YES on Pacific Place

I will tell all my friends, families and neighbors how important this development is for our community.

As a resident of Long Beach, I support the development plan for 3701 Pacific Place.

It is important to me that (check all the apply):

- We clean up the impacted site and monitor it
- Beautify a vacant site sitting for 50 years
- Have safe access to the LA River
- Stop homeless encampments, illegal road racing dust, illegal fireworks
- Have access to self storage
- Have access to recreational vehicle parking

YES on Pacific Place

I will tell all my friends, families and neighbors how important this development is for our community.

As a resident of Long Beach, I support the development plan for 3701 Pacific Place.

It is important to me that (check all the apply):

- We clean up the impacted site and monitor it
- Beautify a vacant site sitting for 50 years
- Have safe access to the LA River
- Stop homeless encampments, illegal road racing dust, illegal fireworks
- Have access to self storage
- Have access to recreational vehicle parking

I will tell all my friends, families and neighbors how important this development is for our community.

As a resident of Long Beach, I support the development plan for 3701 Pacific Place.
It is important to me that (check all the apply):

- We clean up the impacted site and monitor it
- Beautify a vacant site sitting for 50 years
- Have safe access to the LA River
- Stop homeless encampments, illegal road racing dust, illegal fireworks
- Have access to self storage
- Have access to recreational vehicle parking

-EXTERNAL-

Dear Ms. Harbin,

I enthusiastically support above captioned project.

The highest and best use of the property is as proposed by current ownership of property.

The cost of acquisition and remediation is not economically feasible and would perhaps delay any forward motion for many years. if the site was viable for my other use the open market would have not let it remain fallow for a decade plus.

Thank you for your consideration,

SteveHyde

Subject: Letter in SUPPORT of New RV/Trailer Storage Lot - 3701 Pacific Place

-EXTERNAL-

Dear Ms Harbin & Planning Commissioners,

As a 20 year resident of Council District 5, and a responsible owner of a business that requires use of a large trailer, I would like to voice my support for the proposed plan for new trailer/RV parking, or "3701 Pacific Place Project".

Recently, the City of Long Beach enacted a trailer/RV parking ban. It was very short-sighted, as evidence has shown that at that point the local area had a huge shortage of rental spaces for trailers/RVs.

It is my understanding that the LB area will soon lose one of its largest trailer/RV storage facilities (the one on Cover St & Paramount Ave adjacent LGB runways). We need a legal space for oversized vehicles to be parked.

In regards to the toxicity concerns of the area, all the more reason not to make it a park or other social gathering area. Similar to nurseries being placed under power lines, this location is ideal for being paved over, and used for much needed oversize storage.

Thank you for your consideration in this matter

Jon Schultz

Hello,

Please find the email below received regarding 3701 Pacific Place.

Thanks,

Alyssa Brown
Executive Assistant

Long Beach Development Services
411 W. Ocean Blvd., 3rd Fl. | Long Beach, CA 90802
Office: 562-570-6351

To help balance the City's budget during this economic downturn, some services are closed on alternating Fridays for staff furloughs (unpaid time off). These furloughs affect many operations in all City Departments and help prevent significant service reductions to the community. To see a schedule of impacted service days, visit www.longbeach.gov/furlough. We appreciate your patience and understanding.

Subject: FW: Build a River Park in West LB !

Good Morning Ladies!

I'm guessing the content mentioned in the email below generally falls under PW, but they also requested an EIR as well as the denial of requests for zoning changes and construction permits. Wasn't sure who'd the best individual or individuals to respond.

Best,

Megan Felix

Assistant Administrative Analyst

Office of the City Manager

411 W. Ocean Blvd, 10th Floor | Long Beach, CA 90802
Office: 562.570.6680

Dear Mayor Garcia and City Councilmembers:

Residents in the western half of Long Beach have approximately 17 times less access to green space than residents in the eastern half of Long Beach. Western Long Beach (aka the **Diesel Death Corridor**) also suffers from much higher rates of asthma and cancer in addition to experiencing lower life expectancies than eastern Long Beach. More so now than ever, the City of Long Beach has an obligation to lean into its stated goals of **achieving equity** in our city. The immense disparities in access to green space cannot be allowed to stand; park equity must be made a top priority for the City of Long Beach.

