STUDY SESSION	Dave Shukla	dave.shukla@gmail.com		<p>Questions:</p> <ul style="list-style-type: none"> - How many ventilators were manufactured in LB, regardless of company, firm, or industry, from 1/1/20 through to the present? - How many of these units were delivered to LB area (or, to be generous, LA County, or even LA Basin area...) Hospitals and ICUs? - What happened to the City's online "dashboard" in 2022? Why has it not been updated more than once a week, on average, so far this calendar year? - What is the current estimate of excess deaths, either due to the COVID-19 (and variants) or pandemic-induced lack of medical access, within LB Health Dept. jurisdiction over the past two years? - What is the current economic estimate of loss (lost wages/salaries, lost rents, lost sales, lost taxes, lost output, supply chain issues, etc.) due to "reopening" on 5/1/20? - What will be the policy response of this body (LB City Council) to evident failures to protect its citizens over the past two years? - If it had been COVID-15, would the U.S. have failed so completely? 	4/30/2022
