Subject: Reflections upon what the Public Records reveal

On the day this individual was attending the City Planning Commission Meeting dealing with the needed steps to improve the PCH& Second Street...in a manner which would best protect the Palm Trees and our feathered friends...

There was an item which dealt with a pending project in one of the Council Districts represented by he with the earlier referenced, diseased and demented mind set..which mirrors that of his fellow traveler in the Eight District ..said mindsets capturing the attention of the LA County Child Protection Services...and quite possibly the US Dept

The information presented by those in OPPOSED by long time residents was that the population of the problematic 9th District ..HAD THE LOWEST LIFE EXPECTANCY (any residents in the City of Long Beach!!!!

Further reflections of the number of previous Elected Officials (With the noted exception of a Councilman with a stellar record including being a former Law Enforcement Official..who also had mastered the Solar Power paradigm) together with the numbers of residents who like the current Councilman and his Fellow Traveler from DISEASED & DEMENTED view relative to how men should treat women...strongly suggest.....

Combine the above number of impacted residents. with those in a yet another Council District who per the LBPD records indicate their Councilperson is so diseased and demented..that said Councilperson..failed to grasp the well recognized paradigm of the such Elected Officials..may NOT fish off the Company Pier..with their Staff members....TOLLS to the FACT...that ONE THIRD OF THE POPULATION of our own Fair Hamlet by the Sea...is represented by those with DISEASED & DEMENTED mi