Given the urgent need for increasing park spaces in western Long Beach, and given the immediate threat posed to the last remaining parcels along the lower LA River, I urge you use any and all available means **to acquire the time-sensitive 3701 Pacific Place and Oil Operators Inc parcel at 712 Baker St** before they are built on and lost forever to our community and all who care about the LA River.

Acquiring these properties along the LA River will enable the City to make significant progress toward its long-established promise laid out in the RiverLink Plan, which was unanimously approved by the City Council in 2015. The City must begin negotiations in earnest with the landowners to acquire these properties for the public while assisting the would-be developers to relocate their proposed construction to more suitable and less sensitive locations. These lands are too valuable to the City to lose. The Council's available tools include:

- Requiring an Environmental Impact Report at 3701 Pacific Place
- Denying all requests for zoning changes
- Denying all approvals and permits for construction
- Using eminent domain to meet the dire need for green space along the lower LA River

Many millions of dollars have been earmarked by state agencies for acquisition (e.g. AB 530 and Prop 68); significant federal funding is also available to clean these lands to meet the the needs of our communities for green space. The Mayor and the City Council must do everything in their power to stop the construction and instead bring these last open spaces into the public domain before they are paved over and gone to us and future generations forever.

Sincerely,

Aostara Kaye

Council District Number: 7

Ms. Harbin, city clerk and LB Planning Commission,
Please find enclosed a letter stating my strongest opposition to the proposed development at 3701 Pacific Place and am contacting you to enter these comments into record. Thank you,
Amy Valenzuela

January 7, 2021

Rania A. Zabaneh

Project Manager

DTSC Cypress Regional Office

5796 Corporate Avenue

Cypress, CA 90630

Ms. Zabaneh,

I write to request that DTSC take the following actions with regard to the 3701 Pacific Place project: reject the responses to the mitigated negative declaration as incomplete, reject the draft response plan as woefully inadequate and based on false information, and require a full environmental impact report.

I object to this development in the strongest terms possible. This land has been set aside as open space for decades. The only reason the designation was changed was to allow the landowners to make a profit in their sale, the city to collect tax revenue, and a few politicians to get campaign donations from the developer. The developer and the city of Long Beach are now trying to get out of doing an environmental impact report. We should be able to rely on you, a state government agency, to be free from economic enticements. Yet, at a recent community meeting your team appeared as partners to the developer, stating that you had been paid to put on a community meeting. Your credibility is tarnished. If any site warrants an EIR, this one does. It is full of toxic solids and gases and is within spitting distance to a park, a school, homes, and a major transit corridor. The Roux report describes the site as being within the Los Cerritos neighborhood and yet until now, not one person or agency has stood up to protect us. So I ask you to reject the response plan and at the very least require an environmental impact report. The land has been so altered as a result of their construction activities already, that alone should spur an EIR. If you would look at the site, your breath would be taken away. All the trees, the shrubs, the bird habitats, everything destroyed. In their place is a gaping, flattened lot flanked by a huge mound of dirt that dwarfs everything around it. The vacuum created by this monstrosity has exacerbated the freeway noise, and no doubt the pollution we breathe. And so I come to you with this request, based on my family's relationship with this land, and terribly disappointed in what has become of it. An environmental impact report will force consideration of extensive, sacred, and irreplaceable tribal-cultural resources that have been ignored completely by your agency, the developer, and the city of Long Beach in this process.

