R-40

HONORABLE MAYOR AND CITY COUNCIL
City of Long Beach
California

RECOMMENDATION:

Review the need for continuing the local emergency related to the monkeypox virus, proclaimed by City Manager on August 2, 2022, and ratified by the City Council on August 9, 2022, and determine whether to terminate the local emergency at this time; and if the conditions so warrant, adopt a Resolution terminating the existence of a local emergency related to the monkeypox virus. (Citywide)

DISCUSSION

On August 9, 2022, the City Council ratified the City Manager's August 2, 2022 proclamation of the existence of a local emergency in response to the international monkeypox (MPX) outbreak and the ongoing risk and potential for widespread community transmission of MPX occurring among the general public in the State of California as well as the City of Long Beach (City).

Monkeypox (MPX) virus is similar to smallpox but causes less severe disease. Illness initially may include flu-like symptoms then progress to a rash that spreads over the body and can last two to four weeks. The virus can be spread person-to-person through prolonged face-to-face contact, direct contact with the lesions or body fluid, or sharing contaminated items such as bedding and clothes. The current cases being reported do not have a travel history to endemic areas and many cases have reported sexual contact, primarily among men who have sex with men. The Department of Health and Human Services (Health Department) has been administering vaccines to help prevent disease for those most at risk, and antivirals as treatment for those who develop severe illness. To date, the Health Department has administered more than 6,600 doses throughout City managed vaccination sites as well as through pop up clinics in partnership with LGBTQ partners.

As of October 25, 2022, there are 121 confirmed and probable cases of MPX in Long Beach. While the case counts in Long Beach have slowed, the Health Department foresees a surge in cases due to local events and continues to allocate extensive resources towards the efforts to control the community transmission of MPX. Allowing the local emergency proclamation to remain in effect will provide the City additional powers to coordinate local efforts and identify resources that may be necessary to fully address the response.

Today's action requests that, pursuant to LBMC Section 2.69.060, the City Council review the need for continuing the local emergency, including whether to terminate the local emergency if the conditions warrant such action. If the local emergency is not terminated, the City Council must continue to review, at least every fourteen (14) days, the need for continuing the local emergency.

HONORABLE MAYOR AND CITY COUNCIL

November 15, 2022

Page 2

This matter was reviewed by Deputy City Attorney Taylor M. Anderson on November 6, 2022 and the Budget Analysis Officer Greg Sorensen on November 7, 2022.

TIMING CONSIDERATIONS

City Council action is requested on November 15, 2022, to comply with State and local law.

FISCAL IMPACT

Funding for MPX mitigation has been covered by the Epidemiology and Laboratory Capacity (ELC) and State COVID-19 Immunization grants. Sufficient funding is budgeted in the Health Fund Group in the Health and Human Services Department, offset by grant revenue. Should it be determined to continue the local emergency, staff will return to the City Council for a future budget amendment. This recommendation has no staffing impact beyond the normal budgeted scope of duties and is consistent with existing City Council priorities. There is no local job impact associated with this recommendation.

SUGGESTED ACTION:

Approve recommendation.

Respectfully submitted,

KELLY COLOPY
DIRECTOR
HEALTH AND HUMAN SERVICES

APPROVED:

THOMAS B. MODICA
CITY MANAGER

RESOLUTION NO.

A RESOLUTION OF THE CITY COUNCIL OF THE
CITY OF LONG BEACH PROCLAIMING THE
TERMINATION OF A LOCAL EMERGENCY RELATING TO
MONKEYPOX VIRUS (MPV)

WHEREAS, Section 8630 of the California Government Code and Chapter 2.69 of the Long Beach Municipal Code require the City Council to proclaim the termination of a local emergency at the earliest possible date that conditions warrant; and

WHEREAS, the City Council adopted Resolution No. RES-22-0135 on August 9, 2022, proclaiming that a local emergency, as defined in Government Code Section 8630 and Section 2.69.020 of the Long Beach Municipal Code, existed with respect to the threat of a monkeypox virus (MPV); and

WHEREAS, there has not been a large segment of the population affected by the monkeypox virus, that the cases identified to date have been mild, and the need for resources to respond to the outbreak is decreasing; and

WHEREAS, pursuant to Government Code Section 8630 and Chapter 2.69 of the Long Beach Municipal Code, the City Council desires to proclaim the termination of such local;

NOW, THEREFORE, the City Council of the City of Long Beach resolves as follows:

Section 1. That the proclamation of a local emergency (as defined in Government Code Section 8630 and Section 2.69.020 of the Long Beach Municipal Code) relating to monkeypox virus in the City of Long Beach established by Resolution No. RES-22-0135 is hereby terminated.

Section 2. Resolution No. RES-22-0135 is hereby rescinded.

Section 3. This resolution shall take effect immediately upon its adoption

1 by the City Council, and the City Clerk shall certify the vote adopting this resolution.

2 I hereby certify that the foregoing resolution was adopted by the City
3 Council of the City of Long Beach at its meeting of _____, 2022 by the
4 following vote:
