RE: Agenda Item No. 17: 6700 E. Pacific Coast Highway Project

Dear Amy Harbin,

On behalf of the Southwest Mountain States Regional Council of Carpenters (“Southwest Mountain States Carpenters” or “SWMSRCC”), my Office is submitting these comments to the City of Long Beach (“City”) for the **July 18, 2023, City Council Appeal Hearing** to reiterate its concerns with the 6700 E. Pacific Coast Highway Project (**Project**”).

The Southwest Mountain States Carpenters is a labor union representing 63,000 union carpenters in 10 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects. Individual members of SWMSRCC live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Mountain States Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124

Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Mountain States Carpenters incorporates by reference all comments raising issues regarding the environmental assessment for the Project prior to approval of the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

The Project proposes to demolish all structures on the Project Site and to develop a new mixed-use project containing 281 residential dwelling units and 3,100 square feet of commercial retail space which will include parking.¹ The Project will contain 507 parking spaces, 143 bicycle parking spaces, and common and private open space areas.²

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

As noted in SWMSRCC's last letter, the City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the

² *Id.*

reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.³

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (“**GHG**”) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.⁴

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would

³ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, available at <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

⁴ South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, available at <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

include potential reductions in both vehicle miles traveled and vehicle hours traveled.⁵

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (“**VMT**”). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁶ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupations Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁷

Southwest Mountain States Carpenters recommend that the City adopt additional requirements to mitigate public health risks from the Project's construction activities. SWMSRCC requests that the City require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Southwest Mountain States Carpenters' experience with safe construction site work practices, SWMSRCC recommends that the City require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening

⁷ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, available at <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

area. Please reference the Apex temperature screening site map for additional details.

- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the

individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁸

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The City should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Southwest Mountain States Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁹

⁸ See also The Center for Construction Research and Training, North America’s Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S Constructions Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWD_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, available at https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

⁹ For details concerning Southwest Carpenters’s ICRA training program, see <https://icrahealthcare.com/>.

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should require the Project to be built using a workforce trained in ICRA protocols.

III. THE CITY MUST PREPARE A SUBSEQUENT ENVIRONMENTAL IMPACT REPORT FOR THE PROJECT

CEQA is a California statute designed to inform decision makers and the public about the potential, significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”) § 15002(a)(1).¹⁰ At its core, “[i]ts purpose is to inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made.” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal. 3d 553, 564.

To achieve this purpose, CEQA mandates preparation of an Environmental Impact Report (“**EIR**”) for projects so that the foreseeable impacts of pursuing the project can be understood and weighed. *Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80. The EIR requirement “is the heart of CEQA.” CEQA Guidelines, § 15003(a).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. The EIR’s function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is

¹⁰ The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 *et seq.*, are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. (Cal. Pub. Res. Code § 21083.) The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Department of Fish & Wildlife* (2015) 62 Cal. 4th 204, 217.

made. *Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal. 4th 412, 449–450).

Here, the City contends that no subsequent EIR is necessary pursuant to CEQA Guidelines section 15168(c)(2) because the Project is within the scope of activities analyzed in the Southeast Area Specific Program EIR (“**PEIR**”) and will not result in any new significant impacts. Specifically, the City’s agenda for the hearing provides: “Recommendation to determine that the project is within the scope of the project previously analyzed as part of the Southeast Area Specific Plan Program Environmental Impact Report (State Clearing House No. 2015101075) that was prepared for the previously approved project and warrants no further environmental review pursuant to California Environmental Quality Act (CEQA) Guidelines 15162.”

However, section 15162 of the CEQA Guidelines requires a subsequent EIR any time:

- (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
- (2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
- (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete, shows any of the following:
 - (a) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
 - (b) Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - (c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce

one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

- (d) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Given that there have been substantial changes to the Project and Project circumstances, and new information of substantial importance has come out since the certification of the PEIR, a subsequent EIR must be prepared.