The draft response plan prepared by Roux Associates is based entirely on a false premise. The report states that the site had been 'undeveloped' since at least 1896. That is a lie. Records of the site being part of a Gabrieleno-Tongva village are readily available with just a cursory search. The Gabrieleno-Tongva people have lived continuously throughout the Los Angeles basin, following the seasonal flooding of the Los Angeles and San Gabriel rivers, for the past 7,000 years. My own family, as well as others who worked on the Bixby rancho and were later allowed to settle land near the site in question,

have specific and irreplaceable ties with this land. My father traversed this site as a child on horseback. Even back then the land was being violated by the oil operators. My father recalls the huge sumps being different colors. He remembers finding artifacts and a shell midden not far from the sumps.

3701 Pacific Place is not 'abandoned' or 'undeveloped,' as described in the draft response plan. Quite the opposite. That land is part of an historical Tongva village, and is important to the descendants of those people such as my family. Land without buildings is not viewed as nuisance property to us. Indigenous people value open space so that we can interact with the plants, animals, bodies of water, terrain and vistas of our ancestors. The word 'tongva,' which is how indigenous people describe(d) themselves, means the earth, or the land, or one's landscape, so it translates to 'people of the earth.' Tongva origin stories place the beginning of our culture at Puvungna, the sacred site located on the present day campus of Cal State University Long Beach. Therefore, there is no separating the people from the land. Our sense of self, our concept of the world and our place in it is best described as interdependent with all other life around us. The endangered native Southern Tarplant, torn from the site by developers and left to wither in pots, and the trees that hosted native birds and bats, all of those things are irreplaceable to us and now lost. Open space that sustains native ecosystems is inherently valuable itself and is defined as a cultural resource. The way the land has been violently razed, and all life killed under the developer's bulldozer is damaging to our spirits as my family and I and other descendants have to witness the further exploitation of this land after so many years of abuse as a toxic waste dump.

The nature of indigenous cultures meant that villages encompassed relatively large areas and people would move from low ground to high ground, following seasonal flooding. There are at least three pieces of evidence that need to be considered before determining the irreparable and significant multiple negative impacts this development has already and will cause if allowed to move forward, which were completely ignored in the Roux report as well as in the mitigated negative declaration. In fact, the issues I raise could not be addressed or mitigated at all because they were summarily dismissed by the city and developer's claims that there were no tribal cultural resources to consider. This is an odd statement considering that neither the city nor the developer or their consultants bothered to look for any evidence of tribal resources. So the report cannot be used to determine that the impact is none.

In spite of cultural genocide, massive pollution of the site and surrounding land and widespread destruction of habitat, sacred cultural artifacts have been unearthed on or near the site in question. On this basis alone, the site should be designated as a tribal heritage site. But I ask you, in your role as decision makers at DTSC, to intervene and insist that a more thorough consideration of this site be done to consider the valuable tribal resource it represents through a full environmental impact report:

1. The village size of ancient Tongva people ranged from small groups to thousands of people in a mix of subsistence, seasonal and semi-permanent dwellings plus communal areas that served productive as well as ceremonial purposes. Village sites correspond to regional resources. The historic village Tevaaxa'nga, among others, was located in the Los Cerritos neighborhood. It would have encompassed high ground such as that just east of 3701 Pacific Place, and low areas of marshland such as the Pacific Place topography. Exceedingly rare cogstones were unearthed during the 1930's renovation of the Bixby adobe ranch house. This location is less than a mile from the site in question. Additionally, a sacred burial site was unearthed at Ellis Avenue, less than three miles from the Pacific Place site. A shell midden was discovered on 3701 Pacific Place.

Shell middens are a hallmark of human activity. Other artifacts such as arrowheads have been found on the site as well as in sediment and water washed south into the Wrigley neighborhood during heavy rains.

