No taxpayer money was used to implement this project.

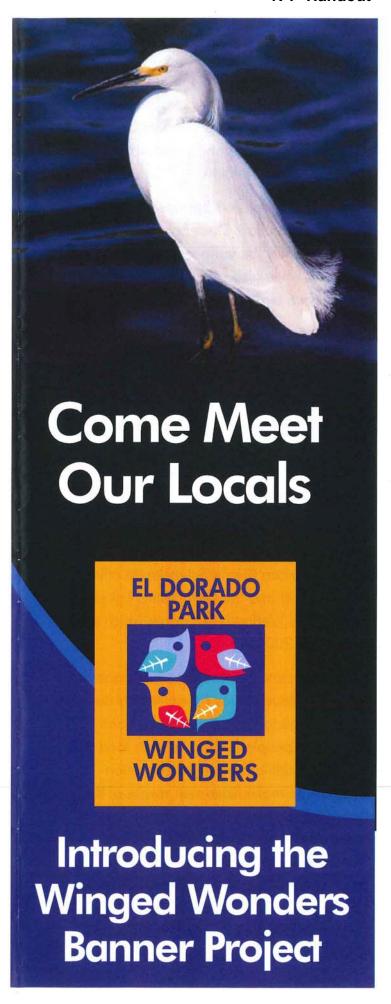

Winged Wonders was made possible by the generous support of Partners of Parks, The Port of Long Beach, Los Cerritos Wetlands Land Trust, Waste Management, The Cornell Lab of Ornithology, and The El Dorado Audubon Society.

Local photographer, Evan Butterfield, provided many of the photos. Images of birds that proved to be more camera shy were obtained from the U.S. Fish & Wildlife Service, and various photographers through Wikimedia Commons.

For more information about the Winged Wonders banner project, the work of the Lakes, Ponds, and Wetlands Taskforce, and links to educational resources, fliers, and more, are available on the <a href="https://www.lbdistrict5.com">www.lbdistrict5.com</a> website. Click on the Winged Wonders tab in the left menu.

Winged Wonder Coloring Books and Activity Books are also available at the Ruth Bach and El Dorado Neighborhood Libraries.

Most people can tell the difference between a Mallard, a Canada Goose, and a Mute Swan, but what about the myriad of other winged wonders that frequent the lakes, ponds, and wetlands of the City of Long Beach?

The Winged Wonders banner project at the El Dorado Park Duck Pond helps visitors identify the various feathered residents while also offering information about each bird's diet and song or call.

The Winged Wonders banner project displays images of 22 birds that inhabit El Dorado Park and also offers information about what each species of bird eats to be healthy. The banners urge visitors not to feed human food to the birds to keep them healthy and cut down on disease and harmful bacteria.

The project is the culmination of seven years of work beginning with Councilwoman Gerrie Schipske (in office 2006-2014) and the Fifth District Lakes, Ponds, and Wetlands Taskforce which she created in 2007.

Over the years, the taskforce has created The Long Beach Duck Patrol Activity Book to teach young people about the harm caused by people feeding human food to the local wildlife; began an education program to make fishermen aware of the potential dangers of fishing line to the local wildlife which included signs and installation of monofilament recycling receptacles in 2012 at El Dorado's lakes; and organized annual clean up outings to clear the lakes and ponds of human litter and restoration of banks around the lakes.

## How to Take the Winged Wonders Tour:

When you walk around the Duck Pond at El Dorado Park (at Studebaker and Los Arcos), you will see a collection of banners picturing a variety of our Winged Wonders.

Each banner describes the bird's diet and song or call.

Beneath each set of banners, a phone number is listed. Dial the number with its key code, followed by the # sign on your cell phone.

You will hear more information about each bird including what they eat, what their song sounds like, and more information about that particular species.