A. There Are New Transportation Impact Methodology Requirements Not Analyzed in the PEIR

In July 2020, Senate Bill (“**SB**”) 743 took effect in order to help reduce transportation impacts. Specifically, per Senate Bill 743, the Office of Planning and Research (“**OPR**”) is tasked with “developing new guidelines for evaluating transportation impacts under CEQA using methods that no longer focus on measuring automobile delay and level of service (LOS).”¹¹ Further, “OPR’s proposed updates to the CEQA guidelines in support of these goals established VMT as the primary metric for evaluating a project’s impacts on the environment and transportation system.”¹² Even further, the California Code of Regulations states that “vehicle miles traveled is the most appropriate measure of transportation impacts.”¹³

Here, the PEIR, which was certified in 2017, uses the outdated LOS methodology to analyze traffic and transportation impacts. Draft PEIR (“**DPEIR**”) at 5.16-8, *et seq.*¹⁴ Therefore, to the extent that the PEIR utilizes and relies upon an LOS analysis, the

¹¹ LADOT Transportation Assessment Guidelines (Aug. 2022), p. 1-1, available at https://ladot.lacity.org/sites/default/files/documents/2020-transportation-assessment-guidelines_final_2020.07.27_0.pdf.

¹² *Id.*

¹³ Cal. Code of Reg. tit. 14 § 15064.3(a) (defining “vehicle miles traveled” as “the amount and distance of automobile travel attributable to a project.”).

¹⁴ The DPEIR can be found at

<http://longbeach.legistar.com/View.ashx?M=F&ID=5416407&GUID=DD29947D-598F-44DF-9CCD-3E466135D92D>.

traffic impacts should be assessed relying solely on the VMT methodology as that is the preferred method according to the more recent LADOT Guidelines.

Thus, a subsequent EIR analyzing the Project’s VMT is necessary in order to adequately assess the Project’s transportation impacts.

B. The Project Requires New Feasible Mitigation Measures to Mitigate Greenhouse Gas Impacts

The Project at hand also requires new feasible mitigation measures not specified in the PEIR such as electric vehicle (“EV”) parking and charging stations and solar system installation. Such measures are of particular importance given the PEIR’s conclusion that its GHG impacts are “significant and unavoidable” and that its “cumulative contribution to the long-term GHG emissions in the state would be considered potentially significant”. DPEIR at 5.7-29; 5-7-49.

First, although the PEIR notes that projects must comply with the CALGreen Building Code (“GBC”) (DPEIR at 5.7-44), it identifies an outdated version of the GBC and therefore fails to specify the new requirement that residential buildings must designate 10% of their parking spaces as EV capable, equip 25% of the parking spaces with low power level 2 EV charging receptacles, and equip 5% of the spaces with level 2 EV supply equipment. GBC 4.106.4.2. Nor does the Project plans specify how many of its slated 507 parking stalls will be EV capable and ready.

Further, both the PEIR and Project plans fail to include a mitigation measure requiring the installation of photovoltaic and battery system, as required by section 1040.10 of the 2022 Energy Efficiency Standards. Thus, a subsequent EIR must be prepared to specify and incorporate these additional feasible mitigation measures.

C. The Project May Have Significant Hazardous Material Impacts Which Were Not Analyzed in the PEIR

Yet another reason why a subsequent EIR must be prepared is because the Project may have significant unanalyzed hazardous material impacts stemming from the Project site being located within the boundary of the former Seal Beach Oil Field. In fact, although the PEIR recognizes that “[i]ndividual development projects that would be allowed under the Southeast Area Specific Plan could impact areas of hazardous substance contamination existing or remaining from historical operations, resulting in a significant impact on the environment . . . [and] significant health risk[s] to existing and future residents and/or workers”, it fails to in fact analyze or quantify the

impacts; nor does it provide specific measures in the event that such contamination occurs and instead solely relies on regulatory measures. DPEIR at 5.8-19 – 5.8-20. However, determinations that regulatory compliance will be sufficient to prevent significant adverse impacts must be based on a project-specific analysis of potential impacts and the effect of regulatory compliance. See *Californians for Alternatives to Toxics v. Department of Food & Agric.* (2005) 136 Cal. App. 4th 1; *Ebbetts Pass Forest Watch v Department of Forestry & Fire Protection* (2008) 43 Cal.4th 936, 956.

The omission is critical for both the Project’s operational and construction impacts. For example, the Project involves massive demolition and grading adjacent to the San Gabriel River, which may exacerbate the conditions on the site, spread the contaminated soil and vapors to sensitive receptors – both future residents of the Project, as well as the residents, visitors, or patrons of nearby facilities – and also spread the contamination into the river. Such hazards impacts would not have occurred if the Project were not that massive or did not involve demolition. While the 2017 PEIR contemplated mixed use on the Project site, it did not study any specific project in 2017 to evaluate the current Project’s impacts.