2. 3701 Pacific Place was home to the native Southern tarplant, a critically endangered marsh plant. It also had trees and brush providing habitat to many species of birds, including migrating bats. Now the city and the developer have razed the entire site and erected a perimeter fence. The plants and trees have been killed and the habitat destroyed. It was once possible to look across the bluff at Los Cerritos Park at the hilly acreage spotted with native scrub, and across the miles to the Palos Verdes peninsula. That view, and the connection to the native habitat of animals, plants and birds, has been destroyed by the developer's bulldozer. This activity has already caused negative impacts and needs to be accounted for.
3. As open space shrinks, what we have left is even more precious. This land, and the plants that reappeared over time to support the animals and birds of this region, were a daily part of my walk. They were a sign of the regeneration possible when the land is left to heal herself. This land represented the promise made by the City of Long Beach to provide open, green space alongside the Los Angeles River. It represented decades of work from many citizens as we volunteered our time to create the Riverlink Plan. This parcel was an integral part of the Riverlink plan and was identified as such in numerous documents. These plans were commissioned by the City and paid for by our tax dollars. Millions of dollars had been procured by state funding sources for the acquisition of this land. Now this land, denuded and razed, represents all that time, effort and money wasted as a developer builds another useless big box storage store that brings absolutely no benefit for the community and robs of us desperately needed open space forever. The Roux draft response plan does not adequately address what the loss of this land will do to our community. The loss of potential is huge: loss of trees to help filter polluted air, loss of endangered habitat, loss of open vistas, loss of access to the River, and loss of access to an ancestral village in a place of such density that virtually no such other opportunities for connection to that past exist.

In closing I ask you to do what any citizen would ask of an agency tasked with cleaning up, or overseeing the cleanup, of brownfield sites. Reject the Roux report. Send it back. Help us account for the negative impact this development has had and will cause by requiring an environmental impact report. Protect us. We have not had any consideration in this process. You can make a difference for us and the land.

Sincerely,

Amy Valenzuela

Subject: Former sludge site

-EXTERNAL-

I concur with the group that wants green space on this site.

This is West Long Beach, a disadvantaged, underserved, working-class part of Long Beach, and people in this category, including kids, desperately need trees and green and clean air that green spaces provide.

Please consider! A great city is one that provides parks and other green areas, corridors, and greenbelts for its citizens.

I live in East Long Beach, and know that I'd personally want to assist in creating more green spaces in the West Side.

Thank you!

Subject: Development @ 3701 Pacific Place

-EXTERNAL-

I am writing to express my concern with the development at 3701 Pacific Place, adjacent to Los Cerritos Elementary School and Los Cerritos Park. I have previously emailed Mayor Garcia, Uranga of the 7th, and Austin of the 8th Districts.

As a resident of the 7th District in Long Beach, we often visit Los Cerritos Park and the Dominguez Gap located in the 8th District, to experience nature. As you are all aware, there is a lack of green space and open space in West and North Long Beach. The revitalization and restoration of the LA River is an important issue as green space and equitable access to the outdoors has serious impacts on public health, both physical and mental.

The westside has been disproportionately impacted by environmental degradation, pollution, port traffic impacts and industrial waste. This is an opportunity to move in the right direction toward equity and equal access.

I would like to see a full and complete EIR on this project before it moves further. There has been little chance for public comment and input. It appears that soil has already been graded, vegetation removed, and the project is moving forward despite the public input period still being open?

Long Beach should be joining the other cities alongside the LA River to prioritize the Lower LA River Revitalization Plan. There is huge potential in this plot of land to link up the Dominguez Gap and other 'greening' of the Westside.

See: <https://lowerlariver.org/the-map/> (#68 and #139)

Can you tell us more about the City's support for environmental justice, health equity, and equal access to green and open space for the Westside and North Long Beach?

Warm regards,

Julianna Robbins

Subject: Pacific Place Project

-EXTERNAL-

Good afternoon Amy,

My name is Justin Potier and I am reaching out to you regarding the decision in yesterday's planning commission meeting. Specifically surrounding the approval of the Pacific Place Project.

I have grown up in the Lakewood and Long Beach communities for nearly 5 decades. I just closed escrow on my first home with my husband located in the Crown Pointe Community on Dec 2nd of this year. I just heard of this proposal and I wanted to confirm a few facts and not to jump to conclusions. The current site was previously used for dumping and golf range and that there was not a full environmental report ordered? I also understand that the Department of Toxic Substances Control has not yet held a public hearing or inspected the site, however grading of the land has already taken place?

