

A request for improvements in Wrigley Heights Community

The initiative suggests creating “Raised Curb Planter Boxes” along Spring Street between Magnolia Avenue and Pacific Avenue. The street is to be improved this year, 2014. Compiled is a sample of signatures of the local residents supporting the suggested proposal.

The objective of this design is to beautify, provide ecological benefits in reducing noise, and air pollution and to slow the fast rate of travel by vehicles along this strip which intersects our residential community. .

To: The Long Beach City Council

A Wrigley Neighborhood Residents Initiative to Beautify Spring Street Between Magnolia Avenue and Pacific Avenue.

Objective: *To construct raised curb planters of the existing four median areas along Spring Street between Magnolia Ave and Pacific Avenue.*

With the alleyways vacated to trash pickup the usage of the alleys has been minimized. The previous need to access to the alleys from either direction has been eliminated.

The raised curb planters would be nicely landscaped with the appropriate foliage. In addition the *planting of trees along Spring Street* would further serve to beautify as well as filter the noise and gaseous pollutants caused by commuter traffic diverted from the 405 FWY using Spring Street as an alternate route to the east.

We the undersigned residents of the Wrigley Neighborhood support the said initiative to beautify Spring Street.