Similarly, the Project may present similar impacts during its construction phase. These impacts may affect both the construction workers, as well as a wider scope of sensitive receptors since the potentially contaminated soil and debris will have to be hauled away and disposed of at a location unspecified either now or in the PEIR.

In fact, the City’s response to comments and concerns in the PEIR acknowledges that the PEIR did not study any project-specific impacts, stating:

“R158-7 The commenter states that he does not believe the Project is consistent with the City’s General Plan MOP Policy 1-1. However, the commenter does not state why or provide data for this conclusion. The comment is acknowledged.

The commenter states that the **construction impact** analysis is abbreviated and cursory. Please note that this is a program-level environmental document. The proposed Project includes the adoption of the Specific Plan with buildout assumed to occur over an approximate 20 year period. **No site specific development** is being proposed at this time and **construction phasing** is dependent on a variety of factors, including market demand.

Additionally, the **size** of any particular development or developments and **anticipated construction schedule** is unknown. Therefore, construction trip generation associated with future development under the proposed Specific Plan is **unknown** at this time. Therefore, a site specific analysis of construction trips, routes, etc. **cannot be provided at this time.**" (2017 Final EIR, P. 4-86 (pdf p. 297), emph. added.)¹⁵

Accordingly, for this reason too, a subsequent EIR must be prepared which specifically analyzes the Project's hazardous material impacts both during the operational and construction phases.

D. The Project's Mass and Scale May Cause Significant Impacts Which Were Not Studied In the PEIR and Have Been Ignored by the City Based on Erroneous Legal Assumptions.

In its Staff Report for the July 18, 2023 hearing, the City notes:

"Density Bonus, Affordable Units, Concessions/Waivers

The portion of the project related to density bonus and incentives, or concessions are **ministerial** acts. The applicant has requested that the City approve the project in accordance with the State's Density Bonus Law (Government Code Section 65915 through 65918). In addition to density bonuses, applicants who provide the required amount of affordable housing qualify for **various 'exceptions'** from zoning standards (known as **'incentives and concessions' or 'waivers'**) and also for reduced parking standards. The applicant is proposing 13 very low-income affordable units across all unit types in the project, which **qualifies** the project for a 20 percent increase in the number of market rate units within the project. The 13 affordable units will be provided at the very low-income level, restricted as affordable through a covenant for a minimum of 55 years. The density bonus is calculated using **SEASP's baseline allocation methodology** which allows for 252 base units. Following State Law, should an applicant provide five percent of the base units for very low-income (families/individuals), the project receives a 20 percent increase in their base density which is 51 units (252 base units x 20 percent = 51). Based upon the calculations, the applicant could build up to a

¹⁵ See, 2017 August FEIR at exhibit-d_seasp-feir.longbeach.gov

maximum of 303 dwelling units [$252+51 = 303$], however, the project only proposes 281 units, which is 22 units less than the maximum number of units allowed.

By providing affordable units at the very low-income level . . . the applicant is entitled to one concession(s), incentive(s) and/or waiver(s).

Based on the percentage of affordable units provided, the project is eligible for one concession. The concession granted per State Density Bonus law is for Floor Area Ratio (FAR). Currently, SEASP allows a maximum FAR of 2.0, however, the applicant is requesting as its Density Bonus concession an increase of 40 percent to accommodate the additional number of market rate units in addition to the 13 affordable units and their bedroom counts. Based on the maximum FAR of 2.0 allowed within the SEASP a site area of 113,874 sf of area calculates to an allowable building area of 227,748 sf. The State Density Bonus concession to increase the FAR by 40 percent translates to an overall floor area of 318,847 sf.” (July 18, 2023 Staff Report, p. 3, emph. added.)

The Staff Report’s statements, as emphasized, suggest that granting concessions and waivers for the density bonus are ministerial tasks because the Applicant is entitled to those. Moreover, the Staff Report conflates the concessions and waivers.