I'm concerned of course for my and my spouse's wellbeing. I'm overly concerned about this occurring steps away from an Elementary School and the impact this could have for the children of our community and their families.

As a real estate broker, I am keenly familiar with any variance aside from you typical neighborhood track have a negative impact on properties, below are a few examples:

1. Increased traffic
2. Increased noise
3. Aesthetic desirability's
4. Increase incidents of crime
5. Loss in potential property values
6. Loss in potential tax revenue due to loss in property value
7. Negative impact of air quality due to use of diesel fuels

Please let me know regarding above as I want to make sure I have a clear understanding as to the facts of this situation. I believe there were over 70 local residents and approximately 25 individuals spoke out in opposition of this approval, however the planning commission issued a unanimous vote.

Subject: Opposition to the Proposed Development at 3701 Pacific Place in Long Beach, CA

-EXTERNAL-

I am writing to express my opposition to the proposed development at 3701 Pacific Place in Long Beach, CA.

This proposed development should not be allowed to move forward without an Environmental Impact Report (EIR) being done. The proposed development is right next to a school, which is already negatively impacted with pollution from being situated right next to a freeway. It is reckless to move forward with this project without an EIR, and it is definitely not in the best interests of your constituents who live in that area.

Your consideration of this request is greatly appreciated.

Sincerely,

Diana Ramirez
District 5

Subject: OPPOSITION TO PROPOSED DEVELOPMENT AT 3701 Pacific Place

-EXTERNAL-

Dear Planning Commission:

I am writing to express my opposition to the proposed development at 3701 Pacific Place. As someone who grew up in Bixby Knolls -- and returned as an adult to purchase a home and raise a family -- I am greatly concerned and interested in the LA River projects and nearby development, and how they will serve my family, my neighbors, and the greater community. I am also concerned about the short and long-term environmental impacts of those projects.

Please insist on a full environmental impact review.

I implore you to do everything in your power to prioritize public good and safety in considering this development.

Thank you,
Julia Smith

Re: Agenda Item 20-099PL - Objection to Pacific Place Project 3701 Pacific Place and 3916-4021 Ambeco Road (Mitigated Negative Declaration-10-19-20)

Dear Planning Commission,

We, undersigned residents of the City of Long Beach, demand that our elected officials represent and protect us by requiring a full Environmental Impact Report (EIR) at 3701 Pacific Place Project (the former Golf Learning Center southwest of Crown Point, across from Los Cerritos Park and Elementary School).

We object to the City prematurely allowing the developer to grade the site and move 50,000 tons of soil, given that this was formerly a toxic waste dumpsite. The soil has been shown to contain lead and arsenic and other toxic substances. We object that the developer has been allowed to add additional weight over existing fragile underground infrastructure including degraded drainage pipes, abandoned oil wells, toxic sumps, as well as the active Inglewood-Newport Faultline. We object to the removal of protected plants at the site.

Such actions are especially dangerous because no thorough study of the potential harms to the community has yet been carried out. No construction permit has been issued, yet our neighborhood in Los Cerritos has already endured months of dust arising from the construction at the site without knowing whether the traveling dust is contaminated.

We find these facts particularly alarming:

- a) The Development has not been fully entitled, yet the developer has already been allowed to grade the site flat and remove all vegetation.
- b) The developer has been allowed to build a 15' mound of dirt for the purposes of compacting the soil called surcharging (they call it a test) that is commonly done after the permit for construction, which has not yet been issued.
- c) The Department of Toxic Substances Control (DTSC) has not completed its study of the site, and held its only public meeting after the grading. Yet grading had by then already spread contaminated dust into our neighborhood.
- d) No analysis of the new traffic patterns caused by the proposed development has been conducted, nor how traffic will impact our already poor air quality.
- e) Potential contamination due to undersized storm drainage system has not been adequately studied or addressed, bringing overland toxic contaminants and increased flooding to homes south of the 405 fwy with imminent risk to the immediate area.
- f) The 50,000-ton surcharge pressing down on the abandoned oil wells and active pipelines might be releasing toxic substances that we won't know for years to come.
- g) No study or analysis of likely significant tribal artifacts and/or cultural resources that are present and could be harmed or lost during development has occurred. We will not know the significant and potentially harmful issues that we will have to live with for decades after the developer makes his profits and leaves unless a full EIR is completed. That the City would allow construction on a site with extremely toxic waste without first completing a full EIR is the height of irresponsibility.

