## BEACH PEDESTRIAN PATH PROJECT

This image was used to support the City's CDP application to the Coastal Commission....

Completed in conjunction with the resurfacing of the beach area. However, according to City staff, the signs and striping were not completed by Excel Paving because the contract was not negotiated. Accordingly, Excel Paving "could not be held responsible for the signs and striping not being completed."

Companies responded, including Unispec Construction (\$1,644), Chrisp Company (\$438,188.10), and J&S Construction (\$1,644).

Cost for unforeseen increases in budget. According to the City, the total project cost was \$270,000.

Path from north City limit to south City limit. The purpose of the signs and striping is to improve the safety of pedestrians and bicyclists... (and) will also help to reduce the risk of collisions between pedestrians and bicyclists.