As detailed below, the Applicant is not entitled to any of the concessions and waivers it seeks because they are discretionary actions subject to CEQA. As, the concessions and waivers may have impacts that were not subject to any analysis in the 2017 PEIR, they require subsequent CEQA review.¹⁶

¹⁶ Moreover, the Project appears to be **impermissibly piecemealed** under CEQA since the Staff Report indicates that the City has already approved the concessions and waivers: “The City’s Site Plan Review Committee has granted deviations from the maximum allowable height (five-stories) and to allow tandem parking stalls.” (Staff Report, p. 3.) There is no indication of whether the Site Plan Review Committee’s approval considered the impacts of such approval of the Project’s concessions/waivers for purposes of CEQA. But even if they did, it would be of no consequence since the Project or its CEQA review cannot be piecemealed from the present approvals. CEQA requires to review the impacts of the “whole of an action” rather than each separate discretionary approvals. CEQA Guidelines section 15378(a)&(c). Moreover, under CEQA, where the Project contains both ministerial and discretionary aspects, it must be treated as discretionary and undergo CEQA. CEQA Guidelines section 15268(d).

IV. THE CITY MUST DENY THE PROJECT SINCE ITS CONCESSIONS AND WAIVERS ARE UNWARRANTED

As noted above, the Project seeks *one* concession and *two* waivers to implement the Project. While the City fails to note, the standards for granting those are completely different. Further, the City's analysis of the State Density Bonus Law is based on flawed legal assumptions.

First under Govt. Code section 65915(b):

(b) (1) A **city**, county, or city and county **shall** grant **one** density bonus, the amount of which shall be as specified in subdivision **(f)**, and, **if requested** by the applicant **and consistent** with the applicable requirements of **this section, incentives or concessions**, as described in **subdivision (d), waivers or reductions** of development standards, as described in **subdivision (e)**, and parking ratios, as described in subdivision **(p)**, **if** an applicant for a housing development seeks and agrees to construct a **housing development**, excluding any units permitted by the density bonus awarded pursuant to this section, that will contain at least any one of the following: (A) Ten percent of the total units of a housing development, including a shared housing building development, for rental or sale to lower income households, as defined in Section 50079.5 of the Health and Safety Code. (B) **Five percent** of the **total units** of a housing development, including a shared housing building development, for rental or sale to very low income households, as defined in Section 50105 of the Health and Safety Code.” (Emph. added.)

The Applicant does not qualify for any of the concessions or waivers it seeks, as a matter of law, for the following reasons.

A. **The City Fails to Provide an Accurate or Verifiable Source for the Base Unit Count for the Project Site**

At the outset, the Staff Report fails to provide any verifiable source as to how it determined the base units allowable on the Project Site. Instead, it provides:

“The density bonus is calculated using **SEASP’s baseline allocation methodology** which allows for 252 base units. Following State Law, should an applicant provide **five percent** of the **base units** for very low-income (families/individuals), the project receives a **20 percent increase** in their **base**

density which is 51 units ($252 \times 20\text{ percent} = 51$).” (July 18, 2023 Staff Report, p. 3, emph. added.)

However, a keyword search in the SEASP¹⁷ for the City’s single reference of “baseline allocation” produced zero results. Thus, the City’s Staff Report fails to provide the required information to the public or decisionmakers to ascertain whether the Density Bonus is proper in this case, rendering the City’s determinations that the Project qualifies for a Density Bonus, concessions and waivers unsupported by substantial evidence.

B. The Project Concessions and Waivers Are Inconsistent With Planning and Zoning Law

Government Code Section 65300.5 states: “In construing the provisions of this article, the Legislature intends that the general plan and elements and parts thereof comprise an integrated, internally consistent and compatible statement of policies for the adopting agency.” Similarly, Govt. Code § 65359 requires that Specific Plans and development projects be consistent with the General plan.

Moreover, Govt. Code sections 65915(d)(1)(C) [re concessions] and 65915(e) [re waivers] both provide that the agencies are not required to grant concessions or waivers if those violate state or federal law.

Per the Project’s plans, the Project’s address is: 6700 Pacific Coast Hwy, Long Beach, CA 90803; APN’s: 724-201-20-06 & 07.

The City’s approved February 2022 Housing Element, Appendix C¹⁸ (at p. 33/66) includes *only one* parcel of the Project with an APN of 724-201-20-06 for the size of the 2.54-acre. The Project plans indicate that the Project site is 110,484 SF at APN 724-201-20-06 and also 3,390 SF at APN 724-201-20-07, with the combined square footage of 113,874 SF (i.e., 2.61 acres).

As such, the City’s most updated Housing Element did not view the *entire* Project site as capable to produce housing, but only provided 95 units for one of the parcels. It is therefore questionable whether the Project may utilize the area of the second project to maximize the base allocation of units for purposes of the Density Bonus Law.