We demand a full EIR.

Attached, please find 18 pages with our signatures placed on web based petition platform including comments from concerned members of our community. The list of signatories continues to grow and you are free to visit our site for more information and to sign if so inclined at: <https://www.riverparkcoalition.org>

Sincerely,

Juan E. Ovalle

Comment I'm signing for various reasons: 1) my children attend the school and play at the playground where I have already witnessed clouds of construction dust settling on the grounds. Airborne dust is NOT being mitigated. 2) up until quite recently, this parcel was designated as park/open space. This designation was changed in secret and without public approval. 3) West Long Beach has a dearth of park space and this lot could move that number towards equity. 4) land alongside the LA River should be geared towards revitalization of this wonderful resource, not more industrialization. 5) That the City of Long Beach stands to collect tax revenue from this industrial cite yet is also the entity that determines land use is highly suspect bordering on conflict of interest. I feel that the City has proven that they are not operating in the best interests of me, my children and other citizens.

Comment D/K I'm signing this because I'm tired of our city doing things that are good for their pockets and not the wellbeing of its community! We need to clean up this toxic area which sits near a SCHOOL!!! I'm sure it is affecting the school and nearby homes. Burying it under asphalt (if it becomes one) will only put a bandaid cap over the toxic waste that sits beneath it! Bypassing a FULL ENVIRONMENTAL IMPACT REPORT IS SHAMEFUL! Where does the accountability of the health and well being of our citizens come in? Who is thinking about that???

Name	City	Email address	Phone	LB CD	Comment
Grace Orpilla	Long Beach	gaorpilla@gmail.com	562.832.8190	D/K	The City needs to refocus their attention to LB mission statement. It's on the website... re review it in case your attention is sidetracked to economic outcomes. Quality of life is the issue at the heart of this petition. The balance of economic gain and quality of life is leaning toward what city officials believe is progress. Listen to your citizens cries of quality, high standard of measuring disastrous health outcome of this project. We are already compromised by LB poor air quality always topping 5 nationwide. Greenspace is one small answer but would go a long way to increasing the mark to quality of life.
Patti Walker	Long Beach	patinaantq@yahoo.com	7143493580	D/K	This is why I'm signing: 1. Equity: Our side of the city is unduly burdened by pollution yet we have less than 6% of the park space of more affluent parts of the city. 2. Environment: The proposed project has the potential of causing irreversible environmental damage and decision-makers are turning a blind eye. 3. Representation: Our representatives don't take the initiative to protect our interests unless we 'encourage' them to do so.
Carlos Ovalle	Long Beach	csovalle@gmail.com	3109890917	7th	
Glennis Dolce	Long Beach	glennisd@mac.com	5622010622	D/K	I signing this because the development has not gone through the proper steps to ensure the safety of the community.
Lenny Perez	Long Beach	lennyperez@gmail.com		D/K	
David Walker	Long Beach	walkerdgdec@gmail.com		D/K	I thought this land was designated for recreational use? Let's keep this space for a Long Beach Westside Regional Park and carry out the vision for the LA Riverbed projects! I also do not want more asphalt when we need trees and vegetation to fight the 710 freeway and Port of Long Beach poor air Quality!

