

Mission Statement

The Positive Results Corporation teaches leadership and character development skills in order to promote healthy, sustainable relationships, and prevent acts and exposure to violence and high risk behaviors.

Students at **Stop The Pain, Teen Summit**. The PRC created this event to educate young adults about **bullying and dating violence**, and how to bring an end to them.

Vision Statement

We build "positive results" communities to encourage youth and families to be proactive in creating a legacy of anti-violence and prevention approaches.

By teaching individuals about healthy relationships and violence prevention, we lead them down a path of self-exploration, self-awareness, and self-compassion.

Our goal is to provide young men and women with the proper tools and information, so that they feel empowered to take responsibility for their own actions, and the actions of their community. As a result, they raise awareness and end violence.

Teen Dating Violence Prevention

What is Dating Violence?

Dating violence is a pattern of abusive behaviors used to exert power and control over a dating partner. **Sexual assault CAN be a component of dating violence.**

What are some ramifications for victims?

Adolescent victims have a higher risk of abusing substances, developing an eating disorder, engaging in unsafe sexual behavior, & committing suicide.

What are the statistics?

33% of adolescent girls in the US is a victim of physical, emotional, or verbal abuse from a dating partner.

10% of high school students are hit, slapped, or physically hurt by a boyfriend or girlfriend.

Over 25% of teens experience a relationship where a partner is verbally abusive.

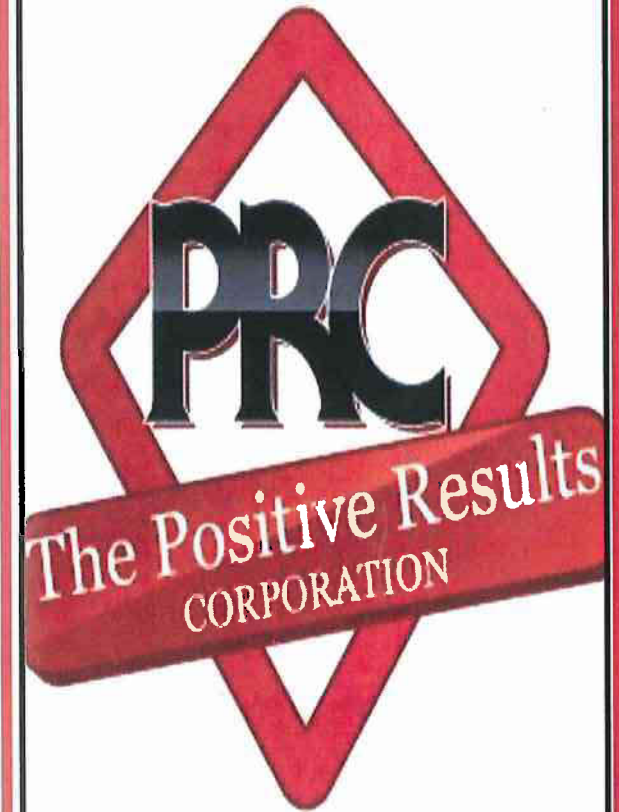

Our TDVP programs invite honest conversations about the development of these issues in the context of daily life.