¹⁷ See the entire SEASP at seasp_r4_web_9-7-17.longbeach.gov

¹⁸ https://drive.google.com/file/d/1nXPKllqgEk5rGqVuOtg2_qTBUWaCRYe0/view

Moreover, for the one parcel included in the City's 2022 Housing Element, the Project site may produce *no* moderate income units, *no* market-rate units, and *only* 95 low income units, as shown in the screenshot below (highlighted for convenience):

APN	Address	Parcel Acreage	PlaceType Designation	Potential Low Income Units	Potential Moderate Income Units	Potential Market Rate Units
7131002003	114 E MARKET ST	0.13	NSC-L	0	1	3
7131002030	100 E MARKET ST	0.26	NSC-L	0	2	6
7243004015	5871 E NAPLES PLZ	0.63	NSC-L	24	0	0
7243004019	5865 E NAPLES PLZ	0.26	NSC-L	0	2	6
7281023013	615 E OCEAN BLVD	0.42	DT	7	0	64
7280029024	211 E OCEAN BLVD	0.99	DT	17	0	151
7253001001	3600 E PACIFIC COAST HWY	0.23	NSC-M	0	2	9
7269019050	220 E PACIFIC COAST HWY	0.47	TOD-M	71	0	0
7268003038	904 E PACIFIC COAST HWY	0.52	NSC-M	36	0	0
7242012006	6700 E PACIFIC COAST HWY	2.54	RSF	95	0	0
7237020040	6695 E PACIFIC COAST HWY	0.87	RSF	0	5	21
7242011013	6500 E PACIFIC COAST HWY	6.17	RSF	0	37	148
7237020051	6411 E PACIFIC COA	0.00	RSF	0	182	727
7209006026	595 E PACIFIC COAST HWY	0.35	TOD-M	4	0	34

As such, the Project is inconsistent with the Housing Element, since it seeks to produce 281 units, of which only 5%, or 13 units, will be affordable. Thus, the Project fails to comply with the planning and zoning law in that it fails to produce the required number of affordable units.

C. The Applicant Fails to Adequately Establish That It Qualifies for A Floor Area Ratio Increase Concession

The Staff Report's finding that there is no basis to contest the concession is unsupported. The Staff Report (at p. 4) provides:

"Staff did **not** find that there is a **basis** for contesting the requested concessions or waivers. The basis for denial of a concession is established by the State Density Bonus Law. The concession may be denied based on: 1) making a finding that it does not **result in 'identifiable, and actual cost reductions** to provide for **affordable housing**'; or 2) that any of the three findings can be made: a) it is **not required for affordability**; b) there is an **adverse impact** on health, safety, physical environment, or historic resources with no feasible mitigation; or c) that is **contrary to State or Federal law**. As discussed above, the State Density Bonus Law . . . also **does not override** the

Local Coastal Program (LCP) or Coastal Act and waivers and concessions must be implemented in a way that does not conflict with the Coastal Act. The consistency of the project with the LCP will be discussed below. (Emph. added.)

First, the Project includes a significant commercial component, which is not required for affordable housing. Further, the Project's 40% increase in the F.A.R. is not required for affordability since the Project will produce only 13 affordable units instead of the 95 affordable units it is required to produce under the Housing Element. Finally, as noted above, the Project is utilizing the density on a parcel that is not even included in the Housing Site inventory as a potential site to produce housing.

As such, there is no support for the City's finding that the concession of the 40% increase in the FAR to accommodate 281 residential units of which only 13 will be affordable and which will also include a significant commercial/retail area is required to produce affordability.

D. The Applicant Fails to Adequately Establish That It Qualifies for Height and Tandem Parking Waivers

Waivers under the Density Bonus Law are not concessions and they cannot be used to bypass the express limits on the number of allowable concessions provided by the law.

Critically, however, waivers – unlike concessions – require additional factual evidence of physical infeasibility, which the Project lacks. Thus, under the Govt Code §65915(e)(1):

“(e) (1) In no case may a city, county, or city and county apply any development standard that will have the effect of **physically precluding** the construction of a development meeting the criteria of subdivision (b) **at the densities** or with the **concessions or incentives** permitted by this section. Subject to paragraph (3), an applicant may submit to a city, county, or city and county a proposal for the **waiver** or reduction of development standards that will have **the effect of physically precluding** the construction of a development meeting the criteria of subdivision (b) **at the densities** or with the **concessions or incentives permitted under this section**, and may request a meeting with the city, county, or city and county. If a court finds that the refusal to grant a waiver

or reduction of development standards is in violation of this section, the court shall award the plaintiff reasonable attorney's fees and costs of suit. This subdivision shall not be interpreted to require a local government to waive or reduce development standards if the waiver or reduction would have a **specific, adverse impact**, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon **health or safety**, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact. This subdivision shall not be interpreted to require a local government to waive or reduce development standards that would have an **adverse impact** on any real property that is listed in the California Register of **Historical Resources**, or to grant any waiver or reduction that would be **contrary to state or federal law**.

(2) A proposal for the waiver or reduction of development standards pursuant to this subdivision shall neither reduce nor increase the number of incentives or concessions to which the applicant is entitled pursuant to subdivision (d)." (Emph. added.)

Here, the Developer is seeking two waivers - additional height and tandem (back-to-back) parking - to accommodate far more density than allowed and far more parking than required.

Moreover, the Project proposes 85 two-bedroom and 18 three-bedroom units and there is no evidence why those units cannot be reduced to one-bedroom units or studios to accommodate the number of units the Project seeks to build.

As such, there is no support for the claim that the Project site itself is physically precluding the Applicant to build what it is entitled to or permitted under the Density Bonus Law. It is obvious that the Applicant is simply trying to maximize its profits by proposing a largely market-rate residential project of 281 large units, which conflicts with the Density Bonus Law purpose or policy for allowing waivers.

Thus, the waivers sought by the Applicant are unsupported by state law and are otherwise variances requiring specific findings, including those of practical hardship or infeasibility that cannot be made here.

V. THE CITY MUST DENY THE PROJECT SINCE IT IS INCONSISTENT WITH STATE LAW

A. The Project Is Inconsistent with the General Plan

As noted above, the Project squarely conflicts with the most updated Housing Element which designates and expects the Project site to produce 95 low-income units and no moderate or market-rate units.

Although the City admits that the Project is not consistent with the General Plan's Housing Element, it attempts to justify the consistency, stating:

“Even though the proposed project is a residential development project, it does not include **95 low-income** units as projected in the site inventory. Therefore, the City must demonstrate that its plans, policies and zoning facilitate the production of the 26,502-unit RHNA allocation. Although the site inventory is the most well-known method for meeting this obligation, the **City may meet** its RHNA obligation through a combination of available avenues, including: (1) the projected number of **Accessory Dwelling Units** (ADU) anticipated to be permitted based on recent trends; (2) **approved** and **proposed** residential development **projects** in the pipeline; and (3) an **inventory of sites** with demonstrated **zoning capacity** to accommodate the RHNA allocation.” (Staff Report, pp. 8-9, emph. added.)

Then City provides some trends of ADU construction in the recent years and concludes that the ADU's themselves more than offset the 95 low-income shortage here. (Staff Report, p. 9.) It also identifies a single project that was approved in March of 2023 for 72 affordable units and that was not identified in the Housing Element as a site with potential capacity to produce affordable units, claiming that that project both offsets the shortfall of the Project to produce affordable units and also show that the City has additional vacant sites and potential to produce affordable units. (Staff Report, p. 10.)

The City's justification is fatally flawed and leads to absurdity, since potentially every project may rely on ADUs and one project approvals to avoid the consistency with a clear requirement or provision in the Housing Element, which cumulative impact is impossible to calculate. As the City stated, “[t]he proposed project would create **one** of the **first mixed use** residential projects within the Southeast Specific Plan Area

(SEASP)” (Staff Report, p. 3) and “[t]he other properties in this extreme southeast corner of the City are currently developed with commercial uses and retail shopping centers, **many of which are also** undergoing review for possible **conversion** to **larger scale residential** projects” (Staff Report, p. 11, emph. added.) As such, the City’s justification does not consider the additionality aspect and the fact that every project site itself must be consistent with the General Plan and its elements, and cannot rely on the consistency of other projects to offset its inconsistencies.

Moreover, even if the affordable component could hypothetically be offset through ADUs or other projects to meet the Housing Element’s requirement of 95 units, the Project would still be inconsistent with the Housing Element since the site under the Housing Element cannot produce moderate-rate or market-rate units.