Juan Ovalle	Long Beach	jeovallec@gmail.com		8th	The EIR must address all possible impacts including the history of decades of toxic exposure, the current construction work and proposed land development on the environment of Wrigley, Los Cerritos and west Long Beach, such as the urban heat island effect. Including traffic patterns, our local school, fire protection, endangered species, as well as archaeological artifacts, and community beauty and its impact on the LA River basin and its future, including its impact on our Los Angeles Basin. In addition, the EIR should also take into account the impact of lost opportunity for this open space, of the proposed projects impact on residential real estate values, and the alternative of not doing anything at all.
Michael Coyle	Long Beach	miccoyle@gmail.com	5628589275	D/K	
Judy Kocher	Long Beach	jkocher@lbschools.net		D/K	I work at the school with children who don't need to be poisoned.
Leah Odette	Long Beach	leahodette@yahoo.com		D/K	I'd like to see a full impact report so we can understand all the ways this will impact our neighborhood and most importantly the kids at the school who will be next to the site.
Michael Sarabia	Stockton	shakydog808@sbcglobal.net		n/a	As a native Californian, I am concerned about proper land use.
Laura Kovary	Long Beach	laura.kovary@gmail.com		D/K	Environmental impact reports are required for a reason and no entity should be allowed to bypass the process. As a nearby resident I am opposed to any construction until a full EIR is completed, published, and any and all comments reviewed and appropriately addressed.

Lizette Rojas	Long Beach	rojaslizette@yahoo.com		7th	
Mary Artino	Long Beach	maryartino@verizon.net		3rd	I'm signing because the potential danger to children and adults must be measured!
Marilyn Mathews	Long Beach	pharacyde@msn.com	5624265723	6th	I am in disbelief & alarmed that the rare piece of property which used to be the Golf Learning Center has already been graded by a developer without and EIR study. That land is a toxic waste dumpsite and to allow it to be dug up without even studying the effects on our neighborhood is criminal. A better community use of the land, without disrupting the soil, would be in the best interest of Long Beach and the neighborhood (park). This invasion by you allowing a developer to come in & proceed is shameful. Cease operations, do an EIR and use this open space as it should have been used...not for a developer's purposes but for all the citizens of Long Beach.
Elizabeth Vozzella	Long Beach	vozzella.esq@verizon.net		8th

Joseph Weinstein	Long Beach	jweins123@hotmail.com	5624926531	8th	Besides this petition's specific concerns, I am signing it also because unfortunately the kind of official dereliction and misconduct which prompts the petition is not unique. Personally, and as a director of CARP, I am fed up with a Long Beach city scofflaw 'planning' process - as conducted consistently by elected officials, City Hall staff and appointed commissioners - which deliberately treats provisions of the decades-old California Environmental Quality Act as meriting only their disregard - whether from pretended or actual ignorance - or at best as an obstructionist set of meaningless pro forma documentation requirements, rather than as helpful and necessary components of enlightened planning and policy.

Name E. Tucci	City Long Beach	Email address tucci.elena@gmail.com	Phone 5624246201	LB CD 8th	Comment The proposed project calls for the development of a brownfield site, which is currently open space. Meaning, more asphalt that creates urban heat island effect and potentially, contaminated rainwater runoff (contaminated from proposed use into the neighboring watershed). The Viewsheds from Del Mar Avenue, Los Cerritos Elementary School, Los Cerritos Park, and even from the Wardlow section of the Metro Blue Line will be severely and irrevocably affected. This is a shortsighted approach. I am advocating for the long-term health of our neighborhood and future generations. There is currently work in and along the LA River watershed to clean it up, to make it a functional ecosystem, navigable, and once again, part of the fabric of the LA Basin. The City of Long Beach benefits from this movement in many ways. The cleanliness of the LA River watershed will mean a cleaner bay, beach, and ocean; the quality of life around the river, along with the values of neighboring properties will go up. The attempt to circumvent these efforts through development—especially in the City of Long Beach, where we profess to be a "green" city—is disheartening. With concern to environmental equity, the eastern side of Long Beach has seventeen times more acreage dedicated to parks and open space than the west side (of Long Beach). The City should work with the community, in conjunction with Federal, State, and Local Agencies to address what will really benefit our communities—more parkland, wetlands, and open space to serve as the lungs of our neighborhoods—to mitigate existing air quality concerns and open space inequity. There will never be another opportunity

To Whom it may Concern,

I am gravely concerned about the health and safety of my neighborhood.

