

**Date:** January 12, 2010  
**To:** Honorable Mayor and City Council  
**From:** Councilmember Gary DeLong, Chair, Federal Legislation Committee  
**Subject:** **2010 FEDERAL LEGISLATIVE AGENDA**

---

The Federal Legislation Committee, at its meeting held Tuesday, December 7, 2009 considered communications relative to the above subject.

It is the recommendation of the Federal Legislation Committee that the City Council concur in the recommendations of the Committee to approve the 2010 Federal Legislative Agenda.

Respectfully submitted,

FEDERAL LEGISLATION COMMITTEE

---

Councilmember Gary DeLong, Chair

Prepared by:  
Gloria Harper

**Date:** November 23, 2009

**To:** Federal Legislation Committee Members

**From:** Patrick H. West, City Manager

**Subject:** Recommended Changes to the 2010 Federal Legislative Agenda

---

Each year, City staff reviews the Federal Legislative Agenda and recommends changes to the Federal Legislation Committee and the City Council to ensure the agenda is up-to-date and addresses the legislative concerns of the City. The 2009 agenda was sent to all departments for their input. Attached for your review are staff's proposed changes. Provided below is a summary of those proposed changes, which helps describe why deletions and additions were made.

#### **COMMUNITY SAFETY**

##### Item A: Public Safety

This year, staff proposed creating a new Homeland Security section, and to reorganize the Public Safety section. Therefore, item 6 and item 10 were moved to the Homeland Security section, and item 2 was deleted as those concepts are further explained in the Homeland Security section.

Item 11 was added by the Health Department to address emergency/disaster management for animal rescue and sheltering.

Item 12 was added to state the need to pursue funding to rehabilitate Schroeder Hall and convert it to a police substation, once the property is formally deeded to the City of Long Beach.

#### **HOMELAND SECURITY (NEW SECTION)**

This section was added to better clarify the City's homeland security needs and position on federal homeland security grants. These concepts were developed by the City's Homeland Security Committee with input from Police, Fire, the Port of Long Beach, and many other departments that serve on that Committee.

The first responder section (Item B) includes duplicate information from the Community Safety section, as it pertains to both Homeland Security and general public safety.

## **ENVIRONMENTAL**

### *Item K: Breakwater Study*

A second bullet was added to pursue funds for the Feasibility Stage of the East San Pedro Ecosystem Restoration Study (Breakwater Study). This policy statement will be contingent upon the Army Corps determination of federal interest, and a City Council decision to become the non-federal sponsor.

### *Item O: National Park Study*

Several years ago, Congresswoman Solis authored federal legislation for the National Parks Service to conduct a "special resource study" of the San Gabriel Watershed to determine if there is federal interest in qualifying some of that area for federal parks funding. This study has the potential to bring significant federal resources for projects along the San Gabriel River and the Los Cerritos wetlands. In fact, a large part of Santa Monica is designated as a National Recreation Area, and has been beneficial to that Santa Monica in terms of pursuing federal funds.

However, at the time of the study initiation, the Gateway COG decided not to include its member cities in the study as there was not consensus that this study would be an asset to all cities. Recently, there has been discussion regarding increasing the scope of the study to include certain parts of the Gateway COG region, including the Los Cerritos Wetlands. The language in the Legislative Agenda would allow the City to further continue those discussions to determine if there is an ability to extend the study scope to include parts of Long Beach.

## **TRANSPORTATION**

### *Item A: Transportation Funding*

The City Council has directed staff to explore the feasibility of a streetcar system in Long Beach. The preliminary review has been completed and presented to the City Council. The next step will involve a more in depth review of transportation issues, potentially costing \$550,000. Language has been added to reflect the City Council's interest in pursuing funds for this project.

### *Item B: Goods Movement*

The third bullet was added to support efforts to create a separate and dedicated freight/goods movement account in the next Transportation Reauthorization Bill. In the last federal Transportation Reauthorization Bill in 2005, funding for goods movement projects was included in the bill, but not funded at the level that was expected. Currently, there are discussions of creating a separate account restricted for goods movement projects of national importance. This separate account would likely have a dedicated funding source attached to it, such as a national container fee or other funding mechanism.

## **ADDITIONAL ISSUES OF FEDERAL LEGISLATIVE IMPORTANCE**

### *Item I: Census 2010*

In 2010, the Census Bureau will be conducting the 2010 Census. Federal dollars are significantly linked to population, and it is important that every resident is accurately counted as part of the census. This item will allow staff to work to ensure that the Census Bureau is dedicating the appropriate resources to Long Beach to ensure an accurate count.

### *Item M: Naples Seawalls*

The Naples Seawalls are in need of repair, currently estimated at \$50 million. This addition to the federal agenda will allow the City to seek the necessary federal authority to allow federal funds to be used to help reconstruct the seawalls.

## **NEXT STEPS**

A Federal Legislation Committee meeting has been called for December 7, 2009 to review and discuss these recommended changes. City Council discussion and approval of the Committee's recommendations is expected to take place following the Committee in December or January.
