

Submitted Revisions to Analysis and recommendations for regulating facial recognition technology and other “smart” devices and platforms from Commissioner Hectus

Suggested change:

- Add a ban or moratorium of any ***new rollout or pilot program*** of FRT technology in the “Regardless of whether City Council chooses to implement any of the three policy recommendations...” paragraph.
- Modify policy option 1 to be focused on a moratorium on any ***currently deployed*** FRT tech.

Reasoning:

- ***Focus:*** Breaking up recommendations re existing or new FRT doesn’t diminish the strength of policy option 1. In fact, we could make that case more strongly and more specifically if focused on LACRIS and current deployments.
- ***Increased chance of success:*** There are likely to be strong headwinds against policy option 1 as written. Separating the two gives us a greater chance of accomplishing something rather than nothing on this point and we can build on the success of a new ban while advocating for the moratorium on the current use cases.