B. The Project Is Inconsistent with the Specific Plan

The City presents that the Project complies with the open space requirement but its justifications for such findings are clearly unsupported and erroneous. First, for purposes of calculating how much open space is required for the Project, the City artificially lessens the Project area from 113,874 square feet (2.61 acres) (Staff Report, p. 2) to 99,816 square feet (2.29 acres) (Staff Report, p. 5) by excluding the setbacks and then applies the 20% to the reduced area, without explaining why it does so. The Staff Report provides:

“SEASP (Table 6-9) requires a minimum of 20 percent of the project area to be open space. In this instance, the project area is defined as the site area which is **99,816** square feet (**excluding the required setbacks**). **Twenty percent** of the overall site area is 19,963.2sf. The maximum allowable **private open space area is 25 percent** of the **20 percent** of the site area, which translates to **4,990 square feet**; this area is shown as private open space for some unit balconies which are interspersed among all elevations of the building. The **outdoor common open space** areas are shown on **level three** and the **roof**.”

Staff Report, p. 5. (Emph. added.)

It then uses the flawed 20 percent area in all other calculations, e.g., how much private open space is allowed under the Specific Plan standards.

The Staff report further conflates indoor and outdoor space when discussing open space, whereas by definition open space cannot be indoors. It provides, in pertinent parts:

“As summarized in Table 3, **common (indoor and outdoor)** and private **open spaces** for the tenants of the residential uses are **mostly proposed** on the **upper floors** and include a variety of amenities. There are active common **outdoor** open space areas which include **pool** and **spa** areas, BBQ areas with bar seating, fire pit/place areas with tables and seating (Attachment D – Preliminary Landscape Plans). The passive common **outdoor open** space areas have lush landscaping with shade trees, ample tables and seating, and a water feature. The two **indoor** common area amenity rooms have a catering kitchen, TV/media lounge, and game rooms.” (Staff Report, p. 6 [emph. added].)

As such, the Staff Report obscures the information for the public and decisionmakers and thereby fails to provide a consistent and accurate account of how much open space is actually required and whether the Project meets that requirement under the Specific Plan. Without such information, the Project cannot be found consistent with the Specific Plan and cannot be approved.

C. The Project Is Inconsistent with the Coastal Act

The City’s justifications that the 13 affordable units in the 281-unit project meet the Coastal Act’s “public access” requirement (Staff Report, p. 11) are flawed and fail to provide good faith disclosures.

First, the City appears to euphemize the Project’s mass and scale and the associated obstruction of scenic views by comparing the allowed height of 5 stories based on the Project site’s zoning and suggesting that the Project is only seeking to add one additional level. Yet, the City ignores the fact that the Project also seeks an increase of 40% FAR, whereas the FAR would otherwise limit the mass and scale of the building and its potential to obstruct the views.

Also, the City improperly considers the Project’s impacts on the coastal views by comparing what the zoning allows versus what the Project seeks, rather than comparing what the existing site is developed with (a low-rise commercial building) with what is proposed. Thus, the City attempts to downplay the Project’s effect on

wetland areas of special concern and largely block public views or access to the coastal area.

The Project is manifestly inconsistent with the public access provisions of the Coastal Act, which require low-cost places for visitors to stay overnight. Affordable housing or ownership is irrelevant under the Coastal Act and density bonus law does not apply to or trump the Coastal Commission determinations. Govt. Code § 65915(m), allowing density bonus, provides:

“(m) This section does not supersede or in any way alter or lessen the effect or application of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code). Any density bonus, concessions, incentives, waivers or reductions of development standards, and parking ratios to which the applicant is entitled under this section shall be permitted in a manner that is consistent with this section and Division 20 (commencing with Section 30000) of the Public Resources Code.”

As such, contrary to the City’s claims, the 5% affordable units in the Project cannot be deemed to meet the public access requirement of the Coastal Act or LCP.

The issue of public access is critical for the Coastal Commission and the Coastal Act, as also evidenced by the Coastal Commission’s recent reasoning and findings related to a Dana Point project.¹⁹ There, as relevant to this case, the Coastal Commission found:

“The **second factor** is the **extent and scope** of the development as approved or denied by the local government. The City approved a new 47,988 sq. ft. six-level hotel on two vacant lots, in a seemingly hazardous area, over which expansive coastal views from public vantage points are currently available. While the scope of the development isn’t as large as other commercial developments in the area, the project could have significant impacts to coastal resources if not fully consistent with the certified LCP. Thus, the extent and scope of the project, which does not

¹⁹ See, Coastal Commission’s decision on the Dana Point Project in 2019 at <https://documents.coastal.ca.gov/reports/2019/12/Th14b/Th14b-12-2019-report.pdf>; see also Coastal Commission’s similar decision on a Project in Venice at <https://documents.coastal.ca.gov/reports/2021/11/W16c/W16c-11-2021-report.pdf>; Coastal Commission’s finding of inconsistency with Huntington Beach’s project <https://documents.coastal.ca.gov/reports/2022/5/Th9a10a/Th9a10a-5-2022-staffreport.pdf>

appear to be consistent with the certified LCP, weighs in favor of a finding of substantial issue.

