To the Cultural Heritage Commission:

I'm in support of this and all projects to improve the neighborhood and increase the square footage of habitable space to accommodate more people. Since water is scarce the backyards are becoming useless and should be built on as the State of California has indicated. I'm also in support of any improvements that reduce the energy consumption of antiquated housing. I support building as it increases the City's tax revenue and provides jobs to people who need them.

With thoughtful consideration,

Michael J Richardson
