor is seriously injured or maimed or killed! Another neighbor died a few months ago and I believe another neighbor was using an L-RAD and was intentionally pointing the L-RAD at my neighbor for two days hurting her before she died! Her name was Diane Doctin and her life mattered! The people of Long Beach need to know what these illegal weapons are and who in Public Safety have these weapons in our community! Do the police and Fire Department have L-RAD's? I was told by a Sargent that the Long Beach Police do not have an L-RAD! Is this true?

My family is being targeted by unknown assailants and the police did respond to my call for help and a public service officer told me she discussed with other officers that an L-RAD was probably being used to hurt, harass and intimidate us! I have been hospitalized numerous times! Six of my neighbors have suddenly died! We could feel a painful electrical radio wave through our home when our neighbor Diane was killed. The same sensations when our neighbors named Alfonso and Tom across the street died. This new technology must be harnessed and precautions made stopping these felonious assaults against people in our community and new regulations that would enable a quick response if attacks occur within the City of Long Beach. Currently there isn't any way to determine who has a L-RAD or who is using the L-RAD in my neighborhood. If there is a current narrative being discussed about the use of these devices then there should be a means of determining where these devices are located.

CounterTerrorism Detective John McBride has told me there is a significant presence of RF Energy and Electromagnetic Energy in my neighborhood as per his investigation into the matter but McBride was unable to determine the location of the device being used to cause us harm even though he borrowed a van from SCE loaded with high-tech gear supposedly to be able to help him navigate the new high-tech terrain he was investigating. I shared my belief whom I thought was behind these attacks but McBride was unable to confirm due to his inability to secure the high-tech equipment that he needed to complete his investigation. Since I wasn't offered a copy of any report or told by McBride that a report was actually filed I feel he might have been lying and covering up these incidents in order to protect others in the police department! McBride has since retired. Please respond to this email asap!

My neighbors have died! Teresita who lost her husband Alfonso told me her son who is a police officer told her not to say anything about her losing Alfonso because it would look bad for the police department! What does this mean..look bad?

I have email Chief Luna my concerns but this terror is continuing and my wife and I fear for our lives! Is there anything concrete the city can offer us guaranteeing our safety? I thought I was going to die last night because of these L-RAD being used in our neighborhood! Should I stage a protest with all the family members that have lost a loved one and contact the newspapers to cover this coverup? I count more than eight people within a fifty-yard radius of our home that have died or have been maimed! How many more have died the next block over?

Thank You,

Thomas Shirer