The **third factor** is the significance of the coastal resources affected by the decision. **Public access** to the coast is a highly important coastal resource that requires enhancement and strict protection. The availability of **low cost overnight accommodations** is an **integral component** of **public access** as is the **protection of public coastal views**. As such, the public access policies of the Coastal Act, including the **provision** to **provide low cost overnight** accommodations and the protection of public coastal views, have been incorporated into the City's certified LCP as detailed above. In addition, coastal bluffs and water quality are also important coastal resources that are explicitly protected by the City's certified LCP. Thus, it is important to ensure that blufftop development is appropriately sited and designed to minimize coastal hazards and that adequate water quality measures are incorporated in the City's approval throughout the construction the proposed development as well as the life of the project. Given the **significance** of the **coastal resources** affected by the proposed development, this factor also weighs in favor of a finding of substantial issue.

The **fourth factor** is the **precedential value** of the local **government's decision** for future interpretations of the City's certified LCP. As discussed, the City-approved project is **not consistent** with the relevant policies of the City's certified LCP. In fact, the City's record indicates the City does not agree that protection and provision of lower cost accommodations is required under its LCP even **though Section 30213** of the Coastal Act is incorporated into the LCP. Thus, approving the project as proposed and conditioned by the City **could set a precedent** for future development in Dana Point and other certified areas throughout the state that is not consistent with certified LCPs. This factor supports a finding of substantial issue. The final factor is whether the appeal raises local issues, or those of **regional or statewide significance**. The issues raised in the appeal concern the **protection of public access**, including the provision of **low cost overnight** accommodations and the protection of **public coastal views**, as well as issues related to geologic

hazards and water quality. The issues raised are **not unique to Dana Point** and have been **raised in many CDP applications** and appeals throughout the state and are of **substantial public interest**. Therefore, the appeals raise issues of **statewide significance**. These factors support a finding of substantial issue. In conclusion, the Commission finds that the appeals do raise substantial issues with respect to the grounds on which they were filed and City-approved project's consistency with the City's certified LCP.” (Coastal Commission, November 27, 2019, Staff Report and Findings on Dana Point Project Approval, p. 14.)

The Court’s description of the fundamental goals of the Coastal Act is instructive and further confirms the Project’s mass and scale here and its failure to ensure public access violate the Coastal Act.

VI. CONCLUSION.

In sum, SMSWRCC maintains that the City should require a local workforce, that the City impose training requirements for the Project’s construction activities to prevent community spread of COVID-19 and other infectious diseases, and that the City ensure the Project’s compliance with all state laws and municipal provisions, as well as grant the appeals and require preparation of a subsequent EIR for the Project to be CEQA-compliant and to provide an accurate good-faith disclosure of the Project’s impacts. If the City has any questions, feel free to contact my office.

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \sum(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁵ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.

⁶ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

⁹ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

¹⁰ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at:

http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at:

http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	
	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)
	0.006				

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44				
CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006		

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

EXHIBIT B

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido" *Defendant*.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sessler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradoao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. A Chronology of MTBE in Groundwater and an Estimate of Costs to Address Impacts to Groundwater. Presentation to the annual meeting of the Society of Environmental Journalists.

Hagemann, M.F., 2002. An Estimate of the Cost to Address MTBE Contamination in Groundwater (and Who Will Pay). Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to a meeting of the U.S. EPA and State Underground Storage Tank Program managers.

Hagemann, M.F., 2001. From Tank to Tap: A Chronology of MTBE in Groundwater. Unpublished report.

Hagemann, M.F., 2001. Estimated Cleanup Cost for MTBE in Groundwater Used as Drinking Water. Unpublished report.

Hagemann, M.F., 2001. Estimated Costs to Address MTBE Releases from Leaking Underground Storage Tanks. Unpublished report.
