

This is our **MUNCHER** prototype which you will view at our demonstration. <http://youtu.be/DdxELnTs78Y>

Witness **NEW SCIENCE!**

A demonstration of the *patented* **TOTALLY AEROBIC** 30 MINUTE MUNCHER PROCESS for reducing all types of waste. Time and date below.

This week Reps from the Indian Nation have said they are coming for the demonstration. They want the machine for their casinos and farms. Other people have also checked in are planning to attend.

Some of our last attendees were from:

The US Nuclear Agency which were very concerned regarding the Mercury presently entering our water supply.

A very large well known Fertilizer company declared their customers complain about the dystopian aroma of their product. Said our process solves their problem.

Government Representatives from Mexico are worried regarding their Waste Water Sewage Systems. Their systems patterned after US Sewage systems are failing and polluting their country. They unequivocal stated, our process eliminates two out of three sections of their present TERNARY process and is more cost effective while not polluting. Plus this method produces saleable products. They requested a conference in Mexico to discuss our methods, and how to assist them in upgrading their present sewage system.

Representatives from the Liquor Industry now declared with our system, they found a method of disposing their waste while making a profit.

The Science Officer from U. S. Congressman Dana Rohrabacher, had a very lengthily discourse not only how well our Muncher would clean the environment of future trash but also rid the country of the present land fills.

He also mentioned the clear and present danger of mercury light bulbs in our land fills which are polluting our drinking water with this toxic metal. We have developed a separate method which

would vastly deplete the Hg from trash, and the liquid metal would be recovered, then sold at a profit.

A very interesting point, U.S. Congressman Rohrabacher or a member of his staff and the City of Santa Monica are the only Public Representatives who have taken the time to view our new science not once, but twice. All were impressed with the function and science of our process.

This statement from the Largest Amusement Park in the World, Disneyland. After watching our process, they commented, "The amount of food and waste processed each day at the parks, our MUNCHER will solve their total problem for trash, reduce costs and give them the necessary fertilizers to maintain their entire parks.

This demonstration we shall treat:

**5 gallons of dog defecation,
14 gallons of 2 week old rotting fish in plastic bags.
5 gallons of fresh horse manure,
Green waste,**

**Rotten meat,
Plastics,
MSW, Municipal Solid Waste.**

**All components shall be mixed, then processed
and converted into usable products.**

**Do not confuse our method with the old aerobic
anaerobic or incinerating processes which produces
toxic explosive gasses, causes destruction to engine
parts and HUMAN HEALTH!**

**Our Process reduces all Nitrogen Compounds,
SULPHUR, all organic, many toxic materials, and some
inorganic compounds AEROBICALLY!**

NO CH₄, H₂S, SO₂ or other pollutants are formed.
No Toxic gas or smells are created.

**Our Compost and liquid Plant Trace Elements are ready
to SELL in 30 to 45 minutes after waste enters the
MUNCHER.**

**No need to TRANSPORT OR COMPOST the cake for an
additional 30 to 60 days.**

**The commodities are ready to use once they are
removed from the Machine.**

1. Activated Compost is ready for use.

2. Activated Mulch is ready to use.

3. Activated Liquid Plant Trace Elements are ready to use.

The three commodities will increase food crops up to 30 percent.

No pollution either in the air, ground or water with our method

Extremely Cost Effective

All products are resalable

Can be employed for remediation of Present Land Fills, which presently are leaking toxins into the aquifer.

Other products such as Bio Fuel, Omega 3 and Omega 6 can be produced by the MUNCHER output.

Totally Eliminates the need for:

Land Fills!

Ocean dumping!

Incineration!

Crematoriums!

Present day configuration of Sewage Treatment Plants!

**DEMONSTRATION: WEDNESDAY 18 MAY
2011**

Commencing time: 1200

**Address: 1545 West 134th Street, Gardena, California
90249 (Industrial Complex)**

Please visit our web site.

Please RSVP to: Snake@hdltd.com or call **562 428 9973** between the hours of 0930 to 1700 Monday to Friday.

Samples of our effluent and Finished Compost are given to any one who desired.

We are able to reduce CONCRETE to SAND and GRAVEL without noisy and dusty grinding using an additional process.

NITROGEN BASED EXPLOSIVES, OIL, PAINT, GREASE
AND ALL FUELS WITH OUR PRE-TREATMENT, CAN
ALSO BE REDUCED IN THE **MUNCHER** with no ill effects
to Humans or the Environment.

Bring your questions and cameras

Respectfully submitted