The Department of Toxic Substances Control (DTSC) has agreed to postpone a community input period until Jan 7 of next year. It is my request the Planning Commission must not consider this until after this date and allow adequate time for the public to review such documents/reports that the DTSC has promised to prepare.

The Planning Commission has absolutely no business putting this item on their agenda when it has not been fully vetted nor has the public been given an opportunity for adequate input. A project such as this that would highly impact a community should have extensive citizen assessment/dialogue.

Please acknowledge receipt of this email and respond appropriately.

Dear Ms. Harbin,

I sent you two letters which you received re the Pacific Place Project. Please note, I am in opposition to the project, which should have been clear by reading my letters. So I have added the word "Oppose" for extra clarity to this letter previously sent.

Please make it clearly known today to the Planning Commissioners that at least 94 other residents wrote also in opposition as indicated by the comments in the negative declarations. These are all people opposed to the project.

Please confirm receipt.

Respectfully,
Linda Scholl

Re: **Oppose** Pacific Place Project - 3701 Pacific Place, Long Beach, CA

Dear Ms. Harbin,

A Mitigated Negative Declaration seems sorely insufficient for the current Project at 3701 Pacific Place, Long Beach. The proposed project is to build asphalt storage for 580 recreation vehicles, plus other storage and industrial buildings with 11 truck roll up doors on a toxic oil and sewage storage dump. And to make it worse, it is located across from Los Cerritos Elementary School, Park and residential neighborhoods. The Project presents numerous potential environmental issues that may disrupt the Community, and the project should be required to complete a full EIR. Anything less than a full EIR is irresponsible.

1. For instance, where does the MND evaluate the air quality impact and noise impact from increased diesel particulates and truck traffic associated with the truck loading and unloading at the 11 truck loading doors at the proposed 77,000 sf of building area? How will this diesel particulate and noise affect the children and residents?

The CAL EnviroScreen reports of the area make it clear that the people are suffering from an overload of contaminants already. Removing open space and trees and bringing in more diesel trucks and vehicles will only increase the pollution. The area along the 710 fwy has been dubbed "the diesel death zone" with the worst pollution ratings in California. <https://oehha.ca.gov/calenviroscreen/maps-data> (put Long Beach into the search bar)

2. Where does the MND address the impact of removing this open space, which prevents heat islands by the trees and soil that create much needed shade, improve air quality, keep heat under control, and provide noise abatement?

Trees are judged to be the most effective antidote to carbon per the latest scientific studies on global warming and reduction of greenhouse gases. If anything is to be done about the diesel death zone, open space and trees is the best plan.

This was confirmed by Council Member Jeannine Pearce in her newsletter last week: *"We know trees consume 50 percent of their weight in Carbon Dioxide (CO2), the chemical associated with lung disease, asthma, and cancer. Trees clean our air, but they do so much more. Buddha found enlightenment beneath a bo tree. Newton discovered gravity when an apple fell from a tree, and Aristotle did his best thinking in the shade of majestic trees."*

3. Where does the MND evaluate the potential hazards of adding the weight, load, heat and pressure of the proposed 580 recreation vehicles upon asphalt to be laid upon the toxic waste dump? *What happens when you store potentially 580 Class A recreational vehicles that weigh an average of 36,000 lbs each? That's almost 21 million pounds planned for a toxic waste site described as being of "toothpaste consistency" 50 feet deep and topped off with 30 feet of carted in top soil. Now who specifically is accepting responsibility and signing approval for this?*

The lead agency should require the Project to evaluate these and other potentially significant impacts due to the decades of toxic waste and sewage contamination well-documented on this property, as well as the issues caused by eliminating recreational open space and trees and soil in an area that is already deprived of sufficient open space for outdoor activities.

Respectfully,
